2913	Relief from Prescribed Time Limits		The Geneva Act of the Hague Agreement Concerning the International Registration of Industrial Designs, July 2, 1999 (hereinafter “Hague Agreement”) is an international agreement that enables an applicant to file a single international design application which may have the effect of an application for protection for the design(s) in countries and/or intergovernmental organizations that are parties to the Hague Agreement (the “Contracting Parties”) designated in the application. The United States is a Contracting Party to the Hague Agreement, which took effect with respect to the United States on May 13, 2015. The Hague Agreement is administered by the International Bureau of the World Intellectual Property Organization (“the International Bureau”).

2920.05(b)	One Independent and Distinct Design		

II. BASIC FLOW UNDER THE HAGUE AGREEMENT

A. *Filing*

An international design application may be filed by an applicant “indirectly” through the office of the applicant’s Contracting Party (provided such Contracting Party has not declared that international design applications may not be filed through its office) or “directly” with the International Bureau. To be entitled to file an international design application, the applicant must be a national of a State that is a Contracting Party or of a State member of an intergovernmental organization that is a Contracting Party, or have a domicile, habitual residence, or a real and effective industrial or commercial establishment in the territory of a Contracting Party.

The U.S. Patent and Trademark Office (“USPTO”) is an office of indirect filing. Only persons who are nationals of the United States or who have a domicile, habitual residence, or a real and effective industrial or commercial establishment in the territory of the United States may file international design applications through the USPTO. If the application is filed through the USPTO, the Office will confirm that the required transmittal fee has been paid, perform a security review, and check that the required indications demonstrating applicant’s entitlement to file the application through the USPTO are present in the application submission. If the transmittal fee is paid and the application clears security review and contains the indications establishing applicant’s entitlement to file the application through the USPTO, the application will be transmitted to the International Bureau and the applicant will be notified of the transmittal. The USPTO will also notify the applicant and the International Bureau of the receipt date of the application.

B. *Formal Examination by the International Bureau; International Registration*

Regardless of whether the application is filed indirectly through applicant’s Contracting Party or directly with the International Bureau, the International Bureau examines the application to

determine whether the applicable formal requirements under the Hague Agreement and Common Regulations Under the 1999 Act and the 1960 Act of the Hague Agreement have been satisfied. If the applicable requirements have been satisfied, the International Bureau will accord the application a filing date and an international registration date and register the industrial design in the International Register. The international registration includes all the data contained in the international design application (including any priority claim where the earlier filing is not more than six months prior to the international filing date), the reproduction(s) of the design, the international registration number and international registration date, and the class of the International Classification determined by the International Bureau. The International Bureau also sends a certificate of international registration to the applicant. Upon registration, the applicant is thereafter referred to as the “holder” of the international registration.

If the International Bureau finds that the international design application does not satisfy the applicable requirements, it will invite the applicant to make the required corrections within a prescribed time limit. The failure to timely respond to the invitation may result in abandonment of the application or removal of the designation of a Contracting Party pursuant to Hague Agreement Article 8.

C. *Publication*

International registrations are published by the International Bureau. However, applicants may control the timing of publication to some extent. Specifically, the applicant may request in the official application form that publication occur immediately after international registration or that publication be deferred for up to 30 months from the filing date (or priority date, if applicable). Deferment of publication is not possible if a Contracting Party is designated that does not permit deferred publication. For applications filed on or after January 1, 2022, absent a request for immediate publication or deferment, the registration will be published twelve months after the date of international registration, or as soon as possible thereafter. For applications filed before January 1, 2022, absent a request for immediate publication or deferment, the registration will be

published six months after the date of international registration, or as soon as possible thereafter. The publication includes the data recorded in the International Register and the reproductions(s) of the industrial design.

A copy of the publication of the international registration is communicated by the International Bureau to the office of each designated Contracting Party. If the United States is designated, the U.S. application assigned to the international registration will be made available in Patent Center shortly after publication of the international registration by the International Bureau. The U.S. application can be found in Patent Center by searching using the international registration number.

For certain Contracting Parties, the date of publication of the international registration may trigger a time period in which to furnish certain submissions required under the law of the Contracting Party concerned, such as priority documents. The International Bureau's Hague Member Profiles Database available at www.wipo.int/hague/memberprofiles/#/ provides information regarding requirements concerning designated Contracting Parties.

D. Examination by the Offices of the Designated Contracting Parties

Following publication of the international registration by the International Bureau, the offices of the designated Contracting Parties proceed with substantive examination if required under their respective laws. Some Contracting Parties do not carry out substantive examination. Furthermore, some Contracting Parties that carry out substantive examination only do so on limited grounds. The International Bureau's Hague Member Profiles database available at www.wipo.int/hague/memberprofiles/#/ provides detailed information regarding the scope of substantive examination carried out by designated Contracting Parties.

As a result of that examination, the office may notify the International Bureau of a refusal of protection for its territory. A refusal of protection, if any, must be notified to the International Bureau within six months from the date of publication of the

international registration. However, any Contracting Party whose office is an examining office, or whose law provides for the possibility of opposition to the grant of protection, may declare that the refusal period of six months is extended to 12 months.

The notification of refusal is communicated by the office of the designated Contracting Party concerned to the International Bureau, which then transmits a copy of the notification of refusal to the holder. Any reply to the notification of refusal must be communicated directly to the designated Contracting Party concerned and not through the International Bureau. After communication of the notification of refusal, all further communications between the applicant and the designated office are directly between them and do not involve the International Bureau.

Pursuant to [35 U.S.C. 389](#), the USPTO will examine international design applications designating the United States based on the published international registration received from the International Bureau. Where it appears that the applicant is not entitled to a patent under the law of the United States with respect to any industrial design that is the subject of the international registration, the Office will send a notification of refusal to the International Bureau, normally within 12 months from the publication of the international registration. The applicant may reply to such notification directly to the USPTO. Any further Office action, such as a subsequent non-final rejection, a final rejection, or an allowance, will be sent directly to the applicant.

E. Effect as a Grant of Protection

Hague Agreement Article 14(2) provides that the international registration shall have the same effect as a grant of protection for the industrial design under the law of that Contracting Party at the latest from the date of expiration of the period allowed for it to communicate a refusal or, where a Contracting Party has made a corresponding declaration under the Regulations, at the latest at the time specified in that declaration. Article 14(2) further provides, that where the office of a designated Contracting Party has communicated a refusal and has subsequently withdrawn, in part or in whole, that refusal, the international registration shall, to the extent that the

refusal is withdrawn, have the same effect in that Contracting Party as a grant of protection for the industrial design under the law of the Contracting Party at the latest from the date on which the refusal was withdrawn.

Contracting Parties vary as to when protection begins within their territories, the duration of protection, and notification of protection. For some Contracting Parties, the effect of a grant of protection begins on the international registration date; for others, the protection may begin on the publication date or later date. Information regarding when protection begins in designated Contracting Parties may be found in the International Bureau's Hague Member Profiles database available at www.wipo.int/hague/memberprofiles/#/.

The duration of protection available also varies among Contracting Parties. Under the Hague Agreement, Contracting Parties must provide a minimum period of protection of 15 years counted from the international registration date, provided the international registration is renewed. Many Contracting Parties provide for longer periods of protection. For a complete listing of the maximum duration of protection available before Contracting Parties, see www.wipo.int/hague/en/declarations/. For most Contracting Parties, renewal of the international registration, including payment of a renewal fee, is required at five-year increments to maintain protection.

While many designated Contracting Parties send notification when protection has been granted within their territories, typically through issuance of a Statement of Grant of Protection communicated to the International Bureau pursuant to the provisions of Hague Agreement Rule 18 *bis*, the sending of such a notification is not required under certain circumstances. Thus, some Contracting Parties may not send any notification that protection has begun within their territories.

For international design applications designating the United States, protection begins upon the date of issuance of a U.S. design patent from such application and extends to those industrial designs that are the subject of the international registration and covered by the U.S. design patent. Concurrent

with the issuance of the patent, the USPTO communicates a Statement of Grant of protection to the International Bureau.

2902 Definitions [R-07.2015]

Definitions of relevant terms are set forth in [35 U.S.C. 381](#), [37 CFR 1.9](#) and [1.1001](#), Article 1 of the Hague Agreement, and Rule 1 of the Common Regulations Under the 1999 Act and the 1960 Act of the Hague Agreement.

As used in MPEP Chapter 2900, "Article" means an article of the Hague Agreement; "Rule," when capitalized, means a rule under the Common Regulations Under the 1999 Act and the 1960 Act of the Hague Agreement; and "Administrative Instruction" means the Administrative Instruction for the Application of the Hague Agreement referred to in Rule 34.

2903 Declarations under the Hague Agreement Made by the United States of America [R-07.2015]

The Geneva Act of the Hague Agreement, and the declarations made thereto, took effect with respect to the United States on May 13, 2015.

Pursuant to Article 5(2)(a) and Rule 11(3), the United States declared that an international design application designating the United States must contain a claim and that the specific wording of the claim shall be in formal terms to the ornamental design for the article as shown, or as shown and described. See [37 CFR 1.1021\(d\)](#) and [MPEP § 2909](#), subsection IV. Additionally, pursuant to Rule 8(1), the United States declared that an international design application designating the United States must also contain an oath or declaration of the creator and indications concerning the identity of the creator. *Id.*

Pursuant to Article 11(1)(b), the United States declared that where the United States is designated in an international design application, it is not possible for an applicant to request the deferment of publication of the ensuing international registration.

Pursuant to Article 13(1), the United States declared that only one independent and distinct design may be claimed in a single application. See [MPEP §§ 2920.05\(b\)](#) and [1504.05](#).

Pursuant to Rule 18(1)(b), the United States declared that it is extending the time period within which to provide a refusal (12 months) and when the international registration shall produce effect as a grant of protection. The United States provides industrial design rights through USPTO issuance of a U.S. design patent. See [35 U.S.C. 171-173](#) and [389](#) and [MPEP §§ 2920.05\(a\)](#) and [2950](#).

Pursuant to Article 7(2) and Rule 12(3), the United States declared that the prescribed designation fee referred to in Article 7(1) shall be replaced by an individual designation fee that is payable in a first part at filing and second part payable upon allowance of the application. See [MPEP §§ 2910](#) and [2920.06](#). The amounts of the first and second part individual designation fees are subject to future changes. See Article 7(2).

Pursuant to Rule 13(4), the United States declared that the period of one month referred to in Rule 13(3) shall be replaced by a period of six months with respect to the United States in light of the security clearance required under United States law.

Pursuant to Article 16(2), the United States declared that changes in ownership recorded by the International Bureau pursuant to Article 16(1)(i) must be recorded with the USPTO through submission of documentation supporting that change in ownership to have effect. See [35 U.S.C. 261](#) and [MPEP §§ 301-302](#).

Pursuant to Article 17(3), the United States declared that that the maximum duration of protection for designs is 15 years from grant. [35 U.S.C. 173](#).

2904 Who May File An International Design Application [R-07.2015]

Hague Article 3

Entitlement to File an International Application

Any person that is a national of a State that is a Contracting Party or of a State member of an intergovernmental organization that is a Contracting Party, or that has a domicile, a habitual

residence or a real and effective industrial or commercial establishment in the territory of a Contracting Party, shall be entitled to file an international application.

Pursuant to Article 3 of the Hague Agreement, to be entitled to file an international design application, a person must: (1) be a national of a Contracting Party or of a State that is a member of an intergovernmental organization that is a Contracting Party; or (2) have a domicile, habitual residence, or real and effective industrial or commercial establishment in the territory of a Contracting Party.

Article 1(ix) of the Hague Agreement defines a “person” as a natural person or a legal entity, and Article 1(xiii) defines a “Contracting Party” as a State or intergovernmental organization that is a party to the Hague Agreement.

A list of the Contracting Parties to the Hague Agreement is maintained on the website of the World Intellectual Property Organization (www.wipo.int/hague/en/members/).

2905 Where to File An International Design Application [R-07.2022]

Hague Article 4

Procedure for Filing the International Application

(1) [*Direct or Indirect Filing*]

(a) The international application may be filed, at the option of the applicant, either directly with the International Bureau or through the Office of the applicant's Contracting Party.

(b) Notwithstanding subparagraph (a), any Contracting Party may, in a declaration, notify the Director General that international applications may not be filed through its Office.

(2) [*Transmittal Fee in Case of Indirect Filing*] The Office of any Contracting Party may require that the applicant pay a transmittal fee to it, for its own benefit, in respect of any international application filed through it.

Pursuant to Article 4 of the Hague Agreement, an international design application may be filed either directly with the International Bureau or indirectly through the office of the applicant's Contracting Party. However, Contracting Parties may notify the International Bureau that applications may not be filed indirectly through their office. See Article 4(1)(b). As such, only certain offices may allow for “indirect” filing. The WIPO website provides information on which Contracting Parties permit

“indirect” filing through their office. See www.wipo.int/hague/en/declarations/.

Article 1(xiv) of the Hague Agreement defines the “applicant’s Contracting Party” as the Contracting Party from which the applicant derives its entitlement to file an international design application under Hague Agreement Article 3 or, if there is more than one such Contracting Party, the one Contracting Party among those Contracting Parties that the applicant expressly identifies as the “applicant’s Contracting Party” in the international design application.

If the applicant is a national of the United States, or has a domicile, a habitual residence, or a real and effective industrial or commercial establishment in the United States, the international design application may be filed directly with the International Bureau, provided any required foreign filing license has been obtained, or indirectly through the USPTO. See [MPEP § 2905.01](#) regarding filing indirectly through the USPTO. Filing the international design application directly with the International Bureau through the WIPO’s e-filing interface (eHague) offers several benefits to applicants, including automatic error checking of inputted data, avoidance of the transmittal fee required by the USPTO for indirectly filed applications, rapid application delivery, and the ability to reuse data from previous applications. For further information regarding eHague, see WIPO’s website at www.wipo.int/hague/en/e-filing.html.

2905.01 Filing Through the USPTO as an Office of Indirect Filing [R-07.2022]

35 U.S.C. 382 Filing international design applications.

(a) IN GENERAL.—Any person who is a national of the United States, or has a domicile, a habitual residence, or a real and effective industrial or commercial establishment in the United States, may file an international design application by submitting to the Patent and Trademark Office an application in such form, together with such fees, as may be prescribed by the Director.

(b) REQUIRED ACTION.—The Patent and Trademark Office shall perform all acts connected with the discharge of its duties under the treaty, including the collection of international fees and transmittal thereof to the International Bureau. Subject to chapter 17, international design applications shall be forwarded by the Patent and Trademark Office to the International Bureau, upon payment of a transmittal fee.

(c) APPLICABILITY OF CHAPTER 16.—Except as otherwise provided in this chapter, the provisions of chapter 16 shall apply.

(d) APPLICATION FILED IN ANOTHER COUNTRY.—An international design application on an industrial design made in this country shall be considered to constitute the filing of an application in a foreign country within the meaning of chapter 17 if the international design application is filed—

- (1) in a country other than the United States;
- (2) at the International Bureau; or
- (3) with an intergovernmental organization.

37 CFR 1.1002 The United States Patent and Trademark Office as an office of indirect filing.

(a) The United States Patent and Trademark Office, as an office of indirect filing, shall accept international design applications where the applicant’s Contracting Party is the United States.

(b) The major functions of the United States Patent and Trademark Office as an office of indirect filing include:

- (1) Receiving and according a receipt date to international design applications;
- (2) Collecting and, when required, transmitting fees due for processing international design applications;
- (3) Determining compliance with applicable requirements of part 5 of this chapter; and
- (4) Transmitting an international design application to the International Bureau, unless prescriptions concerning national security prevent the application from being transmitted.

37 CFR 1.1011 Applicant for international design application.

(a) Only persons who are nationals of the United States or who have a domicile, a habitual residence, or a real and effective industrial or commercial establishment in the territory of the United States may file international design applications through the United States Patent and Trademark Office.

(b) Although the United States Patent and Trademark Office will accept international design applications filed by any person referred to in paragraph (a) of this section, an international design application designating the United States may be refused by the Office as a designated office if the applicant is not a person qualified under 35 U.S.C. chapter 11 to be an applicant.

37 CFR 1.1012 Applicant’s Contracting Party.

In order to file an international design application through the United States Patent and Trademark Office as an office of indirect filing, the United States must be applicant’s Contracting Party (Articles 4 and I(xiv)).

37 CFR 1.1045 Procedures for transmittal of international design application to the International Bureau.

(a) Subject to paragraph (b) of this section and payment of the transmittal fee set forth in § [1.1031\(a\)](#), transmittal of the international design application to the International Bureau shall be made by the Office as provided by Rule 13(1). At the same time as it transmits the international design application to the International Bureau, the Office shall notify the International

Bureau of the date on which it received the application. The Office shall also notify the applicant of the date on which it received the application and of the transmittal of the international design application to the International Bureau.

(b) No copy of an international design application may be transmitted to the International Bureau, a foreign designated office, or other foreign authority by the Office or the applicant, unless the applicable requirements of part 5 of this chapter have been satisfied.

(c) Once transmittal of the international design application has been effected under paragraph (a) of this section, except for matters properly before the United States Patent and Trademark Office as an office of indirect filing or as a designated office, all further correspondence concerning the application should be sent directly to the International Bureau. The United States Patent and Trademark Office will generally not forward communications to the International Bureau received after transmittal of the application to the International Bureau. Any reply to an invitation sent to the applicant by the International Bureau must be filed directly with the International Bureau, and not with the Office, to avoid abandonment or other loss of rights under Article 8.

Only persons who are nationals of the United States or who have a domicile, a habitual residence, or a real and effective industrial or commercial establishment in the United States may file international design applications through the USPTO. See [35 U.S.C. 382\(a\)](#) and [37 CFR 1.1011\(a\)](#). In addition, in order to file an international design application through the USPTO, the United States must be applicant's Contracting Party. See [37 CFR 1.1012](#) and Hague Agreement Article 4. Thus, an international design application may be filed through the USPTO only if: (1) the applicant, or each applicant if there is more than one applicant, is a national of the United States or has a domicile, a habitual residence, or a real and effective industrial or commercial establishment in the United States; and (2) the United States is the applicant's Contracting Party, or each applicant's Contracting Party if there is more than one applicant.

The official form for presenting the international design application, "Application for International Registration" (form DM/1), includes boxes to indicate both applicant's entitlement to file the international design application and applicant's Contracting Party. See [MPEP § 2909.01](#).

International design applications may be filed through the USPTO as an office of indirect filing via EFS-Web, mail, or hand delivery to the Customer Service Window at the USPTO's Alexandria

headquarters. The street address is: U.S. Patent and Trademark Office, Customer Service Window, Randolph Building, 401 Dulany Street, Alexandria, VA 22314. The mailing address for delivery by the U.S. Postal Service is: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

It should be noted that the Priority Mail Express[®] provisions of [37 CFR 1.10](#) apply to the filing of all applications and papers filed in the U.S. Patent and Trademark Office, including international design applications and related papers and fees. It should be further noted, however, that the filing of an international design application is excluded from the Certificate of Mailing or Transmission procedures under [37 CFR 1.8](#). Facsimile transmission may not be used for the filing of an international design application or the filing of color drawings under [37 CFR 1.1026](#). See [37 CFR 1.6\(d\)\(3\) and \(4\)](#), [37 CFR 1.8\(a\)\(2\)\(i\)\(K\)](#). See [MPEP § 502](#) for more information on depositing correspondence with the USPTO.

Payment of the transmittal fee specified in [37 CFR 1.1031\(a\)](#) is required for international design applications filed through the USPTO as an office of indirect filing. In addition, international design applications filed with the USPTO are subject to national security review. See [35 U.S.C. 382\(b\)](#). The international design application will not be transmitted to the International Bureau if the transmittal fee has not been paid or the necessary national security clearance has not been obtained. See [37 CFR 1.1045](#).

Upon receipt of an international design application, the USPTO will review the application for the required indications establishing each applicant's entitlement to file the international design application through the USPTO, payment of the transmittal fee, and national security. If the indications are not sufficient to establish each applicant's entitlement to file the international design application through the USPTO, the transmittal fee has not been paid, or the necessary national security clearance has not been obtained, the Office will notify the applicant accordingly via Form PTO-2320, "Notification Regarding Receipt And Transmittal Of The International Design Application To The International Bureau." Form PTO-2320 does not set a time period to cure the deficiency but instead warns

the applicant that an international design application that is not received by the International Bureau within six months from receipt of the application by the USPTO will receive a filing date as of the date on which the International Bureau receives the application, rather than the USPTO receipt date, subject to Hague Agreement Rule 14(2).

If the conditions for transmitting the international design application to the International Bureau have been satisfied, the application will be transmitted to the International Bureau. The applicant will be notified via Form PTO-2320 of the transmittal of the application to the International Bureau and of the receipt date of the international design application by the USPTO.

Because the international design application must be received by the International Bureau within six months of receipt of the application by the USPTO in order to obtain the receipt date at the USPTO as the filing date, the applicant should contact the USPTO for a status update well in advance of the expiration of this six month period if the applicant has not received Form PTO-2320 indicating transmittal of the application to the International Bureau.

Applicants are advised, when filing an international design application through the USPTO as an office of indirect filing, to consult the EFS-Web Quick Start Guide: International Design Application (Hague), available at www.uspto.gov/sites/default/files/documents/Hague-QSG.pdf. Failure to submit the reproductions in the manner prescribed therein may result in additional per page publication fees being required by the International Bureau.

The Office will generally not forward any submission filed in an international design application to the International Bureau that is received after the application has been transmitted to the International Bureau. Applicants are cautioned that any reply to an invitation sent to the applicant by the International Bureau must be filed directly with the International Bureau, and not with the Office, to avoid abandonment or other loss of rights under Hague Agreement Article 8. See [37 CFR 1.1045\(c\)](#).

2906 Filing Date Requirements [R-07.2015]

Hague Article 9

Filing Date of the International Application

(1) [*International Application Filed Directly*] Where the international application is filed directly with the International Bureau, the filing date shall, subject to paragraph (3), be the date on which the International Bureau receives the international application.

(2) [*International Application Filed Indirectly*] Where the international application is filed through the Office of the applicant's Contracting Party, the filing date shall be determined as prescribed.

(3) [*International Application with Certain Irregularities*] Where the international application has, on the date on which it is received by the International Bureau, an irregularity which is prescribed as an irregularity entailing a postponement of the filing date of the international application, the filing date shall be the date on which the correction of such irregularity is received by the International Bureau.

Hague Rule 14

Examination by the International Bureau

(1) [*Time Limit for Correcting Irregularities*] If the International Bureau finds that the international application does not, at the time of its receipt by the International Bureau, fulfill the applicable requirements, it shall invite the applicant to make the required corrections within three months from the date of the invitation sent by the International Bureau.

(2) [*Irregularities Entailing a Postponement of the Filing Date of the International Application*] Where the international application has, on the date on which it is received by the International Bureau, an irregularity which is prescribed as an irregularity entailing a postponement of the filing date of the international application, the filing date shall be the date on which the correction of such irregularity is received by the International Bureau. The irregularities which are prescribed as entailing a postponement of the filing date of the international application are the following:

- (a) the international application is not in one of the prescribed languages;
- (b) any of the following elements is missing from the international application:
 - (i) an express or implicit indication that international registration under the 1999 Act or the 1960 Act is sought;
 - (ii) indications allowing the identity of the applicant to be established;
 - (iii) indications sufficient to enable the applicant or its representative, if any, to be contacted;
 - (iv) a reproduction, or, in accordance with Article 5(1)(iii) of the 1999 Act, a specimen, of each industrial design that is the subject of the international application;
 - (v) the designation of at least one Contracting Party.

(3) [*International Application Considered Abandoned; Reimbursement of Fees*] Where an irregularity, other than an irregularity referred to in Article 8(2)(b) of the 1999 Act, is not remedied within the time limit referred to in paragraph (1), the international application shall be considered abandoned and the International Bureau shall refund any fees paid in respect of that application, after deduction of an amount corresponding to the basic fee.

Hague Rule 13

International Application Filed Through an Office

(3) [*Filing Date of International Application Filed Indirectly*] Subject to Rule 14(2), the filing date of an international application filed through an Office shall be

(i) where the international application is governed exclusively by the 1999 Act, the date on which the international application was received by that Office, provided that it is received by the International Bureau within one month of that date;

(ii) in any other case, the date on which the International Bureau receives the international application.

(4) [*Filing Date Where Applicant's Contracting Party Requires a Security Clearance*] Notwithstanding paragraph (3), a Contracting Party whose law, at the time that it becomes party to the 1999 Act, requires security clearance may, in a declaration, notify the Director General that the period of one month referred to in that paragraph shall be replaced by a period of six months.

Hague Rule 6

Languages

(1) [*International Application*] The international application shall be in English, French or Spanish.

The filing date of an international design application is accorded by the International Bureau pursuant to Article 9 and Rules 14(2) and 13(3) of the Hague Agreement. The filing date of an international design application in the United States is not necessarily the same date as the filing date accorded by the International Bureau. See [MPEP § 2908](#). The filing date accorded by the International Bureau is referred to as the international filing date.

