EFS-Web Overview

- USPTO's Web-based electronic filing system (EFS-Web) for patent application submissions
- Available anytime, anywhere with minimal software requirements (e.g., standard Web browser, Internet connection)
- Launched on March 18, 2006
- Immediately routes documents to USPTO internal systems and provides instant electronic Acknowledgement Receipt to user

Electronic Filing Benefits

- Generates Acknowledgement Receipt to show that the USPTO has received the submission
- Reduces manual processing
- Minimizes paper waste
- Automatically feeds information into internal systems
 - Sends notifications to appropriate processing teams (reduce errors in processing, such as lost files)
- Processes faster by avoiding wait times associated with conventional mailing
- Allows for saving submission package to complete, review, or submit at a later time

Security Features and Digital Certificates

- All transactions are secure and encrypted
- Digital Certificate (or PKI, Public Key Infrastructure, Certificate)

Provides
additional security

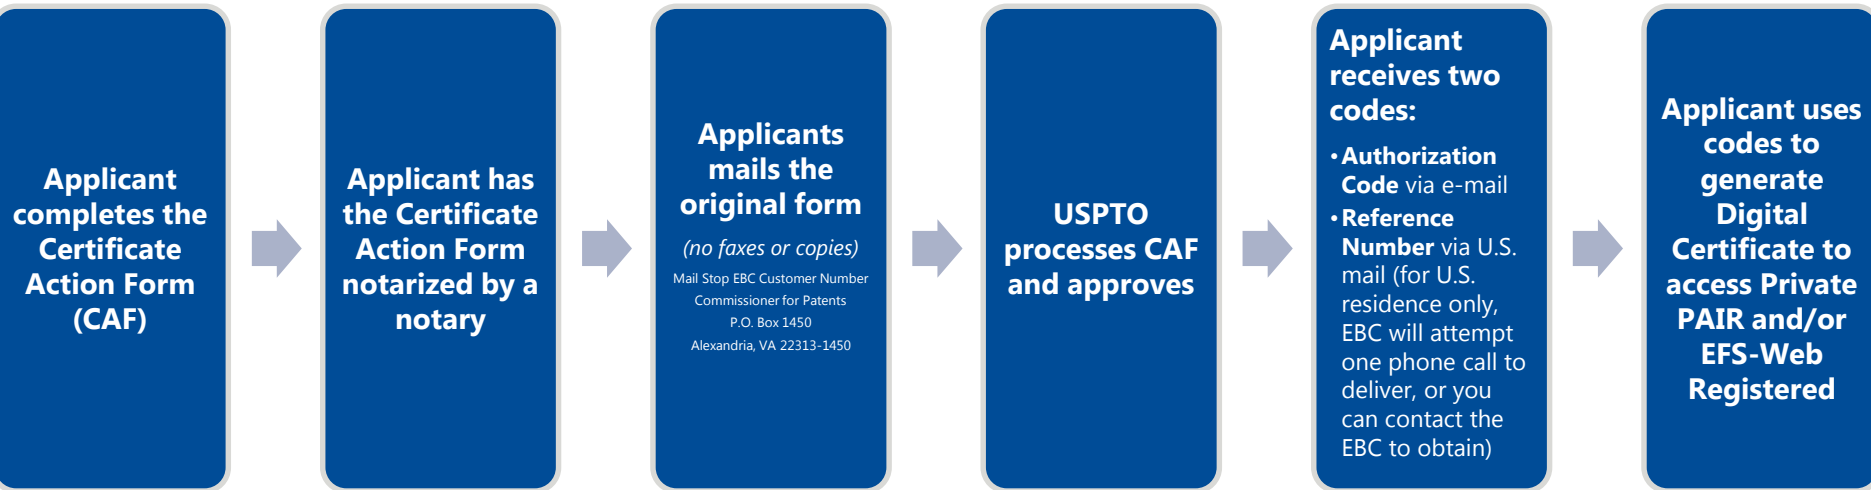

Enhanced 2-step
authentication

Grants access to
secured features in
EFS-Web and
Private PAIR

Digital (PKI) Certificate

Patent attorneys/agents and pro se filers may apply by the following process:

Digital Certificate Management: site to manage your digital certificate contact information, create a set of recovery codes and to perform self-recovery of damaged or lost digital certificates online

