Subject: Comments on Additional USPTO Satellite Offices for, Email 2011-181 - Miami, FL

Dear Mr. Khan:

Please consider Miami, FL as a possible satellite office location. We have several major universities with excellent engineering programs. In addition, the University of Miami has a state of the art medical school program as well as a prominent health system. The presence of a USPTO satellite office will encourage the development of more medical patents, and scientific research. Although Florida is well known for entertainment and tourism, our state has the Kennedy Space Center and is a supporter of other emergent technologies.

Here are some sample college programs from our local universities below.

<http://www.cege.fau.edu/>
http://www.fcas.nova.edu/programs/undergraduate/software_engineering/index.cfm
<http://entec.mdc.edu/>
<http://www.broward.edu/engcompsci/>

It will be extremely beneficial to have an USPTO office in South Florida because it is important to promote innovation and educate more inventors and investors in this region.

Thank you.