Pursuant to Rule 14(2), the International Bureau will accord the international design application a filing date only if the application is in one of the prescribed languages. The prescribed languages, set forth in Hague Agreement Rule 6, are English, French, and Spanish. In addition, the international design application must include:

(1) an indication that international registration under the Hague Agreement is requested;

(2) a sufficient indication of the applicant's identity;

(3) a sufficient indication to allow the applicant or its representative to be contacted;

(4) a reproduction or specimen of each industrial design that is the subject of the application; and

(5) the designation of at least one Contracting Party.

If the international design application does not fulfill the applicable requirements, the International Bureau will invite the applicant to make the required corrections within a prescribed time limit. See Rule 14(1). If the defect concerns a missing element required under Rule 14(2) and the applicant timely provides the missing element required under Rule 14(2), the date on which the missing element is received by the International Bureau will be the filing date accorded by the International Bureau. Where the defect, other than a defect referred to in Article 8(2)(b), is not timely remedied, the international design application shall be considered abandoned. Failure to timely remedy a defect referred to in Article 8(2)(b) will result in the international design application being deemed not to contain the designation of the Contracting Party concerned. See [MPEP § 2907](#).

With respect to an international design application filed indirectly through the office of a Contracting Party that is governed exclusively by the 1999 Geneva Act, the international filing date will be the date the international design application was received in the office of the Contracting Party, subject to Rule 14(2), and provided that the application is received by the International Bureau within the time period specified in Rule 13(3). The time period specified in Rule 13(3) is one month from the date of receipt of the application by the Contracting Party or six months from the date of receipt where the Contracting Party has notified the International Bureau that it requires security clearance before communicating the application. The United States has notified the International Bureau that it requires a security clearance. See [MPEP § 2903](#).

2907 International Registration and Date of the International Registration [R-07.2015]

Hague Article 10

International Registration, Date of the International Registration, Publication and Confidential Copies of the International Registration

(1) [*International Registration*] The International Bureau shall register each industrial design that is the subject of an international application immediately upon receipt by it of the international application or, where corrections are invited under Article 8, immediately upon receipt of the required corrections. The registration shall be effected whether or not publication is deferred under Article 11.

(2) [*Date of the International Registration*]

(a) Subject to subparagraph (b), the date of the international registration shall be the filing date of the international application.

(b) Where the international application has, on the date on which it is received by the International Bureau, an irregularity which relates to Article 5(2), the date of the international registration shall be the date on which the correction of such irregularity is received by the International Bureau or the filing date of the international application, whichever is the later.

Hague Rule 15

Registration of the Industrial Design in the International Register

(1) [*Registration of the Industrial Design in the International Register*] Where the International Bureau finds that the international application conforms to the applicable requirements it shall register the industrial design in the International Register and send a certificate to the holder.

(2) [*Contents of the Registration*] The international registration shall contain

(i) all the data contained in the international application, except any priority claim under Rule 7(5)(c) where the date of the earlier filing is more than six months before the filing date of the international application;

(ii) any reproduction of the industrial design;

(iii) the date of the international registration;

(iv) the number of the international registration;

(v) the relevant class of the International Classification, as determined by the International Bureau.

Hague Article 5

Contents of the International Application

(2) [*Additional Mandatory Contents of the International Application*]

(a) Any Contracting Party whose Office is an Examining Office and whose law, at the time it becomes party to this Act, requires that an application for the grant of protection

to an industrial design contain any of the elements specified in subparagraph (b) in order for that application to be accorded a filing date under that law may, in a declaration, notify the Director General of those elements.

(b) The elements that may be notified pursuant to subparagraph (a) are the following:

(i) indications concerning the identity of the creator of the industrial design that is the subject of that application;

(ii) a brief description of the reproduction or of the characteristic features of the industrial design that is the subject of that application;

(iii) a claim.

(c) Where the international application contains the designation of a Contracting Party that has made a notification under subparagraph (a), it shall also contain, in the prescribed manner, any element that was the subject of that notification.

If the International Bureau determines that the international design application conforms to the applicable requirements, it will register the industrial design in the International Register. See Article 10(1) and Rule 15. Pursuant to Article 10(2), the date of international registration will be the international filing date (see [MPEP § 2906](#)) unless there is an applicable requirement under Hague Agreement Article 5(2) that has not been satisfied, in which case the date of international registration will be the date that a timely correction satisfying the outstanding requirement(s) of Article 5(2) is received, or the international filing date, whichever is later.

Hague Agreement Article 5(2) sets forth additional mandatory elements of an international design application that may be required by certain Contracting Parties. Where the international design application contains the designation of a Contracting Party that has notified the International Bureau that it requires an element under Article 5(2), then the international design application must contain that element. The additional elements that may be required under Article 5(2) are: (1) an indication identifying the creator of the industrial design; (2) a brief description of the reproduction or of the characteristic features of the industrial design; and (3) a claim.

If the international design application does not comply with the applicable requirements, including any missing element required under Article 5(2), the International Bureau will invite the applicant to

remedy the defect within a prescribed time limit. See Rule 14(1). Where the defect relates to a missing requirement under Article 5(2), or to a special requirement notified to the International Bureau in accordance with the Regulations under the Hague Agreement (e.g., the requirement for an oath or declaration of the creator pursuant to Rule 8), the failure to timely comply with the invitation will result in the international design application being deemed not to contain the designation of the Contracting Party concerned. See Article 8(2)(b).

2908 Filing Date in the United States [R-07.2015]

35 U.S.C. 384 Filing date

(a) IN GENERAL.—Subject to subsection (b), the filing date of an international design application in the United States shall be the effective registration date. Notwithstanding the provisions of this part, any international design application designating the United States that otherwise meets the requirements of chapter 16 may be treated as a design application under chapter 16.

(b) REVIEW.—An applicant may request review by the Director of the filing date of the international design application in the United States. The Director may determine that the filing date of the international design application in the United States is a date other than the effective registration date. The Director may establish procedures, including the payment of a surcharge, to review the filing date under this section. Such review may result in a determination that the application has a filing date in the United States other than the effective registration date.

35 U.S.C. 381 Definitions

(a) IN GENERAL.—When used in this part, unless the context otherwise indicates—

(1) the term 'treaty' means the Geneva Act of the Hague Agreement Concerning the International Registration of Industrial Designs adopted at Geneva on July 2, 1999;

(2) the term 'regulations'—

(A) when capitalized, means the Common Regulations under the treaty; and

(B) when not capitalized, means the regulations established by the Director under this title;

(3) the terms 'designation', 'designating', and 'designate' refer to a request that an international registration have effect in a Contracting Party to the treaty;

(4) the term 'International Bureau' means the international intergovernmental organization that is recognized as the coordinating body under the treaty and the Regulations;

(5) the term 'effective registration date' means the date of international registration determined by the International Bureau under the treaty;

(6) the term 'international design application' means an application for international registration; and

(7) the term 'international registration' means the international registration of an industrial design filed under the treaty.

(b) RULE OF CONSTRUCTION.—Terms and expressions not defined in this part are to be taken in the sense indicated by the treaty and the Regulations.

37 CFR 1.1023 Filing date of an international design application in the United States.

(a) Subject to paragraph (b) of this section, the filing date of an international design application in the United States is the date of international registration determined by the International Bureau under the Hague Agreement ([35 U.S.C. 384](#) and [381\(a\)\(5\)](#)).

(b) Where the applicant believes the international design application is entitled under the Hague Agreement to a filing date in the United States other than the date of international registration, the applicant may petition the Director under this paragraph to accord the international design application a filing date in the United States other than the date of international registration. Such petition must be accompanied by the fee set forth in [§ 1.17\(f\)](#) and include a showing to the satisfaction of the Director that the international design application is entitled to such filing date.

Pursuant to [35 U.S.C. 384\(a\)](#), the filing date of an international design application in the United States is the “effective registration date”, subject to review pursuant to [35 U.S.C. 384\(b\)](#). The “effective registration date” means “the date of international registration determined by the International Bureau under the treaty”. See [35 U.S.C. 381\(a\)\(5\)](#).

Pursuant to [35 U.S.C. 384\(b\)](#), an applicant may request review by the Director of the filing date of the international design application in the United States. The procedure for requesting such review is set forth in [37 CFR 1.1023\(b\)](#). Pursuant to [37 CFR 1.1023\(b\)](#), where the applicant believes the international design application is entitled under the Hague Agreement to a filing date in the United States other than the date of international registration, the applicant may petition the Director under [37 CFR 1.1023\(b\)](#) to accord the international design application a filing date in the United States other than the date of international registration. Such petition must be accompanied by the fee set forth in [37 CFR 1.17\(f\)](#) and include a showing to the satisfaction of the Director that the international design application is entitled to such filing date.

2909 Contents of the International Design Application [R-07.2022]

Hague Article 5

Contents of the International Application

(1) [*Mandatory Contents of the International Application*] The international application shall be in the prescribed language or one of the prescribed languages and shall contain or be accompanied by

- (i) a request for international registration under this Act;
- (ii) the prescribed data concerning the applicant;
- (iii) the prescribed number of copies of a reproduction or, at the choice of the applicant, of several different reproductions of the industrial design that is the subject of the international application, presented in the prescribed manner; however, where the industrial design is two-dimensional and a request for deferment of publication is made in accordance with paragraph (5), the international application may, instead of containing reproductions, be accompanied by the prescribed number of specimens of the industrial design;
- (iv) an indication of the product or products which constitute the industrial design or in relation to which the industrial design is to be used, as prescribed;
- (v) an indication of the designated Contracting Parties;
- (vi) the prescribed fees;
- (vii) any other prescribed particulars.

(2) [*Additional Mandatory Contents of the International Application*]

(a) Any Contracting Party whose Office is an Examining Office and whose law, at the time it becomes party to this Act, requires that an application for the grant of protection to an industrial design contain any of the elements specified in subparagraph (b) in order for that application to be accorded a filing date under that law may, in a declaration, notify the Director General of those elements.

(b) The elements that may be notified pursuant to subparagraph (a) are the following:

- (i) indications concerning the identity of the creator of the industrial design that is the subject of that application;
- (ii) a brief description of the reproduction or of the characteristic features of the industrial design that is the subject of that application;
- (iii) a claim.

(c) Where the international application contains the designation of a Contracting Party that has made a notification under subparagraph (a), it shall also contain, in the prescribed manner, any element that was the subject of that notification.

(3) [*Other Possible Contents of the International Application*] The international application may contain or be accompanied by such other elements as are specified in the Regulations.

(4) [*Several Industrial Designs in the Same International Application*] Subject to such conditions as may be prescribed, an international application may include two or more industrial designs.

(5) [*Request for Deferred Publication*] The international application may contain a request for deferment of publication.

Hague Rule 7

Requirements Concerning the International Application

(1) [*Form and Signature*] The international application shall be presented on the official form. The international application shall be signed by the applicant.

(2) [*Fees*] The prescribed fees applicable to the international application shall be paid as provided for in Rules 27 and 28.

(3) [*Mandatory Contents of the International Application*] The international application shall contain or indicate

- (i) the name of the applicant, given in accordance with the Administrative Instructions;
- (ii) the address, given in accordance with the Administrative Instructions, and email address of the applicant;
- (iii) the Contracting Party or Parties in respect of which the applicant fulfills the conditions to be the holder of an international registration;

(iv) the product or products which constitute the industrial design or in relation to which the industrial design is to be used, with an indication whether the product or products constitute the industrial design or are products in relation to which the industrial design is to be used; the product or products shall preferably be identified by using terms appearing in the list of goods of the International Classification;

(v) the number of industrial designs included in the international application, which may not exceed 100, and the number of reproductions or specimens of the industrial designs accompanying the international application in accordance with Rule 9 or 10;

(vi) the designated Contracting Parties;

(vii) the amount of the fees being paid and the method of payment, or instructions to debit the required amount of fees to an account opened with the International Bureau, and the identification of the party effecting the payment or giving the instructions.

(4) [*Additional Mandatory Contents of an International Application*]

(a) With respect to Contracting Parties designated under the 1999 Act in an international application, that application shall contain, in addition to the indications referred to in paragraph (3)(iii), the indication of the applicant's Contracting Party.

(b) Where a Contracting Party designated under the 1999 Act has notified the Director General, in accordance with Article 5(2)(a) of the 1999 Act, that its law requires one or more of the elements referred to in Article 5(2)(b) of the 1999 Act, the international application shall contain such element or elements, as prescribed in Rule 11.

(c) Where Rule 8 applies, the international application shall, as applicable, contain the indications referred to in paragraphs (2) or (3) thereof and be accompanied by any relevant statement, document, oath or declaration referred to in that Rule.

(5) [*Optional Contents of an International Application*]

(a) An element referred to in item (i) or (ii) of Article 5(2)(b) of the 1999 Act or in Article 8(4)(a) of the 1960 Act may, at the option of the applicant, be included in the international application even where that element is not required in consequence of a notification in accordance with Article 5(2)(a) of the 1999 Act or in consequence of a requirement under Article 8(4)(a) of the 1960 Act.

(b) Where the applicant has a representative, the international application shall state the name and address, given in accordance with the Administrative Instructions, and email address of the representative.

(c) Where the applicant wishes, under Article 4 of the Paris Convention, to take advantage of the priority of an earlier filing, the international application shall contain a declaration claiming the priority of that earlier filing, together with an indication of the name of the Office where such filing was made and of the date and, where available, the number of that filing and, where the priority claim relates to less than all the industrial designs contained in the international application, the indication of those industrial designs to which the priority claim relates or does not relate.

(d) Where the applicant wishes to take advantage of Article 11 of the Paris Convention, the international application shall contain a declaration that the product or products which constitute the industrial design or in which the industrial design is incorporated have been shown at an official or officially recognized international exhibition, together with the place where the exhibition was held and the date on which the product or products were first exhibited there and, where less than all the industrial designs contained in the international application are concerned, the indication of those industrial designs to which the declaration relates or does not relate.

(e) Where the applicant wishes that publication of the industrial design be deferred, the international application shall contain a request for deferment of publication.

(f) The international application may also contain any declaration, statement or other relevant indication as may be specified in the Administrative Instructions.

(g) The international application may be accompanied by a statement that identifies information known by the applicant to be material to the eligibility for protection of the industrial design concerned.

(6) [*No Additional Matter*] If the international application contains any matter other than that required or permitted by the 1999 Act, the 1960 Act, these Regulations or the Administrative Instructions, the International Bureau shall delete it *ex officio*. If the international application is accompanied by any document other than those required or permitted, the International Bureau may dispose of the said document.

(7) [*All Products to Be in Same Class*] All the products which constitute the industrial designs to which an international application relates, or in relation to which the industrial designs

are to be used, shall belong to the same class of the International Classification.

Hague Administrative Instructions Section 408:

Permitted Matters in the International Application and Permitted Documents Accompanying an International Application

(a) Where the applicant has made a declaration under Rule 7(5)(c) claiming priority of an earlier filing in the international application, that claim may be accompanied by a code allowing to retrieve that filing in a Digital Access Service for Priority Documents (DAS) digital library;

(b) Where the applicant wishes to benefit from a reduction of an individual designation fee as indicated in a declaration made under Article 7(2) of the 1999 Act by a designated Contracting Party, the international application may contain an indication or claim of the economic status entitling the applicant to the reduced fee as indicated in the declaration, as well as the certificate thereof, where applicable.

(c)(i) Where the applicant wishes to make a declaration concerning exception to lack of novelty in the international application, as may be prescribed under the law of a designated Contracting Party, the declaration shall be worded as follows, with the indication of those industrial designs to which the declaration relates: "Declaration Concerning Exception to Lack of Novelty "The applicant claims to benefit from exceptional treatments provided for in the applicable laws of the designated Contracting Parties concerned, for disclosure of [all] the [following] industrial designs included in the present application."

(ii) Where the applicant wishes to submit documentation on the type and date of disclosure, the international application may be accompanied by such documentation.

(d) Where the applicant wishes to submit a statement as referred to in Rule 7(5)(g), the statement shall be in the format established by the International Bureau in agreement with the designated Contracting Party concerned.

35 U.S.C. 383 International design application.

In addition to any requirements pursuant to chapter 16, the international design application shall contain—

- (1) a request for international registration under the treaty;
 - (2) an indication of the designated Contracting Parties;
 - (3) data concerning the applicant as prescribed in the treaty and the Regulations;
 - (4) copies of a reproduction or, at the choice of the applicant, of several different reproductions of the industrial design that is the subject of the international design application, presented in the number and manner prescribed in the treaty and the Regulations;
 - (5) an indication of the product or products that constitute the industrial design or in relation to which the industrial design is to be used, as prescribed in the treaty and the Regulations;
 - (6) the fees prescribed in the treaty and the Regulations;
- and

(7) any other particulars prescribed in the Regulations.

37 CFR 1.1021 Contents of the international design application.

(a) *Mandatory contents.* The international design application shall be in English, French, or Spanish (Rule 6(1)) and shall contain or be accompanied by:

(1) A request for international registration under the Hague Agreement (Article 5(1)(i));

(2) The prescribed data concerning the applicant (Article 5(1)(ii) and Rule 7(3)(i) and (ii));

(3) The prescribed number of copies of a reproduction or, at the choice of the applicant, of several different reproductions of the industrial design that is the subject of the international design application, presented in the prescribed manner; however, where the industrial design is two-dimensional and a request for deferment of publication is made in accordance with Article 5(5), the international design application may, instead of containing reproductions, be accompanied by the prescribed number of specimens of the industrial design (Article 5(1)(iii));

(4) An indication of the product or products that constitute the industrial design or in relation to which the industrial design is to be used, as prescribed (Article 5(1)(iv) and Rule 7(3)(iv));

(5) An indication of the designated Contracting Parties (Article 5(1)(v));

(6) The prescribed fees (Article 5(1)(vi) and Rule 12(1));

(7) The Contracting Party or Parties in respect of which the applicant fulfills the conditions to be the holder of an international registration (Rule 7(3)(iii));

(8) The number of industrial designs included in the international design application, which may not exceed 100, and the number of reproductions or specimens of the industrial designs accompanying the international design application (Rule 7(3)(v));

(9) The amount of the fees being paid and the method of payment, or instructions to debit the required amount of fees to an account opened with the International Bureau, and the identification of the party effecting the payment or giving the instructions (Rule 7(3)(vii)); and

(10) An indication of applicant's Contracting Party as required under Rule 7(4)(a).

(b) *Additional mandatory contents required by certain Contracting Parties.*

(1) Where the international design application contains the designation of a Contracting Party that requires, pursuant to Article 5(2), any of the following elements, then the international design application shall contain such required element(s):

(i) Indications concerning the identity of the creator of the industrial design that is the subject of that application (Rule 11(1));

(ii) A brief description of the reproduction or of the characteristic features of the industrial design that is the subject of that application (Rule 11(2));

(iii) A claim (Rule 11(3)).

(2) Where the international design application contains the designation of a Contracting Party that has made a declaration under Rule 8(1), then the international application shall contain the statement, document, oath or declaration specified in that declaration (Rule 7(4)(c)).

(c) *Optional contents.* The international design application may contain:

(1) Two or more industrial designs, subject to the prescribed conditions (Article 5(4) and Rule 7(7));

(2) A request for deferment of publication (Article 5(5) and Rule 7(5)(e)) or a request for immediate publication (Rule 17);

(3) An element referred to in item (i) or (ii) of Article 5(2)(b) of the Hague Agreement or in Article 8(4)(a) of the 1960 Act even where that element is not required in consequence of a notification in accordance with Article 5(2)(a) of the Hague Agreement or in consequence of a requirement under Article 8(4)(a) of the 1960 Act (Rule 7(5)(a));

(4) The name and address of applicant's representative, as prescribed (Rule 7(5)(b));

(5) A claim of priority of one or more earlier filed applications in accordance with Article 6 and Rule 7(5)(c);

(6) A declaration, for purposes of Article 11 of the Paris Convention, that the product or products which constitute the industrial design or in which the industrial design is incorporated have been shown at an official or officially recognized international exhibition, together with the place where the exhibition was held and the date on which the product or products were first exhibited there and, where less than all the industrial designs contained in the international design application are concerned, the indication of those industrial designs to which the declaration relates or does not relate (Rule 7(5)(d));

(7) Any declaration, statement or other relevant indication as may be specified in the Administrative Instructions (Rule 7(5)(f));

(8) A statement that identifies information known by the applicant to be material to the eligibility for protection of the industrial design concerned (Rule 7(5)(g));

(9) A proposed translation of any text matter contained in the international design application for purposes of recording and publication (Rule 6(4)).

(d) *Required contents where the United States is designated.* In addition to the mandatory requirements set forth in paragraph (a) of this section, an international design application that designates the United States shall contain or be accompanied by:

(1) A claim (§§ [1.1021\(b\)\(1\)\(iii\)](#) and [1.1025](#));

(2) Indications concerning the identity of the creator (i.e., the inventor, see § [1.9\(d\)](#)) in accordance with Rule 11(1); and

(3) The inventor's oath or declaration (§§ [1.63](#) and [1.64](#)). The requirements in §§ [1.63\(b\)](#) and [1.64\(b\)\(4\)](#) to identify each inventor by his or her legal name, mailing address, and

residence, if an inventor lives at a location which is different from the mailing address, and the requirement in § [1.64\(b\)\(2\)](#) to identify the residence and mailing address of the person signing the substitute statement, will be considered satisfied by the presentation of such information in the international design application prior to international registration

The elements of an international design application fall into three categories: (1) mandatory contents; (2) additional mandatory contents; and (3) optional contents.

I. MANDATORY CONTENTS

Mandatory contents are those items required in all international design applications. Such contents are set forth in Article 5(1) and Rule 7 of the Hague Agreement and [37 CFR 1.1021\(a\)](#). Specifically, the international design application must be in English, French, or Spanish, it must be presented on the official form (see [MPEP § 2909.01](#)) and signed by the applicant, and it must include: (1) a request for international registration under the Hague Agreement; (2) the prescribed data concerning the applicant; (3) the prescribed number of copies of a reproduction or, at the choice of the applicant, of several different reproductions of the industrial design that is the subject of the international design application, presented in the prescribed manner (where the industrial design is two-dimensional and a request for deferment of publication is made in accordance with Article 5(5) of the Hague Agreement, the international design application may, instead of containing reproductions, be accompanied by the prescribed number of specimens of the industrial design); (4) an indication of the product or products that constitute the industrial design or in relation to which the industrial design is to be used, as prescribed; (5) an indication of the designated Contracting Parties; (6) the prescribed fees; (7) the Contracting Party or Parties in respect of which the applicant fulfills the conditions to be the holder of an international registration; (8) the number of industrial designs included in the international application, which may not exceed 100, and the number of reproductions or specimens of the industrial designs accompanying the international application; (9) the amount of the fees being paid and the method of payment or instructions to debit the required amount of fees to an account opened with the International Bureau and the identification

of the party effecting the payment or giving the instructions; and (10) an indication of applicant's Contracting Party as required under Rule 7(4)(a).

II. ADDITIONAL MANDATORY CONTENTS

Additional mandatory contents are elements that are required by certain Contracting Parties and therefore are mandatory in any international design application that designates such Contracting Parties (see Article 5(2) and Rule 7 of the Hague Agreement and [37 CFR 1.1021\(b\)](#)). Such additional mandatory contents may consist of, pursuant to Article 5(2) of the Hague Agreement, indications concerning the identity of the creator, a brief description of the reproduction or of the characteristic features of the industrial design, (iii) a claim, and/or, pursuant to Rule 8(1) of the Hague Agreement, a statement, document, oath, or declaration.

III. OPTIONAL CONTENTS

Optional contents are items that may be included in an international design application. Optional contents are addressed in Rule 7(5) of the Hague Agreement and [37 CFR 1.1021\(c\)](#) and may include: (1) two or more industrial designs, subject to the prescribed conditions; (2) a request for deferment of publication or a request for immediate publication; (3) any of the additional mandatory elements discussed above, even if such elements are not required by any Contracting Party designated in the international design application; (4) the prescribed information concerning the applicant's representative; (5) a claim of priority of one or more earlier filed applications, which, pursuant to Administrative Instruction section 408(a), may be accompanied by an access code allowing to retrieve the priority document from a Digital Access Service for Priority Documents (DAS) digital library; (6) a declaration, for purposes of Article 11 of the Paris Convention, that the product or products that constitute the industrial design, or in which the industrial design is incorporated, have been shown at an official or officially recognized international exhibition, together with the place where the exhibition was held and the date on which the product or products were first exhibited there and, where less than all the industrial designs contained in the international application are concerned, the indication of those

industrial designs to which the declaration relates or does not relate; (7) any declaration, statement, or other relevant indication as may be specified in the Administrative Instructions; (8) a statement that identifies information known by the applicant to be material to the eligibility for protection of the industrial design concerned; and (9) a proposed translation of any text matter contained in the international application for purposes of recording and publication.

IV. REQUIRED CONTENTS WHERE THE UNITED STATES IS DESIGNATED

As set forth in [37 CFR 1.1021\(d\)](#), in addition to the mandatory requirements otherwise required for international design applications, an international design application designating the United States must also include: (1) a claim ([37 CFR 1.1021\(b\)\(1\)\(iii\)](#) and [37 CFR 1.1025](#)); (2) indications concerning the identity of the creator (i.e., the inventor, see [37 CFR 1.9\(d\)](#)) in accordance with Rule 11(1); and (3) the inventor's oath or declaration ([37 CFR 1.63](#) and [1.64](#)).

