General Comment

I am a product Developer who has recently received my first patent certification. I've worked very hard to make sure that the idea that I have invented can help the human race combat the prescription drug overdose epidemic that has caused the deaths of thousands of people. To have this lifesaving product invalidated would be a great loss for humanity.

I support the PTAB without any questions. We need to get the correct message to the public about the travesty of invalidating the very people that can, and will change the world.

Can you imagine what would happen if Benjamin Franklin, Thomas Edison, Eli Musk were to be invalidated? Where would this country be? Innovation is the greatest opportunity for growth.
