G9B/17.051-G9B/17	.06 : 42G20D-42G20D1	G9B/7.087
G9B/17.061	: 42G10	G9B/7.09
G9B/17.062	: 42G10	The following IPC groups are not used in
G9B/19	: 42G17,42G21,42G22	the internal ECLA classification scheme.
G9B/19.001-G9B/19 42G21,42G21D,42G2		Subject matter covered by these groups is classified in the following ECLA groups [C0802]:
G9B/19.038-G9B/19 42G17i,42G21C-42G2		G11B5/65 covered by G9B/5.236 to G9B/5.24
G9B/19.039-G9B/19	.041 : 42G21F	G11B5/667 " G9B/5.241
G9B/20.003	: 42G8H, 42G8H1	G11B5/673 " G9B/5.241
G9B/20.007-G9B/20	.008 : 42G10	G11B7/16 " G9B/7.112
G9B/20.01	:	G11B7/18 " G9B/7.112
42M37G2D1F, 42M37G2		G11B7/30 " G9B/7
G9B/20.015	: 42M37G2D1F4	G11B9/12-G11B9/14 " G9B/9
G9B/20.06	: 42M37G2D1F3	G11B11/24-G11B11/26 " G9B/11
	.063 : 42G8,42G8A	G11B13/08 " G11B
G9B/21-G9B/21.029		From the date indicated below, the follow-
G9B/23.014-G9B/23 G9B/23.059-G9B/23		ing groups have been deleted from the
		classification scheme. The documents of these groups have been transferred to the
G9B/23.079	: 42G18D1B	new groups as follow:
G9B/23.083-G9B/23 42G9,42G10,42G13,4		G9B/19.027B transferred to G9B/
G9B/23.096	: 42G26E	19.027 (Apr.08) ]
G9B/25	:	Notes
42G8D, 42G20A, 42G20	DB,42G9,42G10,42G11	This subclass covers :
G9B/25.001 42G11	: 42G2,42G2A,42G9-	- recording or playback of information by relative movement between a record track
G9B/25.002 42G11	: 42G3-42G3B,42G9-	and a transducer, the transducer directly producing, or being directly actuated by,
G9B/25.005,G9B/25	.008 : 42G18,42G10G	modulation in the track being recorded or played-back, and the extent of modulation
G9B/27-G9B/27.052 42G8,42G8C,42G8G,4	: 42G13,42G13C,42G19,42G18	corresponding to the signal being recorded or played-back;
D		- apparatus and machines for recording or
G9B/31 42G7A,42G8D,42G23	: ,42G24,42G24A,42G24B	<ul><li>playback, and parts thereof such as heads;</li><li>record carriers for use with such appa-</li></ul>
G9B/31.001	: 42G24B	ratus and machines;
G9B/31.003	: 42G7A,42G24A	- associated working of other apparatus
G9B/33,G9B/33.002	: 42G26A-42G26D,42G28	with such apparatus and machines;
G9B/33.023	: 42G25A	- [N: relative positioning or movement of
for the classification from August 1st, 2 these groups is be	ups are no longer used ation of new documents 1991. The backlog of eing continuously PB/7.062 and subgroups	transducers and record carriers before, during or after transducing operation, e.g. for accessing record carriers or parts thereof, or for track change, selection or acquisition or for track following or for accessing parts of tracks;]

- [N: driving or moving of heads or record carriers or both heads and record carriers for increasing, maintaining or decreasing the relative speed before, during or after transducing operation]

  In this subclass, the following terms or expressions are used with the meanings
- "head" includes any means for converting sinusoidal or non-sinusoidal electric wave-forms into variations of the physical condition of at least the adjacent surface

of the record carrier, or vice versa;

indicated:

- "record carrier" means a body, such as a cylinder, disc, card, tape, or wire, capable of permanently holding information, which can be read-off by a sensing element movable relatively to the record carrier.

[N: Notes

Documents concerning relative positioning or movement of transducers and record carriers are classified in groups G9B/3 to G9B/7 and G9B/21 when only the transducer is controlled and in groups G9B/15, G9B/17 and G9B/19 when only the record carrier is controlled. When both record carrier and head are controlled, the documents are classified in G9B/15.022, G9B/15.023, G9B/ 19 and G9B/27.001. When a plurality of record carriers are controlled, the documents are classified in G9B/15.135, G9B/ 17.041, G9B/17.051 and G9B/27.001. By "access" is meant an operation including a relative movement for positioning between record carrier and head before, during or after transducing; this operation including "seek", "select", "change", "acquire" and "follow" functions for at least a part of a track on at least one record carrier. By "programmed access" is meant a sequence of access operations the result of the sequence being to acquire a want ed sequence of parts of tracks or a wanted sequence of tracks. Relative movement between head and record carrier also covers the movement of a coupling beam such as a light beam between the head and a stationary record carrier. "Movement of the head" also covers any virtual movement or any physical movement such as obtained by switching between successive transducing parts of the head or by moving the transducing zone of the head, i.e. by "scanning". If different transducing parts of the head are switchable, the number of transducing parts should be much smaller

than the number of individual storage areas of the record carrier. Attention is drawn to the notes of subclass G11C.

#### CROSS-REFERENCE ART COLLECTIONS

- Recording by mechanical cutting, deforming or pressing, e.g. of grooves or pits; Reproducing by mechanical sensing; Record carriers therefor G9B/11 [N: and G9B/13] take precedence; recording by cutting or deforming using laser beam G9B/7, using electron beam G9B/9.025) {G11B 3/00}
- 3.001 .[N: with vibrating mechanical coupling means between pick-up element and sound producing element] {G11B 3/00A}