A claim is a filing date requirement for design applications in the United States. See [35 U.S.C. 171](#). The United States has declared, pursuant to Article 5(2), that an international design application designating the United States must contain a claim. See [MPEP § 2903](#). Consequently, an international design application designating the United States that does not contain a claim will not be registered by the International Bureau in the international register and thus will not be entitled to a filing date in the United States. See [MPEP §§ 2907](#) and [2908](#). In such case, the International Bureau will invite the applicant to submit the claim within a prescribed time limit and will accord a date of international registration as of the date of receipt of the claim (assuming there are no other defects). Failure to timely submit the claim in response to the invitation by the International Bureau will result in the application being deemed not to contain the designation of the United States. See Article 8(2)(b). Use of the official application form (form DM/1) will help ensure that applicants designating the United States will satisfy the requirement for a claim, as Item (12) of the official form includes a claim for

the purposes of the designation of the United States. See [MPEP § 2909.01](#).

Pursuant to Rule 8(1), the United States has declared that an international design application designating the United States must contain an oath or declaration of the creator and indications concerning the identity of the creator. See [MPEP § 2903](#). The requirements for the inventor's oath or declaration are set forth in [37 CFR 1.63](#) and [1.64](#). [37 CFR 1.1021\(d\)](#) further provides that the requirements in [37 CFR 1.63\(b\)](#) and [1.64\(b\)\(4\)](#) to identify each inventor by his or her legal name, mailing address, and residence, if an inventor lives at a location which is different from the mailing address, and the requirement in [37 CFR 1.64\(b\)\(2\)](#) to identify the residence and mailing address of the person signing the substitute statement will be considered satisfied by the presentation of such information in the international design application prior to international registration. If the inventor's oath or declaration has not been filed, the International Bureau will invite the applicant to submit the inventor's oath or declaration within a prescribed time limit. Failure to timely submit the inventor's oath or declaration in response to the invitation by the International Bureau will result in the application being deemed not to contain the designation of the United States. See Article 8(2)(b). Annex I to the official application form (form DM/1) available at www.wipo.int/hague/en/forms/ includes a declaration of inventorship form and a substitute statement form for use with international design applications designating the United States. See [MPEP § 2909.03](#).

An international design application designating the United States must include a specification as prescribed by [35 U.S.C. 112](#) and preferably include a brief description of the reproductions pursuant to Rule 7(5)(a) describing the view or views of the reproductions. See [37 CFR 1.1024](#). The Office encourages applicants filing international design applications that designate the United States to include a brief description in the application describing the views of the reproductions, as such description is helpful for examination and may, in some cases, help avoid issues concerning the scope of the claimed design or sufficiency of disclosure. Furthermore, a description of the view or views of the reproductions may be required by the Office in

a nonprovisional international design application, as defined by [37 CFR 1.9\(a\)\(3\)](#), pursuant to [37 CFR 1.1067](#). See [MPEP § 2920.04\(a\)](#), subsection II. The brief description of the reproductions should be included in Item (10) “Description of the Reproductions (Legends) of the Industrial Designs” of the official application form (form DM/1). See [MPEP § 2909.01](#).

An international design application designating the United States may not contain a request for deferment of publication. See [37 CFR 1.1028](#). In addition, specimens are not permitted in international design applications designating the United States. See [37 CFR 1.1027](#).

2909.01 Official Form for the Application for International Registration [R-07.2022]

37 CFR 1.1022 Form and signature

(a) The international design application shall be presented on the official form (Rules 7(1) and 1(vi)).

(b) The international design application shall be signed by the applicant.

Hague Rule 7

Requirements Concerning the International Application

(1) [*Form and Signature*] The international application shall be presented on the official form. The international application shall be signed by the applicant.

Hague Rule 1

Definitions

(1) [*Abbreviated Expressions*] For the purposes of these Regulations,

(vi) “official form” means a form established by the International Bureau or an electronic interface made available by the International Bureau on the web site of the Organization, or any form or electronic interface having the same contents and format;

The international design application must be presented on the “official form.” Pursuant to Hague Agreement Rule 1(vi), “official form” means a form established by the International Bureau or an electronic interface made available by the International Bureau on the website of the Organization, or any form or electronic interface having the same contents and format. The form

established by the International Bureau for filing an international design application is the form DM/1, “Application for International Registration”. The DM/1 form and instructions for completing the form are currently available on the website of the International Bureau at www.wipo.int/hague/en/forms/. The electronic interface of the International Bureau’s electronic filing system, eHague, has the same contents and format as the DM/1 form.

Proper usage of the DM/1 form will help ensure that the mandatory, additional mandatory and optional content items for an international design application are present upon filing. Detailed instructions for completing the form are set forth in the section “How to Submit an International Application to the International Bureau” of the Hague Guide for Users available on WIPO’s website at www.wipo.int/hague/en/guide/ia.html. Form DM/1 includes specific spaces to set forth: (1) information concerning the applicant; (2) applicant’s entitlement to file an international design application; (3) applicant’s contracting party; (4) a correspondence address for the International Bureau where there are multiple applicants and no appointed representative; (5) appointment of a representative; (6) the number of industrial designs and reproductions included in the application; (7) designated Contracting Parties; (8) the applicable product and Locarno classification ([MPEP § 907](#)); (9) a description; (10) a description of the reproductions; (11) the identity of the creator; (12) a claim; (13) priority claim; (14) information regarding any international exhibition where any of the designs was shown; (15) exception to lack of novelty; (16) relation with a principle design; (17) a request for immediate or deferred publication; (18) reduction of the individual designation fee; and (19) the signature of the applicant or the applicant’s representative. The DM/1 form also includes a “Payment of Fees” section that allows the applicant to identify the method of payment and to instruct the International Bureau to debit the required fees to a current account established with the International Bureau.

2909.02 Reproductions (Drawings) [R-07.2022]

37 CFR 1.1026 Reproductions

Reproductions shall comply with the requirements of Rule 9 and Part Four of the Administrative Instructions.

Hague Rule 9

Reproductions of the Industrial Design

(1) [*Form and Number of Reproductions of the Industrial Design*]

(a) Reproductions of the industrial design shall, at the option of the applicant, be in the form of photographs or other graphic representations of the industrial design itself or of the product or products which constitute the industrial design. The same product may be shown from different angles; views from different angles shall be included in different photographs or other graphic representations.

(b) Any reproduction shall be submitted in the number of copies specified in the Administrative Instructions.

(2) [*Requirements Concerning Reproductions*]

(a) Reproductions shall be of a quality permitting all the details of the industrial design to be clearly distinguished and permitting publication.

(b) Matter which is shown in a reproduction but for which protection is not sought may be indicated as provided for in the Administrative Instructions.

(3) [*Views Required*]

(a) Subject to subparagraph (b), any Contracting Party bound by the 1999 Act which requires certain specified views of the product or products which constitute the industrial design or in relation to which the industrial design is to be used shall, in a declaration, so notify the Director General, specifying the views that are required and the circumstances in which they are required.

(b) No Contracting Party may require more than one view where the industrial design or product is two-dimensional, or more than six views where the product is three-dimensional.

(4) [*Refusal on Grounds Relating to the Reproductions of the Industrial Design*] A Contracting Party may not refuse the effects of the international registration on the ground that requirements relating to the form of the reproductions of the industrial design that are additional to, or different from, those notified by that Contracting Party in accordance with paragraph (3)(a) have not been satisfied under its law. A Contracting Party may however refuse the effects of the international registration on the ground that the reproductions contained in the international registration are not sufficient to disclose fully the industrial design.

Administrative instructions concerning reproductions contained in Part Four of the Administrative Instructions for the Application of the Hague Agreement ("Administrative Instructions") are set forth below:

Hague Administrative Instructions Section 401:

Presentation of Reproductions

(a) One and the same international application may comprise both photographs and other graphic representations, in black and white or in color.

(b) Each reproduction accompanying an international application shall be submitted in a single copy.

(c) The photographs or other graphic representations accompanying an international application filed on paper shall be either pasted or printed directly onto a separate sheet of A4 paper which is white and opaque. The separate sheet of paper shall be used upright and shall not contain more than 25 reproductions.

(d) The reproductions accompanying an international application must be arranged in the orientation in which the applicant wishes them to be published. Where that application is filed on paper, a margin of at least 5 millimeters should be left around the representation of each industrial design.

(e) Each reproduction must fall within a right-angled quadrilateral containing no other reproduction or part of another reproduction and no numbering. The photographs or other graphic representations shall not be folded, stapled or marked in any way.

Hague Administrative Instructions Section 402

Representation of the Industrial Design

(a) The photographs and other graphic representations shall represent the industrial design alone, or the product in relation to which the industrial design is to be used, to the exclusion of any other object, accessory, person or animal.

(b) The dimensions of the representation of each industrial design appearing in a photograph or other graphic representation may not exceed 16 x 16 centimeters, and in respect of at least one representation of each design, one of those dimensions must be at least 3 centimeters. With respect to the filing of international applications by electronic means, the International Bureau may establish a data format, the particulars of which shall be published on the web site of the Organization, to ensure compliance with these maximum and minimum dimensions.

(c) The following shall not be accepted:

(i) technical drawings, particularly with axes and dimensions;

(ii) explanatory text or legends in the representation.

Hague Administrative Instructions Section 403

Disclaimers and Matter That Does Not Form Part of the Industrial Design or the Product in Relation to Which the Industrial Design is to be Used

(a) Matter which is shown in a reproduction but for which protection is not sought may be indicated

(i) in the description referred to in Rule 7(5)(a) and/or

(ii) by means of dotted or broken lines or coloring.

(b) Notwithstanding Section 402(a), matter that does not form part of the industrial design or the product in relation to which the industrial design is to be used may be shown in a reproduction if it is indicated in accordance with paragraph (a).

***Hague Administrative Instructions Section 404
Requirements for Photographs and Other Graphic
Representations***

(a) The photographs supplied must be of professional standard and have all the edges cut at right angles. The industrial design must be shown against a neutral plain background. Photographs retouched with ink or correcting fluid shall not be allowed.

(b) Graphic representations must be of professional standard produced with drawing instruments or by electronic means and, where the application is filed on paper, must further be produced on good quality white, opaque paper, all of whose edges are cut at right angles. The industrial design represented may comprise shading and hatching to provide relief. Graphic representations executed by electronic means may be shown against a background, provided that it is neutral and plain and has only edges cut at right angles.

***Hague Administrative Instructions Section 405
Numbering of Reproductions and Legends***

(a) The numbering stipulated for multiple international applications shall appear in the margin of each photograph or other graphic representation. When the same industrial design is represented from different angles, the numbering shall consist of two separate figures separated by a dot (e.g., 1.1, 1.2, 1.3, etc. for the first design, 2.1, 2.2, 2.3, etc. for the second design, and so on).

(b) The reproductions shall be submitted in ascending numerical order.

(c) Legends to indicate a specific view of the product (e.g., “front view”, “top view”, etc.) may be indicated in association with the numbering of the reproduction.

Reproductions in international design applications must comply with the requirements of Hague Agreement Rule 9 and Part Four of the Administrative Instructions. See [37 CFR 1.1026](#).

Pursuant to Rule 9, the reproductions of the industrial design shall, at the option of the applicant, be in the form of photographs or other graphic representations of the industrial design itself or of the product or products which constitute the industrial design. The same product may be shown from different angles; views from different angles shall be included in different photographs or other graphic representations. Pursuant to Administrative Instruction 401, only a single copy of each reproduction should be submitted.

The reproductions must be of a quality permitting all the details of the industrial design to be clearly distinguished and permitting publication. See Rule 9(2). The reproductions should represent the industrial design alone, or the product in relation to

which the industrial design is to be used, without any other object, accessory, person, or animal. However, the reproduction may show matter for which protection is not sought if such matter is indicated as provided for in Administrative Instruction 403.

Pursuant to Rule 9(3)(a), a Contracting Party may require certain specified views of the product or products which constitute the industrial design or in relation to which the industrial design is to be used, if the Contracting Party has appropriately notified the International Bureau of the required views and the circumstances under which they are required. Information concerning specified views required by a Contracting Party pursuant to Rule 9(3)(a) is set forth in the section “Specific Views” of the Hague Guide for Users available at WIPO’s website at www.wipo.int/export/sites/www/hague/en/docs/hague-system-guide.pdf.

Additional formal requirements for the reproductions (e.g., margins, paper, backgrounds, etc.) are set forth in the Administrative Instructions. In addition, technical requirements regarding image files, such as resolution, minimum and maximum image size, border width, etc., are set forth on the website of the International Bureau at www.wipo.int/hague/en/hague_file_renew.html. Reproductions may be filed through the USPTO as an office of indirect filing via EFS-Web as PDF or JPEG files in accordance with the Legal Framework for Patent Electronic System. See [MPEP §§ 502.05 and 2909.02\(a\)](#).

Pursuant to Rule 9(4), a Contracting Party may refuse the effects of the international registration on the ground that the reproductions contained in the international registration are not sufficient to disclose fully the industrial design. To help minimize the risk of receiving a refusal on such grounds, the International Bureau has established guidance, in consultation with examining offices, to assist applicants in preparing reproductions to help avoid refusals by examining offices on grounds of insufficient disclosure of the design. See “Guidance on Preparing and Providing Reproductions in Order to Forestall Possible Refusals on the Ground of Insufficient Disclosure of an Industrial Design by Examining Offices” available at

www.wipo.int/export/sites/www/hague/en/docs/guidance.pdf.

2909.02(a) Reproductions Submitted Through EFS-Web [R-07.2022]

Reproductions of industrial designs are required in international design applications and may be submitted as drawings, photographs, or a combination thereof, and may be in black and white or in color. See Rule 9 and Part Four of the Administrative Instructions for the Application of the Hague Agreement. Reproductions may be submitted through EFS-Web as PDF or JPEG files as set forth below. Technical requirements regarding image files, such as resolution, minimum and maximum image size, border width, etc., are also set forth on the website of the International Bureau at www.wipo.int/hague/en/hague_file_renew.html.

Reproductions may be submitted as single page PDF or JPEG files by attaching the file(s) using the “Attach Reproductions” section of the “Attach Documents” screen. Alternatively, applicants may attach reproductions as PDFs (including multi-page PDFs) using the “Attach Documents other than Reproductions” section of the “Attach Documents” screen. Attaching compliant reproductions via the “Attach Reproductions” section, rather than the “Attach Documents other than Reproductions” section, may help to avoid incurring additional per page publication fees that might otherwise be required by the International Bureau. Each image file attached through the “Attach Reproductions” section should contain only one view of the design. The “Attach Reproductions” section will prompt the user to assign a design and view number to each file attached under this section.

In accordance with the technical requirements set forth by the International Bureau, EFS-Web will not permit submission of any PDF or JPEG file via the “Attach Reproductions” section that exceeds a file size of two megabytes. For JPEG submissions, EFS-Web will provide warnings where requirements pertaining to image resolution and minimum and maximum dimensions have not been satisfied; EFS-Web does not check color mode or border size for JPEG images. For PDF submissions via the “Attach Reproductions” section, EFS-Web will not

permit submission of any PDF file that is more than one page. In addition, EFS-Web does not check color mode, border size, resolution, or maximum or minimum dimensions of the reproduction (other than certain minimum and maximum page size dimensions) for PDF images. It is the responsibility of applicants to ensure that reproductions satisfy all applicable requirements.

Users attaching reproductions under either the “Attach Reproductions” section or the “Attach Documents other than Reproductions” section should use the document description “drawings – only black and white line drawings” or “drawing – other than black and white line drawings”, as appropriate. EFS-Web will provide a warning to users about the possibility of incurring additional per page publication fees where reproductions are attached via the “Attach Documents other than Reproductions” section. EFS-Web will also provide a warning to users where a new international design application does not contain an indication that at least one reproduction is attached. See [MPEP § 502.05](#) for additional information on using EFS-Web.

For further information concerning submitting reproductions through EFS-Web, filers may consult the *EFS-Web Quick Start Guide: International Design Application (Hague) for filing through the USPTO as an office of indirect filing* available at www.uspto.gov/sites/default/files/documents/Hague-OSG.pdf.

2909.03 Annexes [R-07.2022]

Annexes to the DM/1 form are used to provide certain required or optional items relevant to a particular designated Contracting Party. Annex forms (currently Annexes I-V) specific to particular Contracting Parties are available on the website of the International Bureau at www.wipo.int/hague/en/forms/.

Annexes specific to the designation of the United States include Annex I (for submitting the inventor’s oath or declaration), Annex III (for submitting an information disclosure statement), and Annex IV (for submitting a certification of micro entity status). Annex II (for submitting supporting documents

concerning a declaration to the exception to lack of novelty) and Annex V (for submitting a priority document) are specific to the designation of the Republic of Korea.

2910 International Design Application Fees [R-07.2022]

37 CFR 1.1031 International design application fees.

(a) International design applications filed through the Office as an office of indirect filing are subject to payment of a transmittal fee ([35 U.S.C. 382\(b\)](#)) and Article 4(2)) in the amount of:

By a micro entity (§ [1.29](#)).....\$30.00

By a small entity (§ [1.27\(a\)](#)).....60.00

By other than a small or micro entity.....120.00

(b) The Schedule of Fees annexed to the Regulations (Rule 27(1)), a list of individual designation fee amounts, and a fee calculator may be viewed on the Web site of the World Intellectual Property Organization, currently available at <http://www.wipo.int/hague>.

(c) The following fees required by the International Bureau may be paid either directly to the International Bureau or through the Office as an office of indirect filing in the amounts specified on the World Intellectual Property Organization Web site described in paragraph (b) of this section:

(1) International application fees (Rule 12(1)); and

(2) Fee for descriptions exceeding 100 words (Rule 11(2)).

(d) The fees referred to in paragraph (c) of this section may be paid as follows:

(1) Directly to the International Bureau in Swiss currency (see Administrative Instruction 801); or

(2) Through the Office as an office of indirect filing, provided such fees are paid no later than the date of payment of the transmittal fee required under paragraph (a) of this section. Any payment through the Office must be in U.S. dollars. Applicants paying the fees in paragraph (c) of this section through the Office may be subject to a requirement by the International Bureau to pay additional amounts where the conversion from U.S. dollars to Swiss currency results in the International Bureau receiving less than the prescribed amounts.

(e) Payment of the fees referred to in Article 17 and Rule 24 for renewing an international registration (“renewal fees”) is not required to maintain a U.S. patent issuing on an international design application in force. Renewal fees, if required, must be submitted directly to the International Bureau. Any renewal fee submitted to the Office will not be transmitted to the International Bureau.

(f) The designation fee for the United States shall consist of:

(1) A first part established in Swiss currency pursuant to Hague Rule 28 based on the combined amounts of the basic filing fee (§ [1.16\(b\)](#)), search fee (§ [1.16\(f\)](#)), and examination

fee (§ [1.16\(p\)](#)) for a design application. The first part is payable at the time of filing the international design application; and

(2) A second part (issue fee) as provided in § [1.18\(b\)](#). The second part is payable within the period specified in a notice of allowance (§ [1.311](#)).

Hague Rule 12

Fees Concerning the International Application

(1) [*Prescribed Fees*]

(a) The international application shall be subject to the payment of the following fees:

(i) a basic fee;

(ii) a standard designation fee in respect of each designated Contracting Party that has not made a declaration under Article 7(2) of the 1999 Act or under Rule 36(1), the level of which will depend on a declaration made under subparagraph (c);

(iii) an individual designation fee in respect of each designated Contracting Party that has made a declaration under Article 7(2) of the 1999 Act or under Rule 36(1);

(iv) a publication fee.

(b) The level of the standard designation fee referred to in subparagraph (a)(ii) shall be as follows:

(i) for Contracting Parties whose office does not carry out any examination on substantive ground:.....one

(ii) for Contracting Parties whose office carries out examination on substantive grounds, other than as to novelty:two

(iii) for Contracting Parties whose office carries out examination on substantive grounds, including examination as to novelty either ex officio or following opposition by third parties:three

(c)

(i) Any Contracting Party whose legislation entitles it to the application of level two or three under subparagraph (b) may, in a declaration, notify the Director General accordingly. A Contracting Party may also, in its declaration, specify that it opts for the application of level two, even if its legislation entitles it to the application of level three.

(ii) Any declaration made under item (i) shall take effect three months after its receipt by the Director General or at any later date indicated in the declaration. It may also be withdrawn at any time by notification addressed to the Director General, in which case such withdrawal shall take effect one month after its receipt by the Director General or at any later date indicated in the notification. In the absence of such a declaration, or where a declaration has been withdrawn, level one will be deemed to be the level applicable to the standard designation fee in respect of that Contracting Party.

(2) [*When Fees to Be Paid*] The fees referred to in paragraph (1) are, subject to paragraph (3), payable at the time of filing the international application, except that, where the international application contains a request for deferment of

publication, the publication fee may be paid later, in accordance with Rule 16(3)(a).

(3) [*Individual Designation Fee Payable in Two Parts*]

(a) A declaration under Article 7(2) of the 1999 Act or under Rule 36(1) may also specify that the individual designation fee to be paid in respect of the Contracting Party concerned comprises two parts, the first part to be paid at the time of filing the international application and the second part to be paid at a later date which is determined in accordance with the law of the Contracting Party concerned.

Pursuant to Hague Agreement Rule 12, an international design application is subject to the following fees: (1) basic fee; (2) publication fee(s); (3) designation fee(s); and (4) an additional word fee where the description exceeds 100 words. In addition, a transmittal fee is required for an international design application filed through the USPTO as an office of indirect filing.

The International Bureau provides an online fee calculator tool ("Hague System Fee Calculator") to help applicants quickly determine the amount of application fees that will be due (excluding any required transmittal fee). The calculator tool takes into account such factors as the number of designs and reproductions contained in the application and the Contracting Parties designated to determine the amount of the application fees that will be due in Swiss currency. The calculator tool is available at www.wipo.int/hague/en/fees/calculator.jsp.

I. TRANSMITTAL FEE

International design applications filed through the USPTO as an office of indirect filing are subject to payment of a transmittal fee. See [37 CFR 1.1031\(a\)](http://www.cfr.gov). Payment of the transmittal fee must be in U.S. dollars. The USPTO will not transmit the international design application to the International Bureau if the transmittal fee has not been paid. See [37 CFR 1.1045](http://www.cfr.gov). Applicants are cautioned that an international design application not received by the International Bureau within six months from the date the international design application is received by the USPTO will not be entitled to a filing date as of the date of receipt of the application by the USPTO. See Hague Agreement Rule 13.

The transmittal fee is discounted for small and micro entities. Payment, by any party, of the exact amount

of the small entity transmittal fee set forth in [37 CFR 1.1031\(a\)](http://www.cfr.gov) will be treated as a written assertion of entitlement to small entity status. See [37 CFR 1.27](http://www.cfr.gov) and [MPEP §§ 509.02](http://www.mpep.com) and [509.03](http://www.mpep.com) for requirements for establishing small entity status, and [37 CFR 1.29](http://www.cfr.gov) and [MPEP § 509.04](http://www.mpep.com) for requirements for establishing micro entity status.

II. BASIC FEE, PUBLICATION FEE(S), DESIGNATION FEE(S) AND ADDITIONAL WORD FEE

The amount of the basic fee (Rule 12(1)(i)) is set forth in the Schedule of Fees and is dependent upon the number of designs included in the international design application. The amount of the publication fee (Rule 12(1)(iv)) is also set forth in the Schedule of Fees and is dependent upon the number of reproductions to be published and the form in which the reproductions are submitted. The Schedule of Fees is currently available on the website of the International Bureau at www.wipo.int/hague/en/fees/sched.html.

A standard or individual designation fee applies with respect to each Contracting Party designated in an international design application. The standard designation fee (Rule 12(1)(ii)) applies with respect to the designation of any Contracting Party that has not specifically set an individual designation fee. The standard designation fee varies between levels 1-3, depending on the form of examination performed by each designated Contracting Party and on any specific agreement between such Contracting Party and the International Bureau. The standard designation fees are set forth in the Schedule of Fees.

The individual designation fee (Rule 12(1)(iii)) applies where an application designates a Contracting Parties that has made a declaration under Article 7(2) of the Hague Agreement setting an individual designation fee. Individual designation fees established pursuant to Article 7(2) are set forth on the website of the International Bureau at www.wipo.int/hague/en/fees/individ-fee.html.