Customer Number

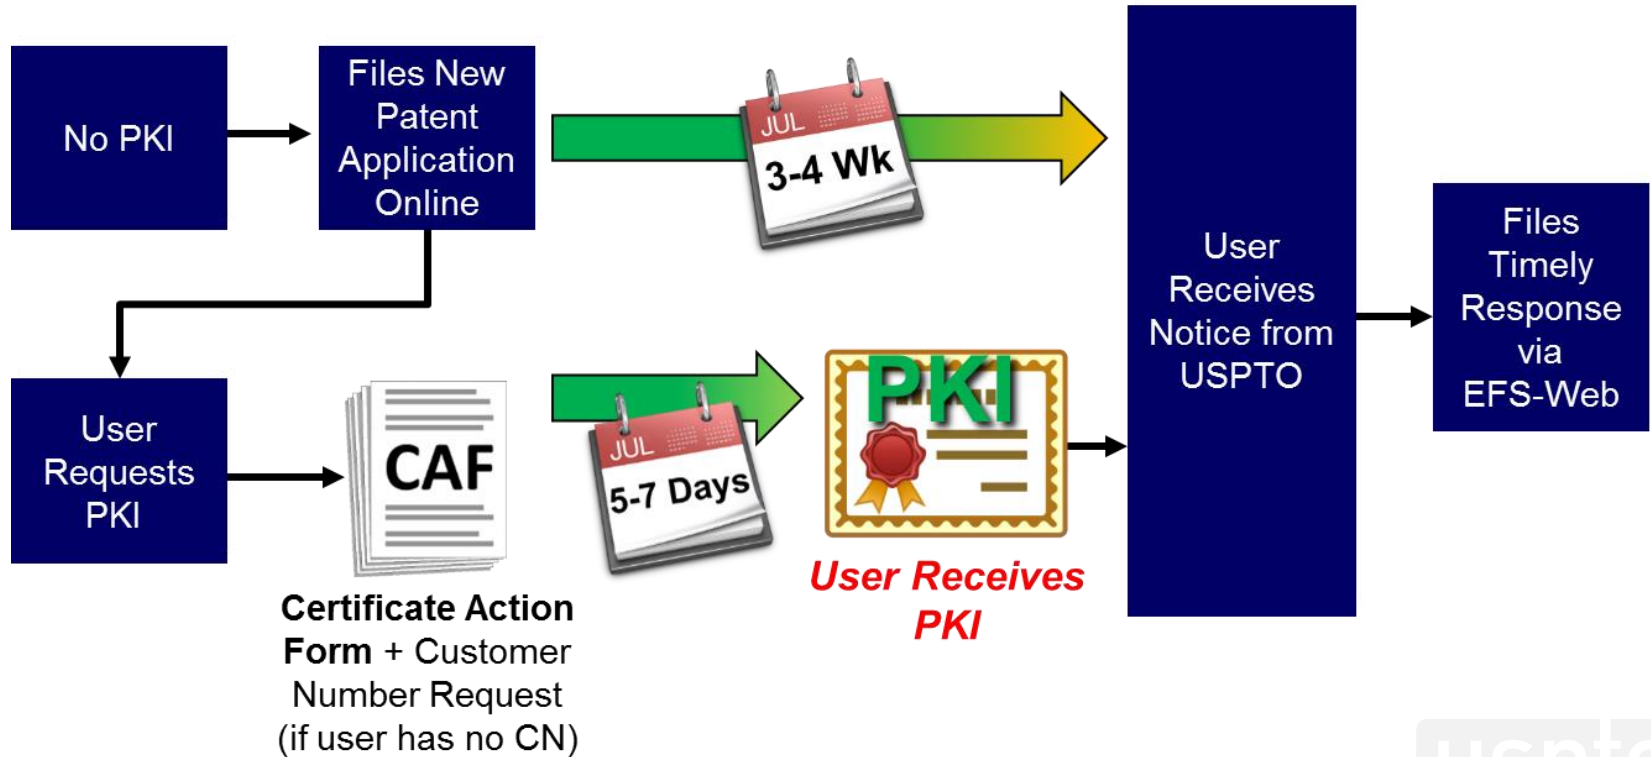

- Allows you to easily correlate all your filings and correspondence with a single mailing address, eliminating typographical errors or variations in addresses that can make it difficult to correspond with the USPTO
- To get your unique Customer Number:
 - PAIR Administration option via Private PAIR
 - **OR** Complete Customer Number Request form and fax it to the EBC at 571-273-0177
- To associate existing patent applications to a Customer Number:
 - PAIR Administration (Attorneys or Agents with Registration Numbers only)
 - **OR** Complete Change of Correspondence Address Form SB/122 (single application) and fax to 571-273-8300, or mail to:
 - Commissioner for Patents
 - P.O. Box 1450
 - Alexandria, VA 22313-1450
 - **OR** Complete Customer Number Upload Spreadsheet SB/125 (multiple applications) and mail the CD or USB memory stick to:
 - Mail Stop EBC Customer Number
 - Commissioner for Patents
 - P.O. Box 1450
 - Alexandria, VA 22313-145011