The United States has made a declaration under Article 7(2) and requires an individual designation fee that is payable in a first part at filing and second part payable upon allowance of the application by

the USPTO. See [MPEP § 2903](#). The first part of the United States designation fee consists of the combined amounts of the basic filing fee ([37 CFR 1.16\(b\)](#)), search fee ([37 CFR 1.16\(d\)](#)), and examination fee ([37 CFR 1.16\(p\)](#)) for a design application, established in Swiss currency pursuant to Hague Agreement Rule 28. See [37 CFR 1.1031\(f\)\(1\)](#). The second part of the United States designation fee is the issue fee ([37 CFR 1.18\(b\)](#)), which is payable within the period specified in a notice of allowance. See [37 CFR 1.1031\(f\)\(2\)](#) and [MPEP § 2920.06](#). The first and second parts of the individual designation fee for the United States are discounted for small and micro entities. See [37 CFR 1.27](#) and [MPEP §§ 509.02](#) and [509.03](#) for requirements for establishing small entity status, and [37 CFR 1.29](#) and [MPEP § 509.04](#) for requirements for establishing micro entity status. With respect to international design applications, the payment by any party of the small entity first part of the individual designation fee for the United States to the International Bureau will be treated as a written assertion of entitlement to small entity status. See [37 CFR 1.27\(c\)\(3\)](#). In addition, a micro entity certification may be signed by a person authorized to represent the applicant in the international design application under [37 CFR 1.1041](#) before the International Bureau where the micro entity certification is filed with the International Bureau. See [37 CFR 1.29\(e\)](#).

An additional per word fee is also required where the description exceeds 100 words. This fee is based on the description set forth in Item 9 (“Description”) of the DM/1 form.

The Fee Calculation Sheet included with the DM/1 form also specifies the amounts of the basic fees, publication fees, designation fees, and the additional word fee where the description exceeds 100 words. Also included is a listing of the level of the standard designation fee applicable to respective Contracting Parties.

III. PAYMENT OF FEES THROUGH THE USPTO WHEN APPLICATION FILED THROUGH USPTO AS AN OFFICE OF INDIRECT FILING

Certain international fees payable to the International Bureau may be paid through the USPTO as an office

of indirect filing, provided such fees are paid no later than the date of payment of the transmittal fee. See [37 CFR 1.1031\(c\)](#). Applicants are not required to pay such fees through the USPTO but rather may pay such fees directly to the International Bureau. Furthermore, any payment of such fees through the USPTO must be in U.S. dollars. As all payments made to the International Bureau must be in Swiss currency, the U.S. dollar amount collected may, when converted to Swiss currency, be different than the required Swiss currency amount. Accordingly, applicants are cautioned that paying such international fees through the USPTO may still result in a requirement by the International Bureau to pay additional amounts where the conversion from U.S. dollars to Swiss currency results in the International Bureau receiving less than the prescribed amounts. Any payment in response to an invitation from the International Bureau requiring additional fees must be made directly to the International Bureau within the period set in the invitation to avoid abandonment of the application pursuant to Article 8 of the Hague Agreement. To avoid receiving an invitation from the International Bureau requiring additional fees, applicants may wish to consider including authorization in the fee payment section of the DM/1 form to allow the International Bureau to debit the required fees to a current account established with the International Bureau. See Administrative Instruction 801 and [MPEP § 2909.01](#).

Applicant may charge international design application fees to a USPTO deposit account when filing an international design application through the USPTO as an office of indirect filing. However, a general authorization to charge such fees will only be effective with respect to the transmittal fee required under [37 CFR 1.1031\(a\)](#). See [37 CFR 1.25](#). In addition, international design application fees may not be paid through the USPTO after the date of payment of the transmittal fee. See [37 CFR 1.1031\(c\)](#). Nor may any renewal fees referred to in Hague Agreement Rule 24 for renewing an international registration be paid through the USPTO. See [37 CFR 1.1031\(e\)](#).

2911 Representation [R-07.2022]

37 CFR 1.1041 Representation in an international design application.

(a) The applicant may appoint a representative before the International Bureau in accordance with Rule 3.

(b) Applicants of international design applications may be represented before the Office as an office of indirect filing by a practitioner registered (§ 11.6) or granted limited recognition (§§ 11.9(a) or (b)) to practice before the Office in patent matters. Such practitioner may act pursuant to § 1.34 or pursuant to appointment by the applicant. The appointment must be in writing signed by the applicant, must give the practitioner power to act on behalf of the applicant, and must specify the name and registration number or limited recognition number of each practitioner. An appointment of a representative made in the international design application pursuant to Rule 3(2) that complies with the requirements of this paragraph will be effective as an appointment before the Office as an office of indirect filing.

Hague Rule 3

Representation Before the International Bureau

(1) [*Representative; Number Representatives*]

(a) The applicant or the holder may have a representative before the International Bureau.

(b) Only one representative may be appointed in respect of a given international application or international registration. Where the appointment indicates several representatives, only the one indicated first shall be considered to be a representative and be recorded as such.

(c) Where a partnership or firm composed of attorneys or patent or trademark agents has been indicated as representative to the International Bureau, it shall be regarded as one representative.

(2) [*Appointment of the Representative*]

(a) The appointment of a representative may be made in the international application. The naming of the representative in the international application at the time of filing shall constitute an appointment by the applicant of such representative.

(b) The appointment of a representative may also be made in a separate communication which may relate to one or more specified international applications or international registrations of the same applicant or holder. The said communication shall be signed by the applicant or the holder.

(c) The communication to appoint a representative shall contain the name and address, given in accordance with the Administrative Instructions, and email address of the representative. Where the International Bureau considers that the appointment of a representative is irregular, it shall notify accordingly the applicant or holder and the purported representative.

Rule 3 of the Hague Agreement provides for the appointment by the applicant of a representative before the International Bureau. Rule 3 does not provide for any requirement as to professional qualification, nationality, or domicile regarding who may be appointed to represent the applicant before

the International Bureau. The appointment may be made in the international design application or in a separate communication. The communication appointing a representative must contain the name and address, given in accordance with the Administrative Instructions, and email address of the representative. The naming of the representative in the international application at the time of filing shall constitute an appointment of such representative. See Rule 3(2).

The International Bureau makes available forms for the appointment of a representative (form DM/7), requesting the recording of a change in name and/or address of the representative (form DM/8), and cancellation of recording of appointment of a representative (form DM/9). These forms are available at www.wipo.int/hague/en/forms/.

With respect to representation before the USPTO as an office of indirect filing, [37 CFR 1.1041\(b\)](#) provides that applicants of international design applications may be represented before the Office as an office of indirect filing by a practitioner registered ([37 CFR 11.6](#)) or granted limited recognition ([37 CFR 11.9\(a\)](#) or [\(b\)](#)) to practice before the Office ([37 CFR 11.6](#)). Such practitioner may act pursuant to [37 CFR 1.34](#) or pursuant to appointment by the applicant. The appointment must be in writing signed by the applicant, must give the practitioner power to act on behalf of the applicant, and must specify the name and registration number or limited recognition number of each practitioner. An appointment of a representative made in the international design application pursuant to Rule 3(2) that complies with the requirements of [37 CFR 1.1041\(b\)](#) will be effective as an appointment before the Office as an office of indirect filing. For purposes of representation before the Office during prosecution of an international design application that became a national application (see [37 CFR 1.9\(a\)\(1\)](#)), the regulations governing national applications shall apply. See [37 CFR 1.1061\(a\)](#).

2912 Correspondence in Respect of International Design Applications Filed With

the USPTO as an Office of Indirect Filing [R-07.2022]

37 CFR 1.1042 Correspondence respecting international design applications filed with the Office as an office of indirect filing.

The applicant may specify a correspondence address for correspondence sent by the Office as an office of indirect filing. Where no such address has been specified, the Office will use as the correspondence address the address of applicant's appointed representative (§ [1.1041](#)) or, where no representative is appointed, the address as specified in Administrative Instruction 302.

Pursuant to [37 CFR 1.1042](#), the applicant may specify a correspondence address for correspondence sent by the USPTO as an office of indirect filing. The official form (DM/1 form) used for filing an international design application includes items for specifying an address to be used for correspondence sent by the International Bureau. See [MPEP § 2909.01](#). Applicants may specify a different address than specified on the DM/1 form for the purpose of correspondence sent by the USPTO as an office of indirect filing. Where no such address has been specified, the Office will use as the correspondence address of applicant's appointed representative. See [37 CFR 1.1041](#). Where no correspondence information is included in the submission, or the correspondence information was not made in accordance with the applicable regulations, the Office may use application data furnished through EFS-Web for purposes of correspondence until corrected by the applicant. For example, the Office may use the correspondence address associated with a customer number entered through EFS-Web rather than an address furnished in an unsigned paper in the new application submission. See [MPEP § 502.05](#), subsection I.B.5.

2913 Relief from Prescribed Time Limits [R-07.2015]

35 U.S.C. 387 Relief from prescribed time limits.

An applicant's failure to act within prescribed time limits in connection with requirements pertaining to an international design application may be excused as to the United States upon a showing satisfactory to the Director of unintentional delay and under such conditions, including a requirement for payment of the fee specified in [section 41\(a\)\(7\)](#), as may be prescribed by the Director.

37 CFR 1.1051 Relief from prescribed time limits.

(a) If the delay in an applicant's failure to act within prescribed time limits under the Hague Agreement in connection with requirements pertaining to an international design application was unintentional, a petition may be filed pursuant to this section to excuse the failure to act as to the United States. A grantable petition pursuant to this section must be accompanied by:

(1) A copy of any invitation sent from the International Bureau setting a prescribed time limit for which applicant failed to timely act;

(2) The reply required under paragraph (c) of this section, unless previously filed;

(3) The fee as set forth in § [1.17\(m\)](#);

(4) A certified copy of the originally filed international design application, unless a copy of the international design application was previously communicated to the Office from the International Bureau or the international design application was filed with the Office as an office of indirect filing, and a translation thereof into the English language if it was filed in another language;

(5) A statement that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition pursuant to this paragraph was unintentional. The Director may require additional information where there is a question whether the delay was unintentional; and

(6) A terminal disclaimer (and fee as set forth in § [1.20\(d\)](#)) required pursuant to paragraph (d) of this section.

(b) Any request for reconsideration or review of a decision refusing to excuse the applicant's failure to act within prescribed time limits in connection with requirements pertaining to an international design application upon petition filed pursuant to this section, to be considered timely, must be filed within two months of the decision refusing to excuse or within such time as set in the decision. Unless a decision indicates otherwise, this time period may be extended under the provisions of § [1.136](#).

(c) *Reply.* The reply required may be:

(1) The filing of a continuing application. If the international design application has not been subject to international registration, the reply must also include a grantable petition under § [1.1023\(b\)](#) to accord the international design application a filing date; or

(2) A grantable petition under § [1.1052](#), where the international design application was filed with the Office as an office of indirect filing.

(d) *Terminal disclaimer.* Any petition pursuant to this section must be accompanied by a terminal disclaimer and fee as set forth in § [1.321](#) dedicating to the public a terminal part of the term of any patent granted thereon equivalent to the period beginning on the due date for the reply for which applicant failed to timely act and ending on the date of filing of the reply required under paragraph (c) of this section and must also apply to any patent granted on a continuing design application that contains a specific reference under [35 U.S.C. 120, 121, 365\(c\), or 386\(c\)](#) to the application for which relief under this section is sought.

Pursuant to [35 U.S.C. 387, 37 CFR 1.1051](#) sets forth a petition procedure to excuse, with respect to the

United States, an applicant's failure to act within prescribed time limits under the Hague Agreement in connection with requirements pertaining to an international design application where the delay in applicant's failure to act was unintentional. The petition must be accompanied by: (1) a copy of any invitation sent from the International Bureau setting a prescribed time limit for which applicant failed to timely act; (2) the reply required under [37 CFR 1.1051\(c\)](#), unless previously filed; (3) the fee as set forth in [37 CFR 1.17\(m\)](#); (4) a certified copy of the originally filed international design application, unless a copy of the international design application was previously communicated to the Office from the International Bureau or the international design application was filed with the USPTO as an office of indirect filing; (5) a statement that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition pursuant to this paragraph was unintentional; and (6) a terminal disclaimer (and fee as set forth in [37 CFR 1.20\(d\)](#)) required pursuant to [37 CFR 1.1051\(d\)](#). The Director may require additional information where there is a question whether the delay was unintentional.

Pursuant to [37 CFR 1.1051\(c\)](#), the "reply" required for a grantable petition under [37 CFR 1.1051\(a\)](#) may be: (1) the filing of a continuing application and, if the international design application has not been subject to international registration, a grantable petition under [37 CFR 1.1023\(b\)](#) to accord the international design application a filing date; or (2) a grantable petition under [37 CFR 1.1052](#), where the international design application was filed with the Office as an office of indirect filing. See [MPEP § 2914](#).

Pursuant to [37 CFR 1.1051\(d\)](#), any petition under [37 CFR 1.1051\(a\)](#) must be accompanied by a terminal disclaimer and fee as set forth in [37 CFR 1.321](#) dedicating to the public a terminal part of the term of any patent granted thereon equivalent to the period beginning on the due date for the reply for which applicant failed to timely act and ending on the date of filing of the reply required and must also apply to any patent granted on a continuing design application that contains a specific reference under [35 U.S.C. 120](#), [121](#), [365\(c\)](#), or [386\(c\)](#) to the

application for which relief under [37 CFR 1.1051](#) is sought.

Where a petition under [37 CFR 1.1051\(a\)](#) is refused by the Office, any request for reconsideration or review of the decision must be filed within two months of the decision or within such time as set in the decision. Unless the decision indicates otherwise, the two-month time period may be extended under the provisions of [37 CFR 1.136](#). See [37 CFR 1.1051\(b\)](#).

2914 Conversion of an International Design Application to a Design Application Under 35 U.S.C. Chapter 16 [R-07.2015]

35 U.S.C. 384 Filing date.

(a) IN GENERAL.—Subject to subsection (b), the filing date of an international design application in the United States shall be the effective registration date. Notwithstanding the provisions of this part, any international design application designating the United States that otherwise meets the requirements of chapter 16 may be treated as a design application under chapter 16.

(b) REVIEW.—An applicant may request review by the Director of the filing date of the international design application in the United States. The Director may determine that the filing date of the international design application in the United States is a date other than the effective registration date. The Director may establish procedures, including the payment of a surcharge, to review the filing date under this section. Such review may result in a determination that the application has a filing date in the United States other than the effective registration date.

37 CFR 1.1052 Conversion to a design application under 35 U.S.C. chapter 16.

(a) An international design application designating the United States filed with the Office as an office of indirect filing and meeting the requirements under § [1.53\(b\)](#) for a filing date for an application for a design patent may, on petition under this section, be converted to an application for a design patent under § [1.53\(b\)](#) and accorded a filing date as provided therein. A petition under this section must be accompanied by the fee set forth in § [1.17\(t\)](#) and be filed prior to publication of the international registration under Article 10(3). The conversion of an international design application to an application for a design patent under § [1.53\(b\)](#) will not entitle applicant to a refund of the transmittal fee or any fee forwarded to the International Bureau, or the application of any such fee toward the filing fee, or any other fee, for the application for a design patent under § [1.53\(b\)](#). The application for a design patent resulting from conversion of an international design application must also include the basic filing fee (§ [1.16\(b\)](#)), the search fee (§ [1.16\(l\)](#)), the examination fee (§ [1.16\(p\)](#)), the inventor's oath or declaration (§ [1.63](#) or [1.64](#)), and a surcharge if required by § [1.16\(f\)](#).

(b) An international design application will be converted to an application for a design patent under § [1.53\(b\)](#) if a decision on petition under this section is granted prior to transmittal of the international design application to the International Bureau pursuant to § [1.1045](#). Otherwise, a decision granting a petition under this section will be effective to convert the international design application to an application for a design patent under § [1.53\(b\)](#) only for purposes of the designation of the United States.

(c) A petition under this section will not be granted in an abandoned international design application absent a grantable petition under § [1.1051](#).

(d) An international design application converted under this section is subject to the regulations applicable to a design application filed under 35 U.S.C. chapter 16.

Pursuant to [35 U.S.C. 384\(a\)](#), “any international design application designating the United States that otherwise meets the requirements of chapter 16 may be treated as a design application under chapter 16.” [37 CFR 1.1052](#) sets forth a procedure for converting an international design application designating the United States to a design application under 35 U.S.C. chapter 16. The requirements for a filing date for a design application under 35 U.S.C. chapter 16 are set forth in [37 CFR 1.53\(b\)](#). [37 CFR 1.1052\(a\)](#) provides that an international design application designating the United States filed with the Office as an office of indirect filing and meeting the requirements under [37 CFR 1.53\(b\)](#) for a filing date for an application for a design patent may, on petition, be converted to an application for a design patent under [37 CFR 1.53\(b\)](#) and accorded a filing date as provided therein.

A grantable petition to convert under [37 CFR 1.1052\(a\)](#) must be accompanied by the fee set forth in [37 CFR 1.17\(t\)](#) and be filed prior to publication of the international registration under Article 10(3) of the Hague Agreement. The conversion of an international design application to an application for a design patent under [37 CFR 1.53\(b\)](#) will not entitle applicant to a refund of the transmittal fee or any fee forwarded to the International Bureau, and such fees will not be applied toward the filing fee, or any other fee, required for the application for a design patent under [37 CFR 1.53\(b\)](#). Conversion will not be granted unless the application for a design patent resulting from conversion of an international design application includes the applicable basic filing fee, search fee, examination fee, inventor’s oath or declaration, and any required surcharge. In addition, a petition to convert under [37 CFR 1.1052\(a\)](#) will not be granted in an abandoned application absent

a grantable petition for relief from prescribed time limits under [37 CFR 1.1051](#). See [37 CFR 1.1052\(c\)](#). An international design application converted under [37 CFR 1.1052](#) is subject to the regulations applicable to a design application filed under 35 U.S.C. chapter 16. See [37 CFR 1.1052\(d\)](#).

Pursuant to [37 CFR 1.1052\(b\)](#), if a decision granting a petition to convert under [37 CFR 1.1052\(a\)](#) is issued prior to transmittal of the international design application to the International Bureau under [37 CFR 1.1045](#), then the decision will be effective to convert the international design application to an application for a design patent under [37 CFR 1.53\(b\)](#) for all purposes. In such case, the application materials will not be communicated to the International Bureau, and the USPTO will treat the international design application submission as an application for a design patent filed under [37 CFR 1.53\(b\)](#). If, however, a decision granting a petition to convert under [37 CFR 1.1052\(a\)](#) is issued after the application materials have been communicated to the International Bureau under [37 CFR 1.1045](#), then the decision will only be effective as to the United States, and the International Bureau will continue to process the international design application under the provisions of the Hague Agreement. In such case, because the international design application will have been converted to an application for a design patent under [37 CFR 1.53\(b\)](#) with respect to the designation of the United States, the Office will, upon grant of the petition, treat the designation of the United States in the international design application as not being made.

2915-2919 [Reserved]

2920 National Processing of International Design Applications Designating the United States [R-07.2022]

35 U.S.C. 389 Examination of international design application.

(a) IN GENERAL.—The Director shall cause an examination to be made pursuant to this title of an international design application designating the United States.

(b) APPLICABILITY OF CHAPTER 16.—All questions of substance and, unless otherwise required by the treaty and Regulations, procedures regarding an international design

application designating the United States shall be determined as in the case of applications filed under chapter 16.

(c) FEES.—The Director may prescribe fees for filing international design applications, for designating the United States, and for any other processing, services, or materials relating to international design applications, and may provide for later payment of such fees, including surcharges for later submission of fees.

(d) ISSUANCE OF PATENT.—The Director may issue a patent based on an international design application designating the United States, in accordance with the provisions of this title. Such patent shall have the force and effect of a patent issued on an application filed under chapter 16.

37 CFR 1.9 Definitions.

(a)(1) A national application as used in this chapter means either a U.S. application for patent which was filed in the Office under [35 U.S.C. 111](#), an international application filed under the Patent Cooperation Treaty in which the basic national fee under [35 U.S.C. 41\(a\)\(1\)\(F\)](#) has been paid, or an international design application filed under the Hague Agreement in which the Office has received a copy of the international registration pursuant to Hague Agreement Article 10.

(3) A nonprovisional application as used in this chapter means either a U.S. national application for patent which was filed in the Office under [35 U.S.C. 111\(a\)](#), an international application filed under the Patent Cooperation Treaty in which the basic national fee under [35 U.S.C. 41\(a\)\(1\)\(F\)](#) has been paid, or an international design application filed under the Hague Agreement in which the Office has received a copy of the international registration pursuant to Hague Agreement Article 10.

Hague Article 10

International Registration, Date of the International Registration, Publication and Confidential Copies of the International Registration

(3) [Publication]

(a) The international registration shall be published by the International Bureau. Such publication shall be deemed in all Contracting Parties to be sufficient publicity, and no other publicity may be required of the holder.

(b) The International Bureau shall send a copy of the publication of the international registration to each designated Office.

Hague Article 14

Effects of the International Registration

(1) [*Effect as Application Under Applicable Law*] The international registration shall, from the date of the international registration, have at least the same effect in each designated Contracting Party as a regularly-filed application for the grant of protection of the industrial design under the law of that Contracting Party.

Hague Article 12

Refusal

(1) [*Right to Refuse*] The Office of any designated Contracting Party may, where the conditions for the grant of protection under the law of that Contracting Party are not met in respect of any or all of the industrial designs that are the subject of an international registration, refuse the effects, in part or in whole, of the international registration in the territory of the said Contracting Party, provided that no Office may refuse the effects, in part or in whole, of any international registration on the ground that requirements relating to the form or contents of the international application that are provided for in this Act or the Regulations or are additional to, or different from, those requirements have not been satisfied under the law of the Contracting Party concerned.

The Office will examine an international design application designating the United States pursuant to Title 35 United States Code. See [35 U.S.C. 389\(a\)](#). An applicant does not need to file any submissions with the Office to initiate examination of an international design application designating the United States. Rather, published international design registrations that designate the United States will be systematically received from the International Bureau pursuant to Hague Agreement Article 10(3) and examined in due course.

Upon receipt of the publication under Article 10(3), the Office will establish an application file for examination. Where the Office was also the office of indirect filing, the application file established as the office of indirect filing will be used as the application for examination, thus retaining the same application number. The Office will send a filing receipt to the applicant shortly after receipt of the publication under Article 10(3) indicating the U.S. application number, U.S. filing date, inventorship, applicant, and other relevant application data of record.

The U.S. application file will be made available to the public via Patent Center after publication under Article 10(3) of an international registration designating the United States. The U.S. application number corresponding to the international registration may be found by searching the international registration number using Patent Center. Prior to publication, access will only be provided in accordance with [37 CFR 1.14](#). See [37 CFR 1.14\(j\)](#).

Pursuant to [37 CFR 1.9\(a\)\(1\)](#), the term “national application” as used in the U.S. rules includes an international design application filed under the Hague Agreement in which the Office has received a copy of the international registration pursuant to Hague Agreement Article 10. Pursuant to [37 CFR 1.9\(a\)\(3\)](#), the term “nonprovisional application” as used in the U.S. rules includes an international design application filed under the Hague Agreement in which the Office has received a copy of the international registration pursuant to Hague Agreement Article 10. An international design application filed under the Hague Agreement in which the Office has received a copy of the international registration pursuant to Hague Agreement Article 10 is also referred to herein as a “nonprovisional international design application”.

2920.01 Inventorship [R-07.2022]

37 CFR 1.41 Inventorship.

(f) The inventorship of an international design application designating the United States is the creator or creators set forth in the publication of the international registration under Hague Agreement Article 10(3). Any correction of inventorship must be pursuant to [§ 1.48](#).

Pursuant to [37 CFR 1.41\(f\)](#), the inventorship of an international design application designating the United States is the creator or creators set forth in the publication of the international registration under Hague Agreement Article 10(3).

Inventorship may be corrected in accordance with the provisions of [37 CFR 1.48\(a\)](#). See [MPEP § 602.01\(c\)](#) *et seq.* for a detailed discussion of correction of inventorship, correcting or updating the name of an inventor, and adjusting the order of the names of joint inventors. Note that a request to correct the inventorship filed under [37 CFR 1.48\(a\)](#) should identify the inventorship change and must be accompanied by a signed application data sheet (ADS) including the legal name, residence, and mailing address of the inventor or each actual joint inventor (see [37 CFR 1.76\(b\)\(1\)](#)) and the processing fee set forth in [37 CFR 1.17\(i\)](#). The ADS submitted with a request under [37 CFR 1.48\(a\)](#) must identify the information being changed with underlining for insertions and strike-through or brackets for text removed. See [MPEP § 602.01\(c\)\(1\)](#). In addition, in

accordance with [37 CFR 1.48\(c\)](#), a request to correct or change the inventorship under [37 CFR 1.48\(a\)](#) filed after the Office action on the merits has been given or mailed in the application must also be accompanied by the fee set forth in [37 CFR 1.17\(d\)](#).

[37 CFR 1.48\(b\)](#) provides that an oath or declaration as required by [37 CFR 1.63](#), or a substitute statement in compliance with [37 CFR 1.64](#), will be required for any actual inventor who has not yet executed such an oath or declaration. Accordingly, where an inventor is added pursuant to [37 CFR 1.48\(a\)](#) after publication of the international registration, an executed oath or declaration from the inventor will be required. See [MPEP § 2920.04\(c\)](#).

The name of an inventor may be corrected or updated and the order of the names of the joint inventors may be adjusted in accordance with the provisions of [37 CFR 1.41\(f\)](#). [37 CFR 1.41\(f\)](#) specifically provides that any request to correct or update the name of the inventor or a joint inventor, or the order of the names of joint inventors, in a nonprovisional application must include: (1) an ADS in accordance with [37 CFR 1.76](#) that identifies each inventor by his or her legal name in the desired order (identifying the information that is being changed as required by [37 CFR 1.76\(c\)\(2\)](#)); and (2) the processing fee set forth in [37 CFR 1.17\(i\)](#). In addition to the corrected ADS, the request should also identify the desired inventor name change. See [MPEP § 602.01\(c\)\(2\)](#).

Under the laws of certain foreign countries, the creator may be a legal entity. Under U.S. national law, however, the inventor cannot be a juristic entity. Where a nonprovisional international design application identifies a juristic entity as an inventor, Form Paragraph 29.04 should be used to reject the claim under [35 U.S.C. 171](#) and [35 U.S.C. 115](#) for failing to set forth the correct inventorship:

¶ 29.04 Statement of Statutory Bases, Improper Inventorship in International Design Application

Requirements applicable to design applications under 35 U.S.C. chapter 16 apply to international design applications except as otherwise provided under 35 U.S.C. chapter 38. See [35 U.S.C. 382\(c\)](#), [383](#), and [389\(b\)](#).

[35 U.S.C. 171\(b\)](#) reads as follows:

(b) **APPLICABILITY OF THIS TITLE.**—The provisions of this title relating to patents for inventions shall apply to patents for designs, except as otherwise provided.

[35 U.S.C. 115\(a\)](#) reads as follows (in part):

An application for patent that is filed under section [111\(a\)](#) or commences the national stage under section [371](#) shall include, or be amended to include, the name of the inventor for any invention claimed in the application.

The present application sets forth incorrect inventorship because [1].

The claim is rejected under [35 U.S.C. 171](#) and [35 U.S.C. 115](#) for failing to set forth the correct inventorship for the reasons stated above.

Applicant may correct inventorship pursuant to [37 CFR 1.48\(a\)](#) by submitting to the USPTO a properly signed and marked-up application data sheet (ADS) identifying each inventor by his or her legal name and accompanied by the required processing fee ([37 CFR 1.17\(i\)](#)). Any request to correct or change the inventorship under [37 CFR 1.48\(a\)](#) filed after the Office action on the merits has been given or mailed in the application must also be accompanied by the fee set forth in [37 CFR 1.17\(d\)](#). A corrected application data sheet in compliance with [37 CFR 1.76\(c\)](#) must identify the information that is being changed, with underlining for insertions, and strike-through or brackets for text removed. In addition, an oath or declaration as required by [37 CFR 1.63](#), or a substitute statement in compliance with [37 CFR 1.64](#), will be required for any actual inventor who has not yet executed such an oath or declaration. See [37 CFR 1.48\(b\)](#). The ADS, inventor's declaration, and substitute statement forms are available on the website of the USPTO at www.uspto.gov/patent/forms/forms.

Examiner Note:

In bracket 1, insert the basis for concluding that the inventorship is incorrect (e.g., "under U.S. national law, the inventor cannot be a juristic entity").

2920.02 Applicant [R-07.2022]

The rules governing the applicant for patent set forth in [37 CFR 1.42-1.46](#) are generally applicable to nonprovisional international design applications. See [37 CFR 1.1061](#); see also [MPEP § 605.01](#) for a detailed discussion regarding the applicant for patent.

With respect to applicants under [37 CFR 1.46](#) (i.e., the assignee, the person to whom the inventor is under an obligation to assign the invention, or the person who otherwise shows sufficient proprietary interest in the matter), [37 CFR 1.46\(b\)](#) provides that if a nonprovisional international design application is applied for by a person other than the inventor

under [37 CFR 1.46\(a\)](#) (i.e., the assignee, person to whom the inventor is under an obligation to assign the invention, or person who otherwise shows sufficient proprietary interest in the matter), that person must have been identified as the applicant in the publication of the international registration under Hague Agreement Article 10(3). Thus, a [37 CFR 1.46](#) applicant identified as the applicant in the publication of the international registration is the applicant in the nonprovisional international design application.

Any request to change the applicant under [37 CFR 1.46](#) after an original applicant has been specified must include a corrected application data sheet (ADS) under [37 CFR 1.76](#) specifying the applicant in the applicant information section in accordance with [37 CFR 1.76\(c\)\(2\)](#) and must comply with [37 CFR 3.71](#) and [3.73](#). See [37 CFR 1.46\(c\)\(2\)](#). Thus, if there is a change of applicant under [37 CFR 1.46](#) (e.g., from the inventor to the assignee, or from one assignee to another assignee), the new applicant must establish its ownership of the application under [37 CFR 3.71\(b\)](#) and [3.73](#). See [MPEP § 605.01](#), subsection II.

Any request to correct or update the name of the applicant under [37 CFR 1.46](#) must include a corrected ADS under [37 CFR 1.76](#) specifying the correct or updated name of the applicant in the applicant information section. See [37 CFR 1.46\(c\)\(1\)](#). Thus, if there is no change in the applicant itself but just the applicant's name (due to a correction or name change), the applicant need only submit a corrected ADS specifying the correct or updated name in the applicant information section. Any corrected ADS must identify the information being changed with underlining for insertions and strike-through or brackets for text removed as required by [37 CFR 1.76\(c\)\(2\)](#).

A change in the name of the applicant under [37 CFR 1.46](#) recorded pursuant to Hague Agreement Article 16(1)(ii) may also be effective to change the name of the applicant in a nonprovisional international design application. See [37 CFR 1.46\(c\)\(1\)](#). The recording of the name change pursuant to Article 16(1)(ii) must have been made no later than payment of the issue fee. Hague Agreement Article 16(1)(ii) provides for recording in the International Register

by the International Bureau of a change in the name of the holder. Under Article 16(2), such recording has the same effect as if made in the office of each of the designated Contracting Parties. Thus, where the applicant under [37 CFR 1.46](#) in a nonprovisional international design application is the holder of the international registration, correction or update of the applicant's name may be made through the mechanism under Article 16(1)(ii).

2920.03 Correspondence Address [R-07.2015]

37 CFR 1.1066 Correspondence address for a nonprovisional international design application.

(a) Unless the correspondence address is changed in accordance with § [1.33\(a\)](#), the Office will use as the correspondence address in a nonprovisional international design application the address according to the following order:

- (1) The correspondence address under § [1.1042](#);
- (2) The address of applicant's representative identified in the publication of the international registration; and
- (3) The address of the applicant identified in the publication of the international registration.

(b) Reference in the rules to the correspondence address set forth in § [1.33\(a\)](#) shall be construed to include a reference to this section for a nonprovisional international design application.

[37 CFR 1.1066\(a\)](#) sets forth how the Office will establish the correspondence address for a nonprovisional international design application in the absence of a communication from the applicant changing the correspondence address. Specifically, [37 CFR 1.1066\(a\)](#) provides that, unless the correspondence address is changed in accordance with [37 CFR 1.33\(a\)](#) the Office will use as the correspondence address in a nonprovisional international design application the address according to the following order: (i) the correspondence address under [37 CFR 1.1042](#); (ii) the address of the applicant's representative identified in the publication of the international registration; and (iii) the address of the applicant identified in the publication of the international registration.

See [MPEP § 601.03\(a\)](#) for further information regarding changing the correspondence address in an application.

2920.04 Elements of a Nonprovisional International Design Application [R-07.2015]

2920.04(a) Specification [R-07.2022]

I. TITLE

37 CFR 1.1067 Title, description, and inventor's oath or declaration.

(a) The title of the design must designate the particular article. Where a nonprovisional international design application does not contain a title of the design, the Office may establish a title. No description, other than a reference to the drawing, is ordinarily required in a nonprovisional international design application.

The title of the design identifies the article in which the design is embodied by the name generally known and used by the public. In general, the practice set forth in [MPEP § 1503.01](#) with regard to titles in design applications filed under 35 U.S.C. chapter 16 applies to nonprovisional international design applications. Thus, for example, the title may be directed to the entire article embodying the design while the claimed design, as shown in the reproductions, or as shown and described, may be directed to only a portion of the article. However, the title may not be directed to less than the claimed design.

Pursuant to [35 U.S.C. 154\(a\)\(1\)](#), “[e]very patent shall contain a short title of the invention. . . .” In addition, the application's title of the invention is indicated on the official filing receipt and the bibliographic data sheet contained in the image file wrapper (IFW). The Hague Agreement, however, does not provide for application titles for international design applications. Nevertheless, applicants may provide an application title in a nonprovisional international design application by furnishing the title in an application data sheet in accordance with [37 CFR 1.76](#) or by amending the specification in accordance with [37 CFR 1.121](#) to include the application title. In the absence of an application title furnished by the applicant, the Office will establish a title by retrieving the first listed product indication appearing on the published international registration (INID code 54). See [37 CFR 1.1067\(a\)](#). The title established by the Office

will appear on the official filing receipt and/or bibliographic data sheet.

Since [37 CFR 1.1067](#) requires that the title must designate the particular article, and since the claim must be in formal terms to the ornamental design for the article (specifying name) as shown, or as shown and described, the title and claim must correspond (i.e., the article named in the title must correspond to the article named in the claim). See [37 CFR 1.1025](#) and [MPEP § 1503.01](#), subsection I. When the article named in the title furnished by the applicant and the article named in the claim do not correspond, the examiner should object to the inconsistency under [37 CFR 1.1067](#) and require correction. Form paragraph 29.59.02 may be used if amendment of a title is necessary for consistency with the claim. When the applicant has furnished the title, applicant approval of an examiner's amendment thereto is required. See [MPEP § 1302.04](#). When the Office has established the title, applicant approval of an examiner's amendment thereto is not required.

Any amendment to the language of the title should also be made at each occurrence of the language of the title throughout the application, except in the oath or declaration. If the article named in the title is not present in the original figure descriptions, it is not necessary to incorporate the article into the figure descriptions as part of any amendment to the language of the title. Product indications required under Article 5(1)(iv) of the Hague Agreement (see [MPEP § 2909](#)) set forth in the specification may differ from the article named in the title and in the claim, as product indications “shall preferably be identified by using terms” appearing in the Locarno classification. See Rule 7(3)(iv). The form paragraphs below may be used in nonprovisional international design applications as appropriate.

¶ 15.05.01 Title of Design Invention

The title of a design must designate the name of the article in which the design is embodied or applied to. In addition, the title must correspond with the claim. See [MPEP § 1503.01](#) and [37 CFR 1.153](#) or [MPEP § 2920.04\(a\)](#) and [37 CFR 1.1067](#).

¶ 15.59 Amend Title

For [1], the title, and each occurrence of the language of the title, [2] amended throughout the application, original oath or declaration excepted, to read: [3]

Examiner Note:

1. In bracket 1, insert reason.
2. In bracket 2, insert --should be-- or --has been--.
3. When the applicant has furnished the application title, applicant's authorization is required to make an examiner's amendment to the application title. See [MPEP § 1302.04](#). Where the changes are made by examiner's amendment, this form paragraph should be preceded by form paragraphs 13.02 and 13.02.01. If an extension of time is required, use form paragraph 13.02.02 instead of form paragraphs 13.02 and 13.02.01.

¶ 29.59.01 Amend Title Except for Product Indication

For [1], the title, and each occurrence of the language of the title, [2] amended throughout the application, except for the Design No./Product(s) section and original oath or declaration, to read: [3]

Examiner Note:

1. This form paragraph is only to be used in a nonprovisional international design application.
2. This form paragraph may be used where the product indication does not correspond to the article named in the title but is identified by terms appearing in the Locarno classification. Where the title, and each occurrence of the language of the title, is to be amended through the entire application, including the product indication (e.g., when the product indication corresponds to the article named in the title), use form paragraph 15.59 instead.
3. In bracket 1, insert reason.
4. In bracket 2, insert --should be-- or --has been--.
5. When the applicant has furnished the application title, applicant's authorization is required to make an examiner's amendment to the application title. See [MPEP §§ 1302.04](#) and [2920.04\(a\)](#). Where the changes are made by examiner's amendment, this form paragraph should be preceded by form paragraphs 13.02 and 13.02.01. If an extension of time is required, use form paragraph 13.02.02 instead of form paragraphs 13.02 and 13.02.01.

¶ 29.59.02 Amend Application Title to Correspond to the Claim

For consistency with the claim, the title of the application has been amended to read: [1]

Examiner Note:

1. This form paragraph is only to be used in a nonprovisional international design application.
2. This form paragraph may be used in an Examiner's Amendment where the application title (the title appearing in the Bib Data Sheet) is being amended to correspond to the claim (i.e., the article named in the application title is being amended to correspond to the article named in the claim).
3. When the applicant has furnished the application title, applicant's authorization is required to make an examiner's amendment to the application title, and this form paragraph should be preceded by form paragraphs 13.02 and 13.02.01. See [MPEP §§ 1302.04](#) and [2920.04\(a\)](#). If an extension of time is

required, use form paragraph 13.02.02 instead of form paragraphs 13.02 and 13.02.01.

4. When the Office has established the application title, applicant's authorization is not required to make an examiner's amendment to the application title, and this form paragraph should be preceded by form paragraph 13.02.

II. DESCRIPTION

37 CFR 1.1067 Title, description, and inventor's oath or declaration.

(a) The title of the design must designate the particular article. Where a nonprovisional international design application does not contain a title of the design, the Office may establish a title. No description, other than a reference to the drawing, is ordinarily required in a nonprovisional international design application.

No description of the design in the specification beyond a brief description of the drawing is generally necessary, since as a rule the illustration in the drawing views is its own best description. *In re Freeman*, 23 App. D.C. 226 (App. D.C. 1904). However, while not required, such a description is not prohibited and may be incorporated into the specification. Descriptions of the figures are not required to be written in any particular format, however, if they do not describe the views of the drawing clearly and accurately, the examiner should object to the unclear and/or inaccurate descriptions and suggest language which provides a clear and accurate description of the views.

Applicants are cautioned against using "reference view" as a figure description in international design applications designating the United States. While "reference view" is commonly used in some foreign countries as a figure description, this term does not have any special meaning in U.S. practice. Accordingly, the reference view will be treated as another view of the design, and any inconsistencies between the reference view and the other figures of the claimed design may cause uncertainty as to the scope of the claim, resulting in a rejection under [35 U.S.C. 112\(a\)](#) and [\(b\)](#), as nonenabling and indefinite. A reference view described in the description as not included in the claimed design may result in uncertainty as the scope of the design claimed where the reference view includes features of the claimed design shown in the other views.

In addition to the figure descriptions, statements that are permissible in the specification of a design application filed under 35 U.S.C. chapter 16 are permissible in the specification of a nonprovisional international design application. See [MPEP § 1503.01](#), subsection II for a list of such permissible statements. This includes, for example, statements indicating the nature and environmental use of the claimed design, and statements indicating the purpose of broken lines in the drawing, for example, environmental structure or boundaries that form no part of the design to be patented. In addition, Administrative Instruction 403 permits matter shown in a reproduction for which protection is not sought to be indicated in the description and/or by means of broken or dotted lines or coloring. Accordingly, the specification may include statements explaining that protection is not sought for certain features shown in the reproduction, or that protection is not sought for matter shown in a specified color in the reproduction. When protection is not sought for portions of subject matter shown in a reproduction, applicants are strongly encouraged to indicate such subject matter by means of broken lines (or coloring) **and** include a statement in the specification explaining the meaning of the broken lines (or coloring). See [MPEP § 2920.05\(c\)](#).

The specification of a nonprovisional international design application is not permitted to include statements describing matters that are directed to function or are unrelated to the design. In addition, the specification may not include statements that describe or suggest other embodiments of the claimed design which are not illustrated in the drawing disclosure, except one that is a mirror image of that shown or has a shape and appearance that would be evident from the one shown. However, such statements may be included in the design application as originally filed to provide antecedent basis for a future amendment. In addition, statements which attempt to broaden the scope of the claimed design beyond that which is shown in the drawings are not permitted.

The form paragraphs set forth in [MPEP § 1503.01](#), subsection II, pertaining to the description may be used in nonprovisional international design applications. In addition, the following form paragraphs may be used to amend the specification

by examiner's amendment to include figure descriptions and/or a description of broken lines or coloring, as appropriate:

¶ 29.60.02 Objection to Specification - Missing Figure Descriptions

The specification is objected to under [37 CFR 1.1067](#) for failing to provide figure descriptions. The description should indicate the type of view shown in the corresponding figure, such as "front view," "perspective view," "top view," etc.

Examiner Note:

If some, but not all, figure descriptions are missing, the examiner should indicate which descriptions are missing, e.g. "Descriptions for Figures [add numbers of figures without a corresponding description] have not been provided."

¶ 29.22 Description of Broken Lines Added by Examiner's Amendment (International Design Application)

The following sentence has been added to the specification immediately preceding the claim:

--The broken line showing of [1] is for the purpose of illustrating [2] and forms no part of the claimed design.--

Examiner Note:

1. This form paragraph should only be used in an international design application in an Examiner's Amendment for explaining the meaning of the broken lines.
2. In bracket 1, insert name of structure.
3. In bracket 2, insert --portions of the "article"-- or --environmental structure--.
4. Applicant's authorization is required. This form paragraph should be preceded by form paragraphs 13.02 and 13.02.01 where an extension of time is not necessary. If an extension of time is needed, form paragraph 13.02.02 should be used instead of form paragraphs 13.02 and 13.02.01.

¶ 29.24 Description of Broken Lines as Boundary of Design Added by Examiner's Amendment (International Design Application)

The following sentence has been added to the specification immediately preceding the claim:

--The [1] broken line(s) define the bounds of the claimed design and form no part thereof.--

Examiner Note:

1. This form paragraph should only be used in an international design application in an Examiner's Amendment for explaining the meaning of the broken line(s).
2. In bracket 1, insert type of broken line, e.g. dashed or dot-dash or dot-dot-dash.
3. Applicant's authorization is required. This form paragraph should be preceded by form paragraphs 13.02 and 13.02.01

where an extension of time is not necessary. If an extension of time is needed, form paragraph 13.02.02 should be used instead of form paragraphs 13.02 and 13.02.01.

¶ 29.26 Description of Coloring Added by Examiner's Amendment (International Design Application)

The following sentence has been added to the specification immediately preceding the claim:

--The portion of the design shown in the color [1] is for the purpose of illustrating [2] and forms no part of the claimed design.--

Examiner Note:

1. This form paragraph should only be used in an international design application in an Examiner's Amendment for explaining the meaning of color used in the reproductions.
2. In bracket 1, identify the color indicating the matter excluded from the claim.
3. In bracket 2, insert --portions of the "article"-- or --environmental structure--.
4. Applicant's authorization is required. This form paragraph should be preceded by form paragraphs 13.02 and 13.02.01 where an extension of time is not necessary. If an extension of time is needed, form paragraph 13.02.02 should be used instead of form paragraphs 13.02 and 13.02.01.

Where the application contains at least one color drawing or color photograph, the examiner should not require the applicant to amend the specification to add a reference to the color drawing or photograph. Instead, the examiner may amend the specification by Examiner's Amendment to indicate the presence of the color drawing or photograph using the form paragraph below. The applicant's authorization is not required.

¶ 29.61.01 At-least-one-color-drawing Statement

The application contains at least one color drawing or color photograph. The specification has been amended to include the following language as the first paragraph of the brief description of the drawings section:

-- The file of this patent contains at least one drawing/photograph executed in color. Copies of this patent with color drawing(s)/photograph(s) will be provided by the Office upon request and payment of the necessary fee. --

Examiner Note:

This form paragraph is only for use in an Examiner's Amendment in international design applications. Authorization for this Examiner's Amendment is not required.

III. CLAIM

37 CFR 1.1025 The claim.

The specific wording of the claim in an international design application designating the United States shall be in formal terms to the ornamental design for the article (specifying name of article) as shown, or as shown and described. More than one claim is neither required nor permitted for purposes of the United States.

The form and content of a claim in a nonprovisional international design application is set forth in [37 CFR 1.1025](#).

A design patent application may only include a single claim. The specific wording of the claim must be in formal terms to the ornamental design for the article (the article which embodies the design or to which it is applied) as shown, or as shown and described. The description of the article in the claim should be consistent in terminology with the title of the invention. See [MPEP § 2920.04\(a\)](#), subsection I.

When the specification includes a proper descriptive statement of the design (see [MPEP § 2920.04\(a\)](#), subsection II), or a proper showing of modified forms of the design or other descriptive matter has been included in the specification, the words “and described” must be added to the claim following the term “shown”; i.e., the claim must read “The ornamental design for (the article which embodies the design or to which it is applied) as shown and described.” Unless the claim was amended by the applicant pursuant to [37 CFR 1.121](#), the examiner should not object to the claim as to matters of form but rather should amend the claim by examiner’s amendment to include the words “and described.”

Form paragraphs 15.62, 15.63 and 15.64 may be used in international design applications as appropriate.

¶ 15.62 Amend Claim “As Shown”

For proper form ([37 CFR 1.153](#) or [37 CFR 1.1025](#)), the claim [1] amended to read: “[2] claim: The ornamental design for [3] as shown.”

Examiner Note:

1. In bracket 1, insert --must be-- or --has been--.
2. In bracket 2, insert --I-- or --We--.

3. In bracket 3, insert title of the article in which the design is embodied or applied.

¶ 15.63 Amend Claim “As Shown and Described”

For proper form ([37 CFR 1.153](#) or [37 CFR 1.1025](#)), the claim [1] amended to read: “[2] claim: The ornamental design for [3] as shown and described.”

Examiner Note:

1. In bracket 1, insert --must be-- or --has been--.
2. In bracket 2, insert --I-- or --We--.
3. In bracket 3, insert title of the article in which the design is embodied or applied.

¶ 15.64 Addition of “And Described” to Claim

Because of [1] -- and described -- [2] added to the claim after “shown.”

Examiner Note:

1. In bracket 1, insert reason.
2. In bracket 2, insert --must be-- or --has been--.

2920.04(b) Reproductions (Drawing Figures) [R-07.2022]

37 CFR 1.1026 Reproductions.

Reproductions shall comply with the requirements of Rule 9 and Part Four of the Administrative Instructions.

Every nonprovisional international design application must include a reproduction of the claimed design. A reproduction may be either a drawing, in black and white or in color, or a photograph of the industrial design. As the drawing or photograph constitutes the entire visual disclosure of the claim, it is of utmost importance that the drawing or photograph be a clear and complete depiction of the design applied to the article designated in the title, and that nothing regarding the design sought to be patented is left to conjecture.

Formal requirements for reproductions applicable to nonprovisional international design applications are set forth in Hague Agreement Rule 9 and Part Four of the Administrative Instructions. See [37 CFR 1.1026](#). Hague Agreement Rule 9 and the relevant provisions of the Administrative Instructions are reproduced in [MPEP § 2909.02](#). Drawing requirements set forth in [37 CFR 1.84](#) do not apply to nonprovisional international design applications, except for those set forth in [37 CFR 1.84\(c\)](#). See [37 CFR 1.1061\(b\)](#).

Figure numbering requirements for international design applications are different from figure numbering requirements for design applications filed under 35 U.S.C. chapter 16. Pursuant to Administrative Instruction 405, “[w]hen the same industrial design is represented from different angles, the numbering shall consist of two separate figures separated by a dot (e.g., 1.1, 1.2, 1.3, etc. for the first design, 2.1, 2.2, 2.3, etc. for the second design, and so on).” The figure numbering appearing in the published international registration should be preserved during prosecution of the nonprovisional international design application before the USPTO. If designs are cancelled, for example, as a result of a restriction requirement, applicants should not renumber the figures of the remaining design(s).

Reproductions published as part of the international registration have been reviewed by the International Bureau for compliance with the formal requirements of Hague Agreement Rule 9 and Part Four of the Administrative Instructions and thus should not be objected to by the examiner on such grounds. See Hague Agreement Article 12(1). Amended reproductions that are submitted directly to the Office pursuant to [37 CFR 1.121](#) are not subject to review by the International Bureau and thus may be objected to under [37 CFR 1.1026](#) as to matters of form where appropriate. Form Paragraph 29.10 may be used to object to amended reproductions that fail to comply with the formal requirements of Hague Agreement Rule 9 and Part Four of the Administrative Instructions.

¶ 29.10 Reproductions Objected to, Amended Reproductions Do Not Comply With Formal Requirements

The amended reproductions received on [1] are objected to because [2]. See [37 CFR 1.1026](#).

Examiner Note:

1. Use this form paragraph in an international design application to object to amended reproductions that fail to comply with the formal requirements for reproductions set forth in Rule 9 of the Common Regulations Under the 1999 Act and the 1960 Act of the Hague Agreement and Part Four of the Administrative Instructions thereunder. Do not use this form paragraph to object to reproductions that were contained in the international registration published by the International Bureau.
2. In bracket 1, insert the date the amended reproductions were received.
3. In bracket 2, insert the reason for the objection, for example, --the reproductions are not of a quality permitting all the details

of the industrial design to be clearly distinguished-- or --the reproductions contain explanatory text or legends--.

4. Follow this form paragraph with form paragraph 15.05.04.

When inconsistencies are found among the views, the examiner should object to the reproductions and request that the views be made consistent. Pursuant to Hague Agreement Rule 9(4), “[a] Contracting Party may however refuse the effects of the international registration on the ground that the reproductions contained in the international registration are not sufficient to disclose fully the industrial design.” When the inconsistencies are of such magnitude that the overall appearance of the design is unclear, the claim should be rejected under [35 U.S.C. 112\(a\)](#) and [\(b\)](#), as nonenabling and indefinite. See [MPEP § 1504.04](#), subsection I.