Registered eFiler

- **Has both an assigned Customer Number and Digital Certificate for secure access to application documents both during and after the filing of a patent application**
 - Provides ability to authenticate sessions by requiring positive identification of a customer using Public Key Infrastructure technologies
- **Can save "in-progress" submissions and return to edit them prior to completing filing**
 - Provides added protection against loss of data in the event of a localized internet or office equipment failure or in the event of an unplanned system outage during an online filing session
- **Can electronically process subsequent actions on electronically filed cases without delay**
- **Can review their confidential Private PAIR records for most of their electronically filed cases**

Registered vs Unregistered EFS-Web

- EFS-Web Unregistered
 - *(Without Digital Certificate)*

The screenshot shows the EFS Unregistered user interface. At the top, there is a blue header with the text "EFS Unregistered". Below the header, there are three buttons: "Unregistered eFilers", "Registered eFilers" (with a checkmark icon), and "Please Read Announcements". The main content area features a welcome message: "Welcome to Electronic Patent Filing for UNREGISTERED eFILERS" followed by a warning: "A submission has not been filed officially at the USPTO until the e-filer exercises the right to file." Below this, there is a yellow maintenance advisory about Firefox 52. An important notice follows, directing users to read the legal framework. At the bottom, there is a "Sign-on as an UNREGISTERED eFILER" section with three input fields for "e-Filer Last Name", "e-Filer First Name", and "e-Filer E-Mail Address".

- EFS-Web Registered
 - *(With Digital Certificate and Customer Number)*

The screenshot shows the EFS Registered user interface. At the top, there is a blue header with the text "EFS Registered". Below the header, there are two buttons: "Registered eFilers" (with a checkmark icon) and "Please Read Announcements". The main content area features a "Certification" section with a warning: "A submission has not been filed officially at the USPTO until the e-filer exercises the right to file." Below this, there is a yellow new feature announcement from September 2015 regarding the Web 85b option. An important notice follows, directing users to read the legal framework. The bottom section is partially visible, showing the start of the "Sign-on as an UNREGISTERED eFILER" section.

Unregistered vs Registered eFiling

Unregistered eFiler

Basic initial filing of new patent applications, third party submissions, and auto-processed petitions (age & maintenance fee)

Submission must be completed in one session

Registered eFiler

Enhanced filing, follow-on processing, and other submission types available (such as ePetitions)

Access to secured features, such as Saved Submission Packages and Acknowledgement Receipts

Access to pending application in Private PAIR (Digital certificate and Customer Number)

Accepted Document Formats

PDF Files

General Documents

Text Files

Bio-Sequence Listings,
Computer Code, Etc.

DOCX Files

Where does it go next?

PAIR: Patent Application Information Retrieval

- **Public PAIR:** Public applications, published applications and issued patents
- **Private PAIR:** Pending applications, published applications, and issued patents, PAIR Administration
 - A Digital Certificate is required to access unpublished applications
 - To access unpublished applications:
 - Correspondence Address of the application needs to be associated to the Customer Number
 - Customer Number needs to be linked to the Digital Certificate of the PAIR user

[Authenticate with Java Applet \(old method\)](#)

[Authenticate with Java Web Start \(new method\)](#)

Which Authentication Method to Choose?

Authenticate with Java Applet method is the original authentication method for the system. This method requires Java Runtime Environment (JRE) installed on the system, and Java Applet Plugin installed into the browser. The Java Applet Plugin has to be configured to use the installed JRE. Many newer versions of major browsers may not support Java Applet Plugin.

Authenticate with Java Web Start requires Java Runtime Environment (JRE) installed on the system, with Web Start launcher (javaws) configured to process downloaded JNLP files, either by file extension or by file content type. These configuration steps are performed by standard JRE installation process. Java Applet Plugin is NOT required.

For additional information regarding these authentication methods, please visit [EFS-Web/PAIR System Requirements](#).

I understand that technology and/or software included in patent applications may be subject to U.S. dual-use export controls, which are set out in the Export Administration Regulations (15 C.F.R. parts 730-774). Access to such technology and/or software by any person located outside the United States or by a foreign national inside the United States constitutes an export that may require a license from the U.S. Commerce Department's Bureau of Industry and Security (BIS). I affirm that I am not accessing or permitting access by others to technology or software in a manner that would violate or circumvent the Export Administration Regulations.

Information regarding U.S. dual-use export controls and their application to technology and software included in patent applications is available from BIS. Please see BIS's website, available at www.bis.doc.gov, or contact BIS's Office of Export Services at 202-482-4811.