¶ 29.11 Reproductions Objected to, Design Not Fully Disclosed in Reproductions

The reproductions are objected to for failing to fully disclose the industrial design because [1]. See [37 CFR 1.1026](#) and Rule 9 of the Common Regulations Under the 1999 Act and the 1960 Act of the Hague Agreement.

Examiner Note:

1. Use this form paragraph in an international design application where the reproductions are not sufficient to fully disclose the industrial design, but such failure does not render the claimed invention non-enabled and/or indefinite under [35 U.S.C. 112](#). This may occur, for example, where there are minor inconsistencies in the illustration of the design among the different views of the design. Where the failure to fully disclose the industrial design in the reproductions renders the claimed invention non-enabled and/or indefinite under [35 U.S.C. 112](#), use form paragraph 15.21 or 15.22, as appropriate, instead of this form paragraph.
2. In bracket 1, explain why the reproductions are not sufficient to fully disclose the industrial design.
3. Follow this form paragraph with form paragraph 15.05.04.

The practice set forth in [MPEP § 1503.02](#), subsections I-IV with respect to views, surface shading, broken lines, and surface treatment is generally applicable to nonprovisional international design applications.

In addition to the use of broken or dotted lines to indicate matter shown in a reproduction for which protection is not sought, Administrative Instruction 403 permits such matter to be indicated in the description and/or by coloring. See [MPEP § 2920.05\(c\)](#) regarding considerations under [35 U.S.C. 112](#) when indicating matter pursuant to

Administrative Instruction 403. Form paragraph 29.20 may be used in an international design application as appropriate.

¶ 29.20 Matter Not Forming Part of Design (International Design Application)

Matter, such as environmental structure or portions of the "article," which is shown in a reproduction but for which protection is not sought may be indicated by statement in the description and/or by means of dotted or broken lines or coloring in the reproduction. See [37 CFR 1.1026](#) and Hague Agreement Administrative Instruction 403.

Examiner Note:

Use this form paragraph only in an international design application.

2920.04(c) Inventor's Oath or Declaration [R-07.2015]

37 CFR 1.1021 Contents of the international design application.

(d) Required contents where the United States is designated. In addition to the mandatory requirements set forth in paragraph (a) of this section, an international design application that designates the United States shall contain or be accompanied by:

(3) The inventor's oath or declaration (§§ [1.63](#) and [1.64](#)). The requirements in §§ [1.63\(b\)](#) and [1.64\(b\)\(4\)](#) to identify each inventor by his or her legal name, mailing address, and residence, if an inventor lives at a location which is different from the mailing address, and the requirement in § [1.64\(b\)\(2\)](#) to identify the residence and mailing address of the person signing the substitute statement will be considered satisfied by the presentation of such information in the international design application prior to international registration.

37 CFR 1.1067 Title, description, and inventor's oath or declaration.

(b) An international design application designating the United States must include the inventor's oath or declaration. See § [1.1021\(d\)](#). If the applicant is notified in a notice of allowability that an oath or declaration in compliance with § [1.63](#), or substitute statement in compliance with § [1.64](#), executed by or with respect to each named inventor has not been filed, the applicant must file each required oath or declaration in compliance with § [1.63](#), or substitute statement in compliance with § [1.64](#), no later than the date on which the issue fee is paid to avoid abandonment. This time period is not extendable under § [1.136](#) (see § [1.136\(c\)](#)).

International design applications designating the United States are required to contain the inventor's oath or declaration ([37 CFR 1.63](#) and [1.64](#)). See [37](#)

[CFR 1.1021\(d\)\(3\)](#). The International Bureau reviews international design applications designating the United States to ensure that the required inventor's oath or declaration is provided for the inventors identified in the international design application. The inventor's oath or declaration is communicated by the International Bureau to the Office when the published international registration is sent to the Office pursuant to Hague Agreement Article 10(3).

Section [1.1067\(b\)](#) provides for notifying the applicant in a notice of allowability of a requirement to provide the inventor's oath or declaration. As compliance with the requirement for the inventor's oath or declaration will have been reviewed by the International Bureau, the need to notify the applicant in a notice of allowability that an inventor's oath or declaration is required should be rare, e.g., where an inventor is added pursuant to [37 CFR 1.48\(a\)](#) after publication of the international registration and an executed oath or declaration from the inventor has not been received. See [37 CFR 1.48\(b\)](#).

2920.05 Examination [R-07.2015]

35 U.S.C. 389 Examination of international design application.

(a) IN GENERAL.—The Director shall cause an examination to be made pursuant to this title of an international design application designating the United States.

(b) APPLICABILITY OF CHAPTER 16.—All questions of substance and, unless otherwise required by the treaty and Regulations, procedures regarding an international design application designating the United States shall be determined as in the case of applications filed under chapter 16.

(c) FEES.—The Director may prescribe fees for filing international design applications, for designating the United States, and for any other processing, services, or materials relating to international design applications, and may provide for later payment of such fees, including surcharges for later submission of fees.

(d) ISSUANCE OF PATENT.—The Director may issue a patent based on an international design application designating the United States, in accordance with the provisions of this title. Such patent shall have the force and effect of a patent issued on an application filed under chapter 16.

37 CFR 1.1062 Examination.

(a) *Examination.* The Office shall make an examination pursuant to title 35, United States Code, of an international design application designating the United States.

(b) *Timing.* For each international design application to be examined under paragraph (a) of this section, the Office shall, subject to Rule 18(1)(c)(ii), send to the International Bureau

within 12 months from the publication of the international registration under Rule 26(3) a notification of refusal (§ [1.1063](#)) where it appears that the applicant is not entitled to a patent under the law with respect to any industrial design that is the subject of the international registration.

37 CFR 1.1063 Notification of Refusal.

(a) A notification of refusal shall contain or indicate:

- (1) The number of the international registration;
- (2) The grounds on which the refusal is based;
- (3) A copy of a reproduction of the earlier industrial design and information concerning the earlier industrial design, where the grounds of refusal refer to similarity with an industrial design that is the subject of an earlier application or registration;

(4) Where the refusal does not relate to all the industrial designs that are the subject of the international registration, those to which it relates or does not relate; and

(5) A time period for reply under §§ [1.134](#) and [1.136](#), where a reply to the notification of refusal is required.

(b) Any reply to the notification of refusal must be filed directly with the Office and not through the International Bureau. The requirements of § [1.111](#) shall apply to a reply to a notification of refusal.

International design applications designating the United States are examined pursuant to title 35, United States Code. All questions of substance and, unless otherwise required by the Hague Agreement or Regulations thereunder, procedures regarding an international design application designating the United States shall be determined as in the case of design applications filed under 35 U.S.C. chapter 16. See [35 U.S.C. 389](#). Accordingly, the practices set forth in [MPEP §§ 1504.01](#) (Statutory Subject Matter for Designs), [1504.02](#) (Novelty), [1504.03](#) (Nonobviousness), [1504.04](#) (Considerations Under 35 U.S.C. 112), [1504.05](#) (Restriction), and [1504.06](#) (Double Patenting) are generally applicable to international design applications designating the United States.

While there is substantial overlap in examining practices with respect to international design applications designating the United States and design applications filed under 35 U.S.C. chapter 16, there are also differences. These differences include:

(1) the Office sends a Notification of Refusal to the International Bureau for forwarding to the holder of the international registration where it is determined that the conditions for the grant of a patent are not met in respect of any or all designs that are the subject of international registration;

(2) upon issuance of a patent, the Office sends a statement of grant of protection to the International Bureau indicating that protection is granted in the United States to those designs that are the subject of the international registration and covered by the patent.

Regulations concerning international design applications are set forth in 37 CFR Part 1, subpart I.

**2920.05(a) Notification of Refusal
[R-07.2022]**

Hague Article 12

Refusal

(2) [*Notification of Refusal*]

(a) The refusal of the effects of an international registration shall be communicated by the Office to the International Bureau in a notification of refusal within the prescribed period.

(b) Any notification of refusal shall state all the grounds on which the refusal is based.

Hague Rule 18

Notification of Refusal

(1) [*Period for Notification of Refusal*]

(a) The prescribed period for the notification of refusal of the effects of an international registration in accordance with Article 12(2) of the 1999 Act or Article 8(1) of the 1960 Act shall be six months from the publication of the international registration as provided for by Rule 26(3).

(b) Notwithstanding subparagraph (a), any Contracting Party whose Office is an Examining Office, or whose law provides for the possibility of opposition to the grant of protection, may, in a declaration, notify the Director General that, where it is designated under the 1999 Act, the period of six months referred to in that subparagraph shall be replaced by a period of 12 months.

(c) The declaration referred to in subparagraph (b) may also state that the international registration shall produce the effect referred to in Article 14(2)(a) of the 1999 Act at the latest

(i) at a time specified in the declaration which may be later than the date referred to in that Article but which shall not be more than six months after the said date or

(ii) at a time at which protection is granted according to the law of the Contracting Party where a decision regarding the grant of protection was unintentionally not communicated within the period applicable under subparagraph (a) or (b); in such a case, the Office of the Contracting Party concerned shall notify the International Bureau accordingly and endeavor to communicate such decision to the holder of the international registration concerned promptly thereafter.

(2) [*Notification of Refusal*]

(a) The notification of any refusal shall relate to one international registration, shall be dated and shall be signed by the Office making the notification.

(b) The notification shall contain or indicate

(i) the Office making the notification,

(ii) the number of the international registration,

(iii) all the grounds on which the refusal is based together with a reference to the corresponding essential provisions of the law,

(iv) where the grounds on which the refusal is based refer to similarity with an industrial design which has been the subject of an earlier national, regional or international application or registration, the filing date and number, the priority date (if any), the registration date and number (if available), a copy of a reproduction of the earlier industrial design (if that reproduction is accessible to the public) and the name and address of the owner of the said industrial design, as provided for in the Administrative Instructions,

(v) where the refusal does not relate to all the industrial designs that are the subject of the international registration, those to which it relates or does not relate,

(vi) whether the refusal may be subject to review or appeal and, if so, the time limit, reasonable under the circumstances, for any request for review of, or appeal against, the refusal and the authority to which such request for review or appeal shall lie, with the indication, where applicable, that the request for review or the appeal has to be filed through the intermediary of a representative whose address is within the territory of the Contracting Party whose Office has pronounced the refusal, and (vii) the date on which the refusal was pronounced.

37 CFR 1.1063 Notification of Refusal.

(a) A notification of refusal shall contain or indicate:

(1) The number of the international registration;

(2) The grounds on which the refusal is based;

(3) A copy of a reproduction of the earlier industrial design and information concerning the earlier industrial design, where the grounds of refusal refer to similarity with an industrial design that is the subject of an earlier application or registration;

(4) Where the refusal does not relate to all the industrial designs that are the subject of the international registration, those to which it relates or does not relate; and

(5) A time period for reply under §§ [1.134](#) and [1.136](#), where a reply to the notification of refusal is required.

(b) Any reply to the notification of refusal must be filed directly with the Office and not through the International Bureau. The requirements of § [1.111](#) shall apply to a reply to a notification of refusal.

Under Article 12 of the Hague Agreement, “[t]he Office of any designated Contracting Party may, where the conditions for the grant of protection under

the law of that Contracting Party are not met in respect of any or all of the industrial designs that are the subject of an international registration, refuse the effects, in part or in whole, of the international registration in the territory of the said Contracting Party, provided that no Office may refuse the effects, in part or in whole, of any international registration on the ground that requirements relating to the form or contents of the international design application that are provided for in this Act or the Regulations or are additional to, or different from, those requirements have not been satisfied under the law of the Contracting Party concerned.” This refusal of the effects of an international registration is called a “notification of refusal.” See Article 12(2). The notification of refusal is transmitted to the International Bureau who, without delay, transmits a copy of the notification to the holder of the international registration. Hague Agreement Rule 18 prescribes a time period for sending of the notification of refusal and the content of the notification.

In accordance with [37 CFR 1.1062\(b\)](#), a notification of refusal is to be sent to the International Bureau within 12 months from the publication of the international registration where it appears that the applicant is not entitled to a patent under the law of the United States with respect to any industrial design that is the subject of the international registration. The notification of refusal may be sent after this 12-month period where the failure to send the notification within the 12-month period was unintentional.

The notification of refusal contains or indicates: (1) the number of the international registration; (2) the grounds on which the refusal is based; (3) a copy of a reproduction of the earlier industrial design and information concerning the earlier industrial design, where the grounds of refusal refer to similarity with an industrial design that is the subject of an earlier application or registration; (4) where the refusal does not relate to all the industrial designs that are the subject of the international registration, those to which it relates or does not relate; and (5) a time period for reply under [37 CFR 1.134](#) and [1.136](#) where a reply to the notification of refusal is required. See [37 CFR 1.1063\(a\)](#).

The grounds of refusal may be in the form of a rejection based on a condition for patentability under title 35, United States Code (e.g., [35 U.S.C. 171](#), [102](#), [103](#), or [112](#)), a requirement for restriction (where more than one independent and distinct design is presented in the application), and/or an objection (where not prohibited by Article 12(1) of the Hague Agreement). The grounds of refusal may also be based on applicant's action taken prior to examination, including cancellation of industrial designs in the international design application by amendment, or by an express abandonment of the application pursuant to [37 CFR 1.138](#) or the renunciation of the designation of the United States (see [MPEP § 2930](#)).

Objections based on requirements relating to the form or content of the application provided for in the Hague Agreement and Regulations thereunder are not prohibited by Article 12(1) where the International Bureau is not responsible for verifying compliance with such requirements. Such may arise, for example, where the applicant submits amended drawings directly to the Office in the course of examination that fail to comply with the formal requirements applicable to reproductions under Hague Agreement Rule 9 and Part Four of the Administrative Instructions. Nor does Article 12(1) prohibit objections based on inconsistencies among the views of the reproductions or incorrect or inaccurate statements contained in the description.

As in the case of Office actions in design applications filed under 35 U.S.C. chapter 16, copies of references cited by the examiner should be included with the notification of refusal. In addition, because Hague Agreement Rule 18(2)(b)(iv) does not distinguish references used in a ground of refusal based on where the reference originated from, the examiner should also include any U.S. patent or U.S. patent application publication used in a grounds of refusal (e.g., a rejection under [35 U.S.C. 102](#) or [103](#)). See [37 CFR 1.1063\(a\)\(3\)](#). Copies of references cited by the applicant in an information disclosure statement do not need to be included with the notification of refusal.

The notification of refusal should include a time period for reply under [37 CFR 1.134](#) and [1.136](#) to avoid abandonment where a reply to the notification

of refusal is required. This time period will normally be made in the Office Action Summary, Form PTOL-326, accompanying a Notification of Refusal cover sheet, Form PTO-2319. Not all notifications of refusal will require a reply. For example, where the international registration contains multiple industrial designs and all but one design is cancelled by preliminary amendment prior to examination, and the remaining design is determined by the examiner to be allowable, then a notice of allowance will be sent concurrently with a notification of refusal, refusing the effects of the international registration in the United States with respect to the industrial design or designs that have been cancelled. Such a notification of refusal, otherwise known as a "Notification of Partial Refusal," (Form PTO-2321) will be communicated to the International Bureau but will not set a time period for reply to the notification of refusal, as no reply to the refusal is required.

The Hague system does not require any submission from the applicant to the USPTO to initiate examination of a nonprovisional international design application. In many cases the applicant will not have retained the services of an attorney or agent registered to practice before the USPTO ("patent practitioner") prior to receipt of the notification of refusal. Where there is no patent practitioner of record, the examiner should include the following form paragraph in the refusal to remind applicants of the signature requirements applicable to a reply to a notification of refusal:

¶ 29.100 Reply Reminder

Applicant is reminded that any reply to this communication must be signed either by a patent practitioner (i.e., a patent attorney or agent registered to practice before the United States Patent and Trademark Office) or by the applicant. If the applicant is a juristic entity, the reply must be signed by a patent practitioner. See [37 CFR 1.33\(b\)](#).

Examiner Note:

Add this paragraph at the end of a notification of refusal or other Office action where a patent attorney or agent registered to practice before the United States Patent and Trademark Office has not been appointed as applicant's representative. If this paragraph was included in a prior Office action, it may be, but is not required to be, included in a subsequent Office action.

In addition, the following form paragraph may be included in the notification of refusal to provide

information to applicants regarding who may discuss the merits of the application with the examiner:

¶ 29.101 Discussion of the Merits of the Application

All discussions between the applicant and the examiner regarding the merits of a pending application will be considered an interview and are to be made of record. See [MPEP § 713](#). The examiner will not discuss the merits of the application with applicant's representative if the representative is not registered to practice before the USPTO. Appointment as applicant's representative before the International Bureau pursuant to Rule 3 of the Common Regulations under the Hague Agreement does **NOT** entitle such representative to represent the applicant before the USPTO. Furthermore, an applicant that is a juristic entity **must** be represented by a patent attorney or agent registered to practice before the USPTO. Additional information regarding interviews is set forth below.

Telephonic or in person interviews

A telephonic or in person interview may only be conducted with an attorney or agent registered to practice before the USPTO ("registered practitioner") or with a *pro se* applicant (an applicant who is the inventor and who is not represented by a registered practitioner).

The registered practitioner may either be of record or not of record. To become "of record," a power of attorney (POA) in accordance with [37 CFR 1.32](#) must be filed in the application. Form PTO/AIA/80 "Power of Attorney to Prosecute Applications Before the USPTO," available at www.uspto.gov/patent/forms/forms-patent-applications-filed-or-after-september-16-2012, may be used for this purpose. See [MPEP § 402.02\(a\)](#) for further information. Interviews may also be conducted with a registered practitioner not of record provided the registered practitioner can show authorization to conduct an interview by completing, signing and filing an "Applicant Initiated Interview Request Form" (PTOL-413A) (available at the USPTO web page indicated above). See [MPEP § 405](#). For acceptable ways to submit forms to the USPTO, see "When Responding to Official USPTO Correspondence" below.

Examiner Note:

Add this paragraph at the end of the Refusal where a patent attorney or agent registered to practice before the United States Patent and Trademark Office has not been appointed as applicant's representative.

Any reply to the notification of refusal must be filed directly with the Office and not through the International Bureau. See [37 CFR 1.1063\(b\)](#). A reply to the notification of refusal is subject to the requirements of [37 CFR 1.111](#).

Any further Office action following the notification of refusal, such as a Final Rejection, will normally be sent directly to the applicant.

2920.05(b) One Independent and Distinct Design [R-07.2022]

Hague Article 13

Special Requirements Concerning Unity of Design

(1) [*Notification of Special Requirements*] Any Contracting Party whose law, at the time it becomes party to this Act, requires that designs that are the subject of the same application conform to a requirement of unity of design, unity of production or unity of use, or belong to the same set or composition of items, or that only one independent and distinct design may be claimed in a single application, may, in a declaration, notify the Director General accordingly. However, no such declaration shall affect the right of an applicant to include two or more industrial designs in an international application in accordance with Article 5(4), even if the application designates the Contracting Party that has made the declaration.

(2) [*Effect of Declaration*] Any such declaration shall enable the Office of the Contracting Party that has made it to refuse the effects of the international registration pursuant to Article 12(1) pending compliance with the requirement notified by that Contracting Party.

37 CFR 1.1064 One independent and distinct design.

(a) Only one independent and distinct design may be claimed in a nonprovisional international design application.

(b) If the requirements under paragraph (a) of this section are not satisfied, the examiner shall in the notification of refusal or other Office action require the applicant in the reply to that action to elect one independent and distinct design for which prosecution on the merits shall be restricted. Such requirement will normally be made before any action on the merits but may be made at any time before the final action. Review of any such requirement is provided under §§ [1.143](#) and [1.144](#).

Only one independent and distinct design may be claimed in a nonprovisional international design application. See [37 CFR 1.1064](#). Under Article 13 of the Hague Agreement, a Contracting Party whose law at the time it becomes party to the Hague Agreement requires, inter alia, that only one independent and distinct design may be claimed in a single application, can refuse the effects of the international registration on grounds of noncompliance with such requirement. U.S. law requires that only one independent and distinct design may be claimed in a single application. See *In re Rubinfield*, 270 F.2d 391 (CCPA 1959); *In re Platner*, 155 USPQ 222 (Comm'r Pat. 1967); [MPEP § 1504.05](#). The practice set forth in [MPEP § 1504.05](#) is generally applicable to nonprovisional international design applications. If more than one independent and distinct design is claimed in the nonprovisional international design application, the

examiner should in the notification of refusal or other Office action require the applicant in the reply to that action to elect one independent and distinct design for which prosecution on the merits shall be restricted. The requirement should normally be made before any action on the merits but may be made at any time before the final action. Review of any such requirement is provided under [37 CFR 1.143](#) and [1.144](#).

Renumbering of the figures following cancellation of non-elected embodiments is not required. See [MPEP § 2920.04\(b\)](#). In addition, applicants should consider the need to correct inventorship under [37 CFR 1.48](#) as a result of a restriction requirement and further note that correction of inventorship after an Office action on the merits is subject to an additional fee under [37 CFR 1.48\(c\)](#). See [MPEP § 602.01\(c\)\(1\)](#). Examiners should use FP 29.102 to remind applicants that renumbering of the drawing figures following cancellation of non-elected embodiments is not required and to consider the need to correct inventorship due to the cancellation of non-elected designs.

¶ 29.102 Reply Reminder for Restriction Requirements Concerning Figure Numbering

In replying to this Refusal electing a Group for prosecution, applicant should also consider amending the application to cancel the drawing figures and remove the description corresponding to the nonelected Group(s), and to correct inventorship, as appropriate, resulting from such amendment pursuant to [37 CFR 1.48](#). See [MPEP § 602.01\(c\)\(1\)](#). Applicant should note that correcting inventorship after an Office action on the merits has been given or mailed in the application will require an additional fee pursuant to [37 CFR 1.48\(c\)](#).

Renumbering of the drawing figures is not required. To maintain consistency with the published International Registration, it is recommended that the numbering of the drawing figures included in the elected Group not be changed even if non-elected embodiments are cancelled. Any amendment to the drawing figures should comply with [37 CFR 1.1026](#) and Part Four of the Administrative Instructions (in particular, see Section 405 of the Administrative Instructions with respect to numbering of reproductions).

Examiner Note:

Add this paragraph at the end of a restriction requirement in a nonprovisional international design application. If there is no patent practitioner of record, also include form paragraph 29.100 Reply Reminder.

Protection of designs cancelled from a nonprovisional international design application as a result of a restriction requirement may be pursued through the filing of a divisional application(s). Such a divisional application may be filed either as a design application under 35 U.S.C. chapter 16 or as an international design application designating the United States. For further information regarding divisional applications, see [MPEP § 2920.05\(e\)](#).

2920.05(c) Considerations Under 35 U.S.C. 112 [R-07.2015]

The requirements of [35 U.S.C. 112\(a\)](#) and [\(b\)](#) apply to nonprovisional international design applications. See [35 U.S.C. 389](#). Accordingly, the practice set forth in [MPEP § 1504.04](#) regarding considerations under [35 U.S.C. 112](#) is generally applicable to nonprovisional international design applications. This section addresses certain additional considerations relevant to international design applications.

As discussed in [MPEP § 2920.04\(b\)](#), Administrative Instruction 403 allows matter shown in a reproduction for which protection is not sought to be indicated “(i) in the description referred to in Rule 7(5)(a) and/or (ii) by means of dotted or broken lines or coloring.” When using broken or dotted lines or coloring in a reproduction to indicate matter shown in a reproduction for which protection is not sought, applicants are encouraged to include an explanation of the purpose of the broken or dotted lines or coloring in the description. This may help to avoid uncertainty as to the scope of the claimed design. Similarly, applicants are encouraged not to simply rely on a description to indicate matter shown in a reproduction for which protection is not sought, but rather to also identify the matter for which protection is not sought through the use of broken or dotted lines or coloring.

The following form paragraphs may be used where the presence of undescribed broken lines or color renders the scope of the claimed design unclear.

¶ 29.21 Rejection, 35 U.S.C. 112(b) - Undescribed Broken Lines (International Design Application)

The claim is rejected for failing to particularly point out and distinctly claim the invention as required in [35 U.S.C. 112\(b\)](#).

The claim is indefinite because the reproductions include, in figure(s) [1], broken lines that are not described in the specification, and the scope of the claimed design cannot be determined.

If the broken line(s) represent portions of the article or environmental structure for which protection is not sought, applicant may overcome this rejection by inserting a statement similar to the following into the specification immediately preceding the claim, provided such statement does not introduce new matter (see [35 U.S.C. 132](#)):

--The broken line showing of [2] is for the purpose of illustrating [3] and forms no part of the claimed design.--

Examiner Note:

1. Use this form paragraph in an international design application where the reproductions include broken lines that are not described in the specification, and the scope of the claimed design cannot be determined.
2. In bracket 1, insert the number(s) of the figure(s) containing the broken lines.
3. In bracket 2, insert name of structure.
4. In bracket 3, insert --portions of the "article"-- or --environmental structure--.

¶ 29.23 Rejection, 35 U.S.C. 112(b) - Undescribed Broken Lines as Boundary of Design (International Design Application)

The claim is rejected for failing to particularly point out and distinctly claim the invention as required in [35 U.S.C. 112\(b\)](#). The claim is indefinite because the reproductions include, in figure(s) [1], broken lines that are not described in the specification, and the scope of the claimed design cannot be determined.

If the broken lines represent a boundary line for which protection is not sought, applicant may overcome this rejection by inserting a statement similar to the following into the specification immediately preceding the claim, provided such statement does not introduce new matter (see [35 U.S.C. 132](#)):

--The [2] broken line(s) define the bounds of the claimed design and form no part thereof.--

Examiner Note:

1. Use this form paragraph in an international design application where the reproductions include broken lines that are not described in the specification, and the scope of the claimed design cannot be determined.
2. In bracket 1, insert the number(s) of the figure(s) containing the broken lines.
3. In bracket 2, insert type of broken line, e.g. dashed or dot-dash or dot-dot-dash.

¶ 29.25 Rejection, 35 U.S.C. 112(b) - Unclear Use of Coloring (International Design Application)

The claim is rejected for failing to particularly point out and distinctly claim the invention as required in [35 U.S.C. 112\(b\)](#). The claim is indefinite because the reproductions include coloring, in figure(s) [1], that is not described in the specification, and the scope of the claimed design cannot be determined.

If the coloring identifies matter for which protection is not sought, applicant may overcome this rejection by inserting a statement similar to the following into the specification immediately preceding the claim, provided such statement does not introduce new matter (see [35 U.S.C. 132](#)):

--The portion of the design shown in the color [2] is for the purpose of illustrating [3] and forms no part of the claimed design.--

Examiner Note:

1. Use this form paragraph in an international design application where the reproductions include coloring that is not described in the specification, and the scope of the claimed design cannot be determined.
2. In bracket 1, insert the number(s) of the figure(s) containing the coloring.
3. In bracket 2, identify the color indicating the matter excluded from the claim.
4. In bracket 3, insert --portions of the "article"-- or --environmental structure--.

Similar to the use of form paragraph 15.20.02 in design applications filed under 35 U.S.C. chapter 16, form paragraph 29.27 may be used in an international design application to suggest how a rejection under [35 U.S.C. 112\(a\)](#) and [\(b\)](#) as nonenabling and indefinite due to an insufficient drawing disclosure may be overcome.

¶ 29.27 Suggestion To Overcome Rejection Under 35 U.S.C. 112(a) and (b) (International Design Application)

Applicant may indicate that protection is not sought for those portions of the reproductions which are considered indefinite and nonenabling in the rejection under [35 U.S.C. 112](#) above by amending the reproductions to color those portions or convert those portions to broken lines and by amending the specification to include a statement that the portions of the [1] shown in broken lines form no part of the claimed design or a statement that the portions of the [1] shown by coloring form no part of the claimed design provided such amendments do not introduce new matter (see [35 U.S.C. 132](#), [37 CFR 1.121](#)).

Examiner Note:

Use this form paragraph only in an international design application.

2. In bracket 1, insert title of the article.

2920.05(d) Foreign Priority [R-07.2022]

35 U.S.C. 386 Right of priority.

(a) NATIONAL APPLICATION.—In accordance with the conditions and requirements of subsections (a) through (d) of [section 119](#) and [section 172](#), a national application shall be entitled to the right of priority based on a prior international design application that designated at least 1 country other than the United States.

(b) PRIOR FOREIGN APPLICATION.—In accordance with the conditions and requirements of subsections (a) through (d) of [section 119](#) and [section 172](#) and the treaty and the Regulations, an international design application designating the United States shall be entitled to the right of priority based on a prior foreign application, a prior international application as defined in [section 351\(c\)](#) designating at least 1 country other than the United States, or a prior international design application designating at least 1 country other than the United States.

37 CFR 1.55 Claim for foreign priority.

(a) *In general.* An applicant in a nonprovisional application may claim priority to one or more prior foreign applications under the conditions specified in [35 U.S.C. 119\(a\) through \(d\) and \(f\)](#), [172](#), [365\(a\) and \(b\)](#), and [35 U.S.C. 386\(a\) or \(b\)](#) and this section.

(b) *Time for filing subsequent application.* The nonprovisional application must be:

(1) Filed not later than twelve months (six months in the case of a design application) after the date on which the foreign application was filed, subject to paragraph (c) of this section (a subsequent application); or

(2) Entitled to claim the benefit under [35 U.S.C. 120](#), [121](#), [365\(c\)](#), or [386\(c\)](#) of a subsequent application that was filed within the period set forth in paragraph (b)(1) of this section.

(c) *Delayed filing of subsequent application.* If the subsequent application has a filing date which is after the expiration of the period set forth in paragraph (b)(1) of this section, but within two months from the expiration of the period set forth in paragraph (b)(1) of this section, the right of priority in the subsequent application may be restored under [PCT Rule 26 bis.3](#) for an international application, or upon petition pursuant to this paragraph, if the delay in filing the subsequent application within the period set forth in paragraph (b)(1) of this section was unintentional. A petition to restore the right of priority under this paragraph filed on or after May 13, 2015, must be filed in the subsequent application, or in the earliest nonprovisional application claiming benefit under [35 U.S.C. 120](#), [121](#), [365\(c\)](#), or [386\(c\)](#) to the subsequent application, if such subsequent application is not a nonprovisional application. Any petition to restore the right of priority under this paragraph must include:

(1) The priority claim under [35 U.S.C. 119\(a\) through \(d\) or \(f\)](#), [365\(a\) or \(b\)](#), or [386\(a\) or \(b\)](#) in an application data sheet (§ [1.76\(b\)\(6\)](#)), identifying the foreign application to which priority is claimed, by specifying the application number, country (or intellectual property authority), day, month, and year of its filing, unless previously submitted;

(2) The petition fee as set forth in § [1.17\(m\)](#); and

(3) A statement that the delay in filing the subsequent application within the period set forth in paragraph (b)(1) of this section was unintentional. The Director may require additional information where there is a question whether the delay was unintentional.

(d) *Time for filing priority claim—*

(1) *Application under [35 U.S.C. 111\(a\)](#).* The claim for priority must be filed within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior foreign application in an original application filed under [35 U.S.C. 111\(a\)](#), except as provided in paragraph (e) of this section. The claim for priority must be presented in an application data sheet (§ [1.76\(b\)\(6\)](#)) and must identify the foreign application to which priority is claimed by specifying the application number, country (or intellectual property authority), day, month, and year of its filing. The time periods in this paragraph do not apply if the later-filed application is:

(i) An application for a design patent; or

(ii) An application filed under [35 U.S.C. 111\(a\)](#) before November 29, 2000.

(2) *Application under [35 U.S.C. 371](#).* The claim for priority must be made within the time limit set forth in the PCT and the Regulations under the PCT in an international application entering the national stage under [35 U.S.C. 371](#), except as provided in paragraph (e) of this section.

(e) *Delayed priority claim.* Unless such claim is accepted in accordance with the provisions of this paragraph, any claim for priority under [35 U.S.C. 119\(a\) through \(d\) or \(f\)](#), [365\(a\) or \(b\)](#), or [35 U.S.C. 386\(a\) or \(b\)](#) not presented in the manner required by paragraph (d) or (m) of this section during pendency and within the time period provided by paragraph (d) of this section (if applicable) is considered to have been waived. If a claim for priority is considered to have been waived under this section, the claim may be accepted if the priority claim was unintentionally delayed. A petition to accept a delayed claim for priority under [35 U.S.C. 119\(a\)-\(d\) or \(f\)](#), [365\(a\) or \(b\)](#), or [386\(a\) or \(b\)](#) must be accompanied by:

(1) The priority claim under [35 U.S.C. 119\(a\) through \(d\) or \(f\)](#), [365\(a\) or \(b\)](#), or [386\(a\) or \(b\)](#) in an application data sheet (§ [1.76\(b\)\(6\)](#)), identifying the foreign application to which priority is claimed, by specifying the application number, country (or intellectual property authority), day, month, and year of its filing, unless previously submitted;

(2) A certified copy of the foreign application, unless previously submitted or an exception in paragraph (h), (i), or (j) of this section applies;

(3) The petition fee as set forth in § [1.17\(m\)](#); and

(4) A statement that the entire delay between the date the priority claim was due under this section and the date the priority claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional.

(f) *Time for filing certified copy of foreign application—*

(1) *Application under 35 U.S.C. 111(a).* A certified copy of the foreign application must be filed within the later of four months from the actual filing date of the application, or sixteen months from the filing date of the prior foreign application, in an original application under [35 U.S.C. 111\(a\)](#) filed on or after March 16, 2013, except as provided in paragraphs (h), (i), and (j) of this section. The time period in this paragraph does not apply in a design application.

(2) *Application under 35 U.S.C. 371.* A certified copy of the foreign application must be filed within the time limit set forth in the PCT and the Regulations under the PCT in an international application entering the national stage under [35 U.S.C. 371](#). If a certified copy of the foreign application is not filed during the international stage in an international application in which the national stage commenced on or after December 18, 2013, a certified copy of the foreign application must be filed within the later of four months from the date on which the national stage commenced under [35 U.S.C. 371\(b\)](#) or (f) ([§ 1.491\(a\)](#)), four months from the date of the initial submission under [35 U.S.C. 371](#) to enter the national stage, or sixteen months from the filing date of the prior foreign application, except as provided in paragraphs (h), (i), and (j) of this section.

(3) If a certified copy of the foreign application is not filed within the time period specified [in] paragraph (f)(1) of this section in an application under [35 U.S.C. 111\(a\)](#) or within the period specified in paragraph (f)(2) of this section in an international application entering the national stage under [35 U.S.C. 371](#), and an exception in paragraph (h), (i), or (j) of this section is not applicable, the certified copy of the foreign application must be accompanied by a petition including a showing of good and sufficient cause for the delay and the petition fee set forth in [§ 1.17\(g\)](#).

(g) *Requirement for filing priority claim, certified copy of foreign application, and translation in any application.*

(1) The claim for priority and the certified copy of the foreign application specified in [35 U.S.C. 119\(b\)](#) or [PCT Rule 17](#) must, in any event, be filed within the pendency of the application, unless filed with a petition under paragraph (e) or (f) of this section, or with a petition accompanied by the fee set forth in [§ 1.17\(g\)](#) which includes a showing of good and sufficient cause for the delay in filing the certified copy of the foreign application in a design application. If the claim for priority or the certified copy of the foreign application is filed after the date the issue fee is paid, the patent will not include the priority claim unless corrected by a certificate of correction under [35 U.S.C. 255](#) and [§ 1.323](#).

(2) The Office may require that the claim for priority and the certified copy of the foreign application be filed earlier than otherwise provided in this section:

(i) When the application is involved in an interference (see [§ 41.202](#) of this chapter) or derivation (see [part 42](#) of this chapter) proceeding;

(ii) When necessary to overcome the date of a reference relied upon by the examiner; or

(iii) When deemed necessary by the examiner.

(3) An English language translation of a non-English language foreign application is not required except:

(i) When the application is involved in an interference (see [§ 41.202](#) of this chapter) or derivation (see [part 42](#) of this chapter) proceeding;

(ii) When necessary to overcome the date of a reference relied upon by the examiner; or

(iii) When specifically required by the examiner.

(4) If an English language translation of a non-English language foreign application is required, it must be filed together with a statement that the translation of the certified copy is accurate.

(h) *Certified copy in another U.S. patent or application.* The requirement in paragraphs (f) and (g) of this section for a certified copy of the foreign application will be considered satisfied in a reissue application if the patent for which reissue is sought satisfies the requirement of this section for a certified copy of the foreign application and such patent is identified as containing a certified copy of the foreign application. The requirement in paragraphs (f) and (g) of this section for a certified copy of the foreign application will also be considered satisfied in an application if a prior-filed nonprovisional application for which a benefit is claimed under [35 U.S.C. 120](#), [121](#), [365\(c\)](#), or [386\(c\)](#) contains a certified copy of the foreign application and such prior-filed nonprovisional application is identified as containing a certified copy of the foreign application.

(i) *Foreign intellectual property office participating in a priority document exchange agreement.* The requirement in paragraphs (f) and (g) of this section for a certified copy of the foreign application to be filed within the time limit set forth therein will be considered satisfied if:

(1) The foreign application was filed in a foreign intellectual property office participating with the Office in a bilateral or multilateral priority document exchange agreement (participating foreign intellectual property office), or a copy of the foreign application was filed in an application subsequently filed in a participating foreign intellectual property office that permits the Office to obtain such a copy;

(2) The claim for priority is presented in an application data sheet ([§ 1.76\(b\)\(6\)](#)), identifying the foreign application for which priority is claimed, by specifying the application number, country (or intellectual property authority), day, month, and year of its filing, and the applicant provides the information necessary for the participating foreign intellectual property office to provide the Office with access to the foreign application;

(3) The copy of the foreign application is received by the Office from the participating foreign intellectual property office, or a certified copy of the foreign application is filed, within the period specified in paragraph (g)(1) of this section; and

(4) The applicant files in a separate document a request that the Office obtain a copy of the foreign application from a participating intellectual property office that permits the Office to obtain such a copy where, although the foreign application was not filed in a participating foreign intellectual property office, a copy of the foreign application was filed in an application subsequently filed in a participating foreign intellectual property office that permits the Office to obtain such

a copy. The request must identify the participating intellectual property office and the subsequent application by the application number, day, month, and year of its filing in which a copy of the foreign application was filed. The request must be filed within the later of sixteen months from the filing date of the prior foreign application, four months from the actual filing date of an application under [35 U.S.C. 111\(a\)](#), four months from the date on which the national stage commenced under [35 U.S.C. 371\(b\)](#) or [\(f\)](#) ([§ 1.491\(a\)](#)), or four months from the date of the initial submission under [35 U.S.C. 371](#) to enter the national stage, or the request must be accompanied by a petition under paragraph (e) or (f) of this section.

(j) *Interim copy.* The requirement in paragraph (f) of this section for a certified copy of the foreign application to be filed within the time limit set forth therein will be considered satisfied if:

(1) A copy of the original foreign application clearly labeled as "Interim Copy," including the specification, and any drawings or claims upon which it is based, is filed in the Office together with a separate cover sheet identifying the foreign application by specifying the application number, country (or intellectual property authority), day, month, and year of its filing, and stating that the copy filed in the Office is a true copy of the original application as filed in the foreign country (or intellectual property authority);

(2) The copy of the foreign application and separate cover sheet are filed within the later of sixteen months from the filing date of the prior foreign application, four months from the actual filing date of an application under [35 U.S.C. 111\(a\)](#), four months from the date on which the national stage commenced under [35 U.S.C. 371\(b\)](#) or [\(f\)](#) ([§ 1.491\(a\)](#)), four months from the date of the initial submission under [35 U.S.C. 371](#) to enter the national stage, or with a petition under paragraph (e) or (f) of this section; and

(3) A certified copy of the foreign application is filed within the period specified in paragraph (g)(1) of this section.

(k) *Requirements for certain applications filed on or after March 16, 2013.* If a nonprovisional application filed on or after March 16, 2013, other than a nonprovisional international design application, claims priority to a foreign application filed prior to March 16, 2013, and also contains, or contained at any time, a claim to a claimed invention that has an effective filing date as defined in [§ 1.109](#) that is on or after March 16, 2013, the applicant must provide a statement to that effect within the later of four months from the actual filing date of the nonprovisional application, four months from the date of entry into the national stage as set forth in [§ 1.491](#) in an international application, sixteen months from the filing date of the prior foreign application, or the date that a first claim to a claimed invention that has an effective filing date on or after March 16, 2013, is presented in the nonprovisional application. An applicant is not required to provide such a statement if the applicant reasonably believes on the basis of information already known to the individuals designated in [§ 1.56\(c\)](#) that the nonprovisional application does not, and did not at any time, contain a claim to a claimed invention that has an effective filing date on or after March 16, 2013.

(l) *Inventor's certificates.* An applicant in a nonprovisional application may under certain circumstances claim priority on

the basis of one or more applications for an inventor's certificate in a country granting both inventor's certificates and patents. To claim the right of priority on the basis of an application for an inventor's certificate in such a country under [35 U.S.C. 119\(d\)](#), the applicant, when submitting a claim for such right as specified in this section, must include an affidavit or declaration. The affidavit or declaration must include a specific statement that, upon an investigation, he or she is satisfied that to the best of his or her knowledge, the applicant, when filing the application for the inventor's certificate, had the option to file an application for either a patent or an inventor's certificate as to the subject matter of the identified claim or claims forming the basis for the claim of priority.

(m) *Time for filing priority claim and certified copy of foreign application in an international design application designating the United States.* In an international design application designating the United States, the claim for priority may be made in accordance with the Hague Agreement and the Hague Agreement Regulations. In a nonprovisional international design application, the priority claim, unless made in accordance with the Hague Agreement and the Hague Agreement Regulations, must be presented in an application data sheet ([§ 1.76\(b\)\(6\)](#)), identifying the foreign application for which priority is claimed, by specifying the application number, country (or intellectual property authority), day, month, and year of its filing. In a nonprovisional international design application, the priority claim and certified copy must be furnished in accordance with the time period and other conditions set forth in paragraph (g) of this section.

(n) *Applications filed before September 16, 2012.* Notwithstanding the requirement in paragraphs (d)(1), (e)(1), and (i)(2) of this section that any priority claim be presented in an application data sheet ([§ 1.76](#)), this requirement in paragraphs (d)(1), (e)(1), and (i)(2) of this section will be satisfied by the presentation of such priority claim in the oath or declaration under [§ 1.63](#) in a nonprovisional application filed under [35 U.S.C. 111\(a\)](#) before September 16, 2012, or resulting from an international application filed under [35 U.S.C. 363](#) before September 16, 2012. The provisions of this paragraph do not apply to any priority claim submitted for a petition under paragraph (c) of this section to restore the right of priority to a foreign application.

(o) *Priority under 35 U.S.C. 386(a) or (b).* The right of priority under [35 U.S.C. 386\(a\)](#) or [\(b\)](#) with respect to an international design application is applicable only to nonprovisional applications, international applications, and international design applications filed on or after May 13, 2015, and patents issuing thereon.

(p) *Time periods in this section.* The time periods set forth in this section are not extendable, but are subject to [35 U.S.C. 21\(b\)](#) (and [§ 1.7\(a\)](#)), [PCT Rule 80.5](#), and Hague Agreement Rule 4(4).

Pursuant to [35 U.S.C. 386\(a\)](#) and [37 CFR 1.55](#), a nonprovisional application may make a claim of foreign priority in accordance with the conditions and requirements of [35 U.S.C. 119\(a\)-\(d\)](#) and [172](#) with respect to a prior international design application that designates at least one country other

than the United States. Pursuant to [35 U.S.C. 386\(b\)](#) and [37 CFR 1.55](#), an international design application designating the United States may make a claim of foreign priority in accordance with the conditions and requirements of [35 U.S.C. 119\(a\)-\(d\)](#) and [172](#) and the Hague Agreement and Regulations thereunder with respect to a prior foreign application, international application (PCT) designating at least one country other than the United States, or a prior international design application designating at least one country other than the United States. The provisions of [35 U.S.C. 386\(a\)](#) and [\(b\)](#) apply to nonprovisional applications, international applications (PCT) and international design applications filed on or after May 13, 2015, and patents issued therefrom. See [37 CFR 1.55\(o\)](#) and [MPEP §§ 213 et seq.](#) and [1504.10](#).

In an international design application designating the United States, the claim for priority may be made in accordance with the Hague Agreement and the Hague Agreement Regulations. See [37 CFR 1.55\(m\)](#). Alternatively, in a nonprovisional international design application, the foreign priority claim may be presented in a corrected application data sheet ([37 CFR 1.76\(b\)\(6\)](#)), identifying the foreign application for which priority is claimed, by specifying the application number, country (or intellectual property authority), day, month, and year of its filing. See [MPEP § 601.05\(a\)](#), subsection II. The priority claim and certified copy must be furnished in accordance with the time period and other conditions set forth in [37 CFR 1.55\(g\)](#).

Pursuant to Administrative Instruction 408, a priority claim made in accordance with Hague Agreement Rule 7(5)(c) may be accompanied by a WIPO Digital Access Service (DAS) access code, if available. The official form for the application for international registration (the DM/1 form or the electronic interface of the International Bureau's electronic filing system having the same contents and format as the DM/1 form) includes a field in the priority claim section to provide the WIPO access code. See [MPEP §§ 2909](#) and [2909.01](#). Providing the WIPO access code in accordance with Administrative Instruction 408 will allow the USPTO to automatically attempt retrieval of the priority document via WIPO DAS in a nonprovisional international design application. If the USPTO is

able to retrieve the priority document via WIPO DAS, the priority document will be considered to satisfy the requirement under [37 CFR 1.55](#) for a certified copy of the priority document. If the WIPO access code is not provided in accordance with Administrative Instruction 408, the WIPO access code may be provided to the USPTO by submitting in the nonprovisional international design application a corrected application data sheet ([37 CFR 1.76\(c\)](#)) and a request for a corrected filing receipt or, as discussed in [MPEP § 215.02\(a\)](#), by submitting Form PTO/SB/38 (Request to Retrieve Electronic Priority Application(s)), where applicable. Applicants are reminded that they continue to bear the ultimate responsibility for ensuring that the priority document is filed during the pendency of the application and before the patent is issued. Accordingly, applicants are encouraged to provide the WIPO access code to the USPTO as soon as possible and to check as necessary to confirm receipt by the USPTO of appropriate documents.

When making a foreign priority claim to an earlier filed international design application pursuant to [35 U.S.C. 386\(a\)](#) or [\(b\)](#) and [37 CFR 1.55](#), the USPTO will accept identification of the earlier international design application either by the application number assigned by the International Bureau or by its international registration number. Applicants should note, however, that on January 15, 2020, the International Bureau became a depositing office under WIPO DAS for international design applications and, to utilize WIPO DAS for retrieval of an international design application, the international design application must be identified by the application number in a specified format (i.e., WIPONNNNN, NNNNNNNN). For further information regarding the format of the application number and other information needed for retrieval of an international design application via WIPO DAS, see the Electronic Priority Document Exchange (PDX) Program site on www.uspto.gov/PatentsPDX/.

Pursuant to [35 U.S.C. 119\(a\)](#) and [172](#), and [37 CFR 1.55\(b\)\(1\)](#), the nonprovisional international design application must be filed not later than six months after the date on which the foreign application was filed, or be entitled to claim the benefit under [35 U.S.C. 120](#), [121](#), [365\(c\)](#), or [386\(c\)](#) of an application

that was filed within this six month period. Where a nonprovisional international design application directly claims priority to a foreign application, the six month period is measured with respect to the U.S. filing date of the international design application, which may or may not be the same as the international filing date assigned by the International Bureau. See [MPEP §§ 2906-2908](#). Where there was a delay in filing the subsequent application within this six month period, the right of priority may be restored under the conditions set forth in [37 CFR 1.55\(c\)](#) and [MPEP § 213.03](#), subsection III.

2920.05(e) Benefit Claims Under 35 U.S.C. 386(c) [R-07.2015]

35 U.S.C. 386 Right of priority.

(c) PRIOR NATIONAL APPLICATION.—In accordance with the conditions and requirements of [section 120](#), an international design application designating the United States shall be entitled to the benefit of the filing date of a prior national application, a prior international application as defined in [section 351\(c\)](#) designating the United States, or a prior international design application designating the United States, and a national application shall be entitled to the benefit of the filing date of a prior international design application designating the United States. If any claim for the benefit of an earlier filing date is based on a prior international application as defined in [section 351\(c\)](#) which designated but did not originate in the United States or a prior international design application which designated but did not originate in the United States, the Director may require the filing in the Patent and Trademark Office of a certified copy of such application together with a translation thereof into the English language, if it was filed in another language.

37 CFR 1.78 Claiming benefit of earlier filing date and cross-references to other applications.

(a) *Claims under 35 U.S.C. 119(e) for the benefit of a prior-filed provisional application.* An applicant in a nonprovisional application, other than for a design patent, or an international application designating the United States may claim the benefit of one or more prior-filed provisional applications under the conditions set forth in [35 U.S.C. 119\(e\)](#) and this section.

(d) *Claims under 35 U.S.C. 120, 121, 365(c), or 386(c) for the benefit of a prior-filed nonprovisional application, international application, or international design application.* An applicant in a nonprovisional application (including a nonprovisional application resulting from an international application or international design application), an international application designating the United States, or an international design application designating the United States may claim the benefit of one or more prior-filed copending nonprovisional

applications, international applications designating the United States, or international design applications designating the United States under the conditions set forth in [35 U.S.C. 120, 121, 365\(c\), or 386\(c\)](#) and this section.

(1) Each prior-filed application must name the inventor or a joint inventor named in the later-filed application as the inventor or a joint inventor. In addition, each prior-filed application must either be:

(i) An international application entitled to a filing date in accordance with [PCT Article 11](#) and designating the United States;

(ii) An international design application entitled to a filing date in accordance with [§ 1.1023](#) and designating the United States; or

(iii) A nonprovisional application under [35 U.S.C. 111\(a\)](#) that is entitled to a filing date as set forth in [§ 1.53\(b\) or \(d\)](#) for which the basic filing fee set forth in [§ 1.16](#) has been paid within the pendency of the application.

(2) Except for a continued prosecution application filed under [§ 1.53\(d\)](#), any nonprovisional application, international application designating the United States, or international design application designating the United States that claims the benefit of one or more prior-filed nonprovisional applications, international applications designating the United States, or international design applications designating the United States must contain or be amended to contain a reference to each such prior-filed application, identifying it by application number (consisting of the series code and serial number), international application number and international filing date, or international registration number and filing date under [§ 1.1023](#). If the later-filed application is a nonprovisional application, the reference required by this paragraph must be included in an application data sheet ([§ 1.76\(b\)\(5\)](#)). The reference also must identify the relationship of the applications, namely, whether the later-filed application is a continuation, divisional, or continuation-in-part of the prior-filed nonprovisional application, international application, or international design application.

(3)

(i) The reference required by [35 U.S.C. 120](#) and paragraph (d)(2) of this section must be submitted during the pendency of the later-filed application.

(ii) If the later-filed application is an application filed under [35 U.S.C. 111\(a\)](#), this reference must also be submitted within the later of four months from the actual filing date of the later-filed application or sixteen months from the filing date of the prior-filed application. If the later-filed application is a nonprovisional application entering the national stage from an international application under [35 U.S.C. 371](#), this reference must also be submitted within the later of four months from the date on which the national stage commenced under [35 U.S.C. 371\(b\)](#) or (f) ([§ 1.491\(a\)](#)), four months from the date of the initial submission under [35 U.S.C. 371](#) to enter the national stage, or sixteen months from the filing date of the prior-filed application. The time periods in this paragraph do not apply if the later-filed application is:

(A) An application for a design patent;

(B) An application filed under [35 U.S.C. 111\(a\)](#) before November 29, 2000; or

(C) An international application filed under [35 U.S.C. 363](#) before November 29, 2000.

(iii) Except as provided in paragraph (e) of this section, failure to timely submit the reference required by [35 U.S.C. 120](#) and paragraph (d)(2) of this section is considered a waiver of any benefit under [35 U.S.C. 120](#), [121](#), [365\(c\)](#), or [386\(c\)](#) to the prior-filed application.

(4) The request for a continued prosecution application under § [1.53\(d\)](#) is the specific reference required by [35 U.S.C. 120](#) to the prior-filed application. The identification of an application by application number under this section is the identification of every application assigned that application number necessary for a specific reference required by [35 U.S.C. 120](#) to every such application assigned that application number.

(5) Cross-references to other related applications may be made when appropriate (see § [1.14](#)), but cross-references to applications for which a benefit is not claimed under title 35, United States Code, must not be included in an application data sheet (§ [1.76\(b\)\(5\)](#)).

(6) If a nonprovisional application filed on or after March 16, 2013, other than a nonprovisional international design application, claims the benefit of the filing date of a nonprovisional application or an international application designating the United States filed prior to March 16, 2013, and also contains, or contained at any time, a claim to a claimed invention that has an effective filing date as defined in § [1.109](#) that is on or after March 16, 2013, the applicant must provide a statement to that effect within the later of four months from the actual filing date of the later-filed application, four months from the date of entry into the national stage as set forth in § [1.491](#) in an international application, sixteen months from the filing date of the prior-filed application, or the date that a first claim to a claimed invention that has an effective filing date on or after March 16, 2013, is presented in the later-filed application. An applicant is not required to provide such a statement if either:

(i) The application claims the benefit of a nonprovisional application in which a statement under § [1.55\(k\)](#), paragraph (a)(6) of this section, or this paragraph that the application contains, or contained at any time, a claim to a claimed invention that has an effective filing date on or after March 16, 2013 has been filed; or

(ii) The applicant reasonably believes on the basis of information already known to the individuals designated in § [1.56\(c\)](#) that the later filed application does not, and did not at any time, contain a claim to a claimed invention that has an effective filing date on or after March 16, 2013.

(7) Where benefit is claimed under [35 U.S.C. 120](#), [121](#), [365\(c\)](#), or [386\(c\)](#) to an international application or an international design application which designates but did not originate in the United States, the Office may require a certified copy of such application together with an English translation thereof if filed in another language.

(e) *Delayed claims under [35 U.S.C. 120](#), [121](#), [365\(c\)](#), or [386\(c\)](#) for the benefit of a prior-filed nonprovisional application, international application, or international design application.* If the reference required by [35 U.S.C. 120](#) and paragraph (d)(2)

of this section is presented after the time period provided by paragraph (d)(3) of this section, the claim under [35 U.S.C. 120](#), [121](#), [365\(c\)](#), or [386\(c\)](#) for the benefit of a prior-filed copending nonprovisional application, international application designating the United States, or international design application designating the United States may be accepted if the reference required by paragraph (d)(2) of this section was unintentionally delayed. A petition to accept an unintentionally delayed claim under [35 U.S.C. 120](#), [121](#), [365\(c\)](#), or [386\(c\)](#) for the benefit of a prior-filed application must be accompanied by:

(1) The reference required by [35 U.S.C. 120](#) and paragraph (d)(2) of this section to the prior-filed application, unless previously submitted;

(2) The petition fee as set forth in § [1.17\(m\)](#); and

(3) A statement that the entire delay between the date the benefit claim was due under paragraph (d)(3) of this section and the date the benefit claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional.

(j) *Benefit under [35 U.S.C. 386\(c\)](#).* Benefit under [35 U.S.C. 386\(c\)](#) with respect to an international design application is applicable only to nonprovisional applications, international applications, and international design applications filed on or after May 13, 2015, and patents issuing thereon.

(k) *Time periods in this section.* The time periods set forth in this section are not extendable, but are subject to [35 U.S.C. 21\(b\)](#) (and § [1.7\(a\)](#)), [PCT Rule 80.5](#), and Hague Agreement Rule 4(4).

Pursuant to [35 U.S.C. 386\(c\)](#), in accordance with the conditions and requirements of [35 U.S.C. 120](#), an international design application designating the United States is entitled to claim the benefit of the filing date of a prior nonprovisional application, international application (PCT) designating the United States, or international design application designating the United States, and a nonprovisional application is entitled to the benefit of a prior international design application designating the United States. See [MPEP §§ 211](#) and [1504.20](#). An international design application designating the United States may not claim benefit to a provisional application. See [37 CFR 1.78\(a\)](#).

An application claiming benefit under [35 U.S.C. 386\(c\)](#) to an international design application designating the United States may identify the international design application by the U.S. application number or by the international registration number and U.S. filing date under [37 CFR 1.1023](#). See [37 CFR 1.78\(d\)\(2\)](#). To obtain benefit of the filing date of a prior international design application designating the United States, the

international design application must be entitled to a filing date in accordance with [37 CFR 1.1023](#). See [37 CFR 1.78\(d\)\(1\)\(ii\)](#).

When a later-filed international design application designating the United States is claiming the benefit of a prior-filed application under [35 U.S.C. 120](#), [121](#), [365\(c\)](#), or [386\(c\)](#), the later-filed application must be copending with the prior application or with an intermediate application similarly entitled to the benefit of the filing date of the prior application. In determining whether an international design application designating the United States is copending with a prior-filed application, it is the U.S. filing date of the international design application that is relevant, which may or may not be the same as the international filing date assigned by the International Bureau. See [MPEP §§ 2906-2908](#). Thus, if the international design application designating the United States has an international filing date before, but a U.S. filing date after, the date of abandonment of the prior-filed application, the benefit claim should be refused because the international design application designating the United States does not comply with the copendency requirement of [35 U.S.C. 120](#).

For purposes of determining the effective filing date under [AIA 35 U.S.C. 100\(i\)\(1\)\(B\)](#) with regard to a benefit claim under [35 U.S.C. 386\(c\)](#) to a prior-filed international design application designating the United States, the U.S. filing date of the international design application rather than the international filing date, if different, should be used.

2920.05(f) Information Disclosure Statement in an International Design Application Designating the United States [R-07.2022]

An extensive discussion of Information Disclosure Statement (IDS) practice is set forth in [MPEP § 609](#). Although not specifically stated therein, the duty to disclose information material to patentability as defined in [37 CFR 1.56](#) is placed on individuals associated with the filing and prosecution of an international design application designating the United States in the same manner as for a domestic national application. An international design application designating the United States has the effect of a U.S. patent application and thus is subject

to [37 CFR 1.56](#). See [35 U.S.C. 385](#) (“An international design application designating the United States shall have the effect, for all purposes, from its filing date determined in accordance with section [384](#), of an application for patent filed in the Patent and Trademark Office pursuant to chapter 16.”). See also [35 U.S.C. 389\(b\)](#) (“All questions of substance and, unless otherwise required by the treaty and Regulations, procedures regarding an international design application designating the United States shall be determined as in the case of applications filed under chapter 16.”).

Pursuant to [37 CFR 1.56\(c\)](#), individuals associated with the filing or prosecution of a patent application for purposes of [37 CFR 1.56](#) are: “(1) Each inventor named in the application; (2) Each attorney or agent who prepares or prosecutes the application; and (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, the applicant, an assignee, or anyone to whom there is an obligation to assign the application.” For example, individuals who are neither inventors nor practitioners but who are substantively involved in the preparation or prosecution of an international design application designating the United States and who are associated with the inventor, the applicant, an assignee, or anyone to whom there is an obligation to assign the application, have a duty of disclosure under [37 CFR 1.56](#). In addition, the requirement under [37 CFR 1.63\(c\)](#) and [1.64\(c\)](#) that a person may not execute the inventor’s oath or declaration for an application unless that person is aware of the duty to disclose to the Office all information known to the person to be material to patentability as defined in [37 CFR 1.56](#) is applicable to the inventor’s oath or declaration filed in an international design application designating the United States. See [37 CFR 1.1021\(d\)](#).

Applicant must adhere to the requirements set forth in [37 CFR 1.97](#), [37 CFR 1.98](#), and [37 CFR 1.33\(b\)](#) to ensure consideration of an IDS by the examiner. When filing an international design application, an applicant may submit an IDS using Annex III to the official application form (DM/1 form). See [MPEP § 2909.03](#). The International Bureau will send the annex to the USPTO when the published international registration is sent to the Office

pursuant to Hague Agreement Article 10(3). However, the Office would prefer to receive the IDS from the applicant after publication of the international registration. Pursuant to [37 CFR 1.97\(b\)\(5\)](#), the IDS will be considered by the Office if filed by the applicant within three months of the date of publication of the international registration under Hague Agreement Article 10(3). The Office may also consider an IDS filed after this three month period as provided in [37 CFR 1.97](#). See [MPEP § 609](#) for further information.

2920.06 Allowance [R-07.2022]

A Notice of Allowability For a Design Application (form PTOL-37D) is used whenever a nonprovisional international design application has been placed in condition for allowance. See [MPEP § 1302.03](#) for further information concerning the Notice of Allowability. In addition, a Notice of Allowance (form PTOL-85 (Hague)) is sent to the applicant requiring payment of the issue fee (i.e., second part of the U.S. designation fee). See [37 CFR 1.311](#) and [1.18\(b\)](#). The Notice of Allowance and the Notice of Allowability are communicated to the applicant at the correspondence address of record in the application. The International Bureau is also notified of the communication of the Notice of Allowance to the applicant.

Since the Notice of Allowability is used whenever an application has been placed in a condition for allowance, the Notice of Allowability does not constitute a refusal of the effects of the international registration. However, a Notification of Partial Refusal (form PTO-2321) may be sent to the International Bureau concurrent with the sending of the Notice of Allowance to the applicant where all the designs contained in the international registration have not been allowed and were not previously the subject of a notification of refusal (e.g., all designs but the allowed design were removed by preliminary amendment prior to examination). See [MPEP § 2920.05\(a\)](#).

The issue fee specified in the Notice of Allowance form PTOL-85 (Hague) may be paid directly to the Office or through the International Bureau. An issue fee paid through the International Bureau shall be in the amount established in Swiss currency pursuant

to Rule 28 as of the date of mailing of the notice of allowance. See [37 CFR 1.18\(b\)\(3\)](#). The International Bureau accepts payment only in Swiss currency (see Hague Agreement Rule 28(1)) and all fee amounts specified on the WIPO website are in Swiss currency). Further, any change in entity status from that shown in the Notice of Allowance must be communicated directly to the Office in accordance with U.S. rules, as instructed in the Notice of Allowance.

2921-2929 [Reserved]

2930 Corrections and Other Changes in the International Register [R-07.2022]

Hague Rule 22

Corrections in the International Register

(1) [*Correction*] Where the International Bureau, acting ex officio or at the request of the holder, considers that there is an error concerning an international registration in the International Register, it shall modify the Register and inform the holder accordingly.

(2) [*Refusal of Effects of Correction*] The Office of any designated Contracting Party shall have the right to declare in a notification to the International Bureau that it refuses to recognize the effects of the correction. Rules 18 to 19 shall apply mutatis mutandis.

Hague Article 16

Recording of Changes and Other Matters Concerning International Registrations

(1) [Recording of Changes and Other Matters] The International Bureau shall, as prescribed, record in the International Register

(i) any change in ownership of the international registration, in respect of any or all of the designated Contracting Parties and in respect of any or all of the industrial designs that are the subject of the international registration, provided that the new owner is entitled to file an international application under Article 3,

(ii) any change in the name or address of the holder,

(iii) the appointment of a representative of the applicant or holder and any other relevant fact concerning such representative,

(iv) any renunciation, by the holder, of the international registration, in respect of any or all of the designated Contracting Parties,

(v) any limitation, by the holder, of the international registration, in respect of any or all of the designated Contracting Parties, to one or some of the industrial designs that are the subject of the international registration,

(vi) any invalidation, by the competent authorities of a designated Contracting Party, of the effects, in the territory of that Contracting Party, of the international registration in respect of any or all of the industrial designs that are the subject of the international registration,

(vii) any other relevant fact, identified in the Regulations, concerning the rights in any or all of the industrial designs that are the subject of the international registration.

(2) [*Effect of Recording in International Register*] Any recording referred to in items (i), (ii), (iv), (v), (vi) and (vii) of paragraph (1) shall have the same effect as if it had been made in the Register of the Office of each of the Contracting Parties concerned, except that a Contracting Party may, in a declaration, notify the Director General that a recording referred to in item (i) of paragraph (1) shall not have that effect in that Contracting Party until the Office of that Contracting Party has received the statements or documents specified in that declaration.

37 CFR 1.1065 Corrections and other changes in the International Register.

(a) The effects of any correction in the International Register by the International Bureau pursuant to Rule 22 in a pending nonprovisional international design application shall be decided by the Office in accordance with the merits of each situation, subject to such other requirements as may be imposed. A patent issuing from an international design application may only be corrected in accordance with the provisions of title 35, United States Code, for correcting patents. Any correction under Rule 22 recorded by the International Bureau with respect to an abandoned nonprovisional international design application will generally not be acted upon by the Office and shall not be given effect unless otherwise indicated by the Office.

(b) A recording of a partial change in ownership in the International Register pursuant to Rule 21(7) concerning a transfer of less than all designs shall not have effect in the United States.

I. CORRECTIONS UNDER HAGUE RULE 22

Hague Agreement Rule 22 provides for correction of errors in the International Register by the International Bureau, acting *ex officio*, or at the request of the holder. Under Rule 22(2), a designated Contracting Party may refuse the effects of correction.

Upon receipt of a correction under Rule 22 in a pending application, the Office will make a determination whether to give effect to the correction or to refuse the effects of the correction in accordance with the merits of each situation, subject to such other requirements as may be imposed. Upon making such a determination, the Rule 22 correction will be annotated to reflect entry or non-entry of the correction. Where the Rule 22 correction is entered

and corrects data contained in the official filing receipt, a corrected filing receipt will be issued.

Corrections under Rule 22 received in abandoned applications will generally not be acted upon by the Office and will not be given effect unless otherwise indicated by the Office. U.S. patents, including U.S. patents issuing from international design applications, may only be corrected in accordance with the provisions of title 35, United States Code, for correcting patents. Such provisions are contained, for example, in 35 U.S.C. chapter 25. See, e.g., [MPEP §§ 1401, 1480 et seq.](#) and [1481 et seq.](#)

II. RECORDING OF CHANGES UNDER HAGUE ARTICLE 16

Hague Agreement Article 16(1) provides for the recording of certain changes in the International Register by the International Bureau, including: (1) a change in ownership of the international registration; (2) a change in the name or address of the holder; (3) an appointment of a representative of the applicant or holder; (4) a renunciation of the international registration with respect to any or all of the designated Contracting Parties; (5) a limitation of the international registration with respect to any or all of the designated Contracting Parties, to one or some of the industrial designs that are the subject of the international registration; and (6) any invalidation by the competent authority of a designated Contracting Party of the effects of the international registration in the territory of that Contracting Party.

Regarding the recording of a change in ownership of the international registration pursuant to Article 16(1)(i), Article 16(2) provides that a Contracting Party may, in a declaration, notify the International Bureau that a recording of a change in ownership of the international registration shall not have that effect in that Contracting Party until the office of that Contracting Party has received the statements or documents specified in that declaration. The United States has made a declaration under Article 16(2). See [MPEP § 2903](#). In addition, the recording of a partial change in ownership by the International Bureau in the International Register concerning a transfer of less than all designs shall not have effect in the United States. See [37 CFR 1.1065\(b\)](#). [Section](#)

[1.1065\(b\)](#) does not limit the right of the owner to assign or otherwise transfer a portion of his or her interest in the application, or to record such transfer in the Office, but rather simply provides that the recording of such a transfer in the International Register will not have effect in the United States.

A change in the name or address of the holder under Article 16(1)(ii) will be entered in a pending nonprovisional international design application where the holder is the applicant and the change is timely made. See [MPEP § 2920.02](#) regarding a change in the name of the applicant. Where the recording of a purported change in the name of the holder under Article 16(1)(ii) is a de facto change in the applicant, the Office will treat the recording as a recording under Article 16(1)(i).

The recording of the appointment of a representative of the applicant or holder pursuant to Article 16(1)(iii) concerns representation before the International Bureau pursuant to Rule 3. The recording under Article 16(1)(iii) does not effect a change in representation before the USPTO.

A renunciation of the international registration with respect to the designation of the United States pursuant to Article 16(1)(iv) will result in termination of a pending nonprovisional international design application. In such case, the Office will send a notification of abandonment to the applicant, or to the International Bureau in the form of a refusal where a refusal has not previously been communicated. See [MPEP § 2920.05\(a\)](#).

The recording of a limitation with respect to the designation of the United States pursuant to Article 16(1)(v) will be treated as an amendment canceling the designs that are the subject of the limitation contained in the nonprovisional international design application.

2931-2939 [Reserved]

2940 Statement of Grant of Protection [R-07.2015]

Hague Rule 18 bis

Statement of Grant of Protection

(1) [*Statement of Grant of Protection Where No Notification of Refusal Has Been Communicated*]

(a) An Office which has not communicated a notification of refusal may, within the period applicable under Rule 18(1)(a) or (b), send to the International Bureau a statement to the effect that protection is granted to the industrial designs, or some of the industrial designs, as the case may be, that are the subject of the international registration in the Contracting Party concerned, it being understood that, where Rule 12(3) applies, the grant of protection will be subject to the payment of the second part of the individual designation fee.

(b) The statement shall indicate

- (i) the Office making the statement,
- (ii) the number of the international registration,

(iii) where the statement does not relate to all the industrial designs that are the subject of the international registration, those to which it relates,

(iv) the date on which the international registration produced or shall produce the effect as a grant of protection under the applicable law, and

(v) the date of the statement.

(c) Where the international registration was amended in a procedure before the Office, the statement shall also contain or indicate all amendments.

(d) Notwithstanding subparagraph (a), where Rule 18(1)(c)(i) or (ii) applies, as the case may be, or where protection is granted to the industrial designs following amendments in a procedure before the Office, the said Office must send to the International Bureau the statement referred to in subparagraph (a).

(e) The applicable period referred to in subparagraph (a) shall be the period allowed pursuant to Rule 18(1)(c)(i) or (ii), as the case may be, to produce the effect as a grant of protection under the applicable law, with respect to a designation of a Contracting Party having made a declaration under either of the aforementioned Rules.

(2) [*Statement of Grant of Protection Following a Refusal*]

(a) An Office which has communicated a notification of refusal and which has decided to either partially or totally withdraw such refusal, may, instead of notifying a withdrawal of refusal in accordance with Rule 18(4)(a), send to the International Bureau a statement to the effect that protection is granted to the industrial designs, or some of the industrial designs, as the case may be, that are the subject of the international registration in the Contracting Party concerned, it being understood that, where Rule 12(3) applies, the grant of

protection will be subject to the payment of the second part of the individual designation fee.

(b) The statement shall indicate

(i) the Office making the notification,

(ii) the number of the international registration,

(iii) where the statement does not relate to all the industrial designs that are the subject of the international registration, those to which it relates or does not relate,

(iv) the date on which the international registration produced the effect as a grant of protection under the applicable law, and

(v) the date of the statement.

(c) Where the international registration was amended in a procedure before the Office, the statement shall also contain or indicate all amendments.

(3) [Recording, Information to the Holder and Transmittal of Copies] The International Bureau shall record any statement received under this Rule in the International Register, inform the holder accordingly and, where the statement was communicated, or can be reproduced, in the form of a specific document, transmit a copy of that document to the holder.

37 CFR 1.1068 Statement of grant of protection.

Upon issuance of a patent on an international design application designating the United States, the Office may send to the International Bureau a statement to the effect that protection is granted in the United States to those industrial design or designs that are the subject of the international registration and covered by the patent.

Upon issuance of a patent on a nonprovisional international design application, the Office will send to the International Bureau a statement that protection is granted in the United States to the industrial design or designs that are the subject of the international registration and covered by the patent. See [37 CFR 1.1068](#). The sending of such a statement is provided for under Hague Agreement Rule 18 *bis* and serves the purpose of providing notice to the public and third parties through publication of the statement by the International Bureau in the International Designs Bulletin that protection for an industrial design has been granted in the United States.

2941-2949 [Reserved]

2950 Grant of Protection Only Upon Issuance of Patent; Term of Design Patent [R-07.2022]

35 U.S.C. 389 Examination of international design application.

(a) IN GENERAL.—The Director shall cause an examination to be made pursuant to this title of an international design application designating the United States.

(b) APPLICABILITY OF CHAPTER 16.—All questions of substance and, unless otherwise required by the treaty and Regulations, procedures regarding an international design application designating the United States shall be determined as in the case of applications filed under chapter 16.

(c) FEES.—The Director may prescribe fees for filing international design applications, for designating the United States, and for any other processing, services, or materials relating to international design applications, and may provide for later payment of such fees, including surcharges for later submission of fees.

(d) ISSUANCE OF PATENT.—The Director may issue a patent based on an international design application designating the United States, in accordance with the provisions of this title. Such patent shall have the force and effect of a patent issued on an application filed under chapter 16.

35 U.S.C. 173 Term of design patent.

Patents for designs shall be granted for the term of 15 years from the date of grant.

37 CFR 1.1071 Grant of protection for an industrial design only upon issuance of a patent.

A grant of protection for an industrial design that is the subject of an international registration shall only arise in the United States through the issuance of a patent pursuant to [35 U.S.C. 389\(d\)](#) or [171](#), and in accordance with [35 U.S.C. 153](#).

37 CFR 1.1031 International design application fees.

(e) Payment of the fees referred to in Article 17 and Rule 24 for renewing an international registration (“renewal fees”) is not required to maintain a U.S. patent issuing on an international design application in force. Renewal fees, if required, must be submitted directly to the International Bureau. Any renewal fee submitted to the Office will not be transmitted to the International Bureau.

A grant of protection for an industrial design that is the subject of an international registration shall only arise in the United States through the issuance of a

patent pursuant to [35 U.S.C. 389\(d\)](#) or [171](#), and in accordance with [35 U.S.C. 153](#). See [37 CFR 1.1071](#). The Office does not regard the failure to send a notification of refusal within the period referenced in [37 CFR 1.1062\(b\)](#) to confer patent rights or other effect under Article 14(2). The Hague Agreement is not self-executing, and title I of the Patent Law Treaties Implementation Act of 2012 (PLTIA) provides for patent rights only upon issuance of a patent. See [35 U.S.C. 389\(d\)](#) added by the PLTIA, 126 Stat. at 1531; see also S. Exec. Rep. No. 110-7, at 5 (“The proposed Act makes no substantive changes in U.S. design patent law with the exception of the following: the provision of limited rights to patent applicants between the date that their international design application is published by the IB and the date on which they are granted a U.S. patent based on that application; the extension of a patent term for designs from fourteen to fifteen years from grant; and allowing the USPTO to use a published international design registration as a basis for rejecting a subsequently filed national patent application that is directed at the same or a similar subject matter.”).

U.S. patents issued from international design applications shall be effective for a term of fifteen years from the date of grant. Payment of the fees referred to in Article 17 and Rule 24 for renewing an international registration (“renewal fees”) is not required to maintain in force a U.S. patent issuing on an international design application. See [37 CFR 1.1031\(e\)](#).
