4	REGENERATOR	213	Mixing within zone of
5	.Cleaning		recirculated zone air and
6	.Movable heat storage mass with		supply air adjacent zone air
	enclosure		inlet (e.g., induction unit,
7	With fluid handling system	214	etc.)
8	Rotary heat collector	214	Including a fan (e.g.,
9	Seals	015	fancoil unit, etc.)
9.1	.Checker brick structure	215	Reheat adjacent zone air inlet
9.2	Gradated flow area, heat	216	
	capacity or heat resistance	210	Mixing of separate centrally
9.3	Having gas supply or exhaust		supplied hot and cold stream before discharge into each
	manifold structure		zone (e.g., dual-duct, etc.)
9.4	In casing	217	Volume flow of discharged air
10	.Heat collector	217	at discharge into zone
11.1	WITH ALARM, INDICATOR, SIGNAL,		modulated by zone heating or
	REGISTER, RECORDER, TEST OR		cooling load (e.g., variable
	INSPECTION MEANS		air volume, etc.)
11.2	.Remotely controlled inspection	218	Central temperature
	means		conditioned liquid supplied to
200	WITH TIMER, PROGRAMMER, TIME		each zone
	DELAY, OR CONDITION RESPONSIVE	219	Separate supply and return
	CONTROL		mains (e.g., two pipe system,
201	.Having heating and cooling		etc.)
	capability	220	Additional supply main
202	Vehicle installation		(e.g., three pipe system,
203	Plural temperature regulators		etc.)
	for plural zones	221	Additional return main
204	Flow control of chest, foot,		(e.g., four pipe system, etc.)
	or defrost air in vehicle	222	Humidity control
205	Plural temperature regulators	223	Humidity sensor measures
0.0.6	for plural zones		humidity of air in conditioned
206	Nonbuilding system (e.g.,		space
	machine tool, chemical	224	Additional humidity sensor
207	analyzer, etc.)		(e.g., located outside of
207	Refrigeration system having an		conditioned space, etc.)
	evaporator or condenser in each zone	225	Humidity sensor controls
208			indirect-contact cooling means
200	Central system prioritizes heating and cooling requests	226	Liquid spray onto indirect-
	from zones	000	contact cooling means
209	Supervisory central control	227	Air bypass of indirect-
205	means overrides zone	000	contact cooling means
	controller	228	Reheat of cooled air
210	Heat balancing using waste		downstream of indirect-contact
	heat or cold (e.g., heat	229	cooling means
	reclaim, etc.)	229	Humidity sensor controls humidifier
211	Different conditioning means	230	
	for perimeter zone and core	230	Dewpoint controlled (e.g.,
	zone		control of cooling means by downstream temperature sensor
212	Central temperature		to maintain controlled
	conditioned air supplied to		dewpoint of downstream air,
	each zone		etc.)
			•

231	Congealed material (e.g.,	254	System selects heating or
	frost, etc.) or condensation		cooling mode automatically
232	removal or prevention		<pre>(e.g., responsive to season, ambient light, temperature in</pre>
232	Operated by timer or programmer		conditioned area, etc.)
233	Operated by temperature sensor	255	Dead band between heating and
234	Control of static pressure of		cooling
	conditioned space	256	Variable rate of heating or
235	Space is within aircraft		cooling (e.g., plural stages,
236	Control of heat storage		etc.)
237	Means responsive to occupancy	257	\ldots Room and ambient temperature
	of space		sensors
238	Means storing set point for	258	Separate heating and cooling
	particular time of day (e.g.,		thermostats
	<pre>clock thermostat, etc.)</pre>	259	Single temperature sensing
239	Means to compute time required	0.50	means
	to reach certain temperature	260	Variable rate of heating or
	by certain time of day (e.g.,		cooling (e.g., plural stages,
0.4.0	morning warm-up, etc.)	261	etc.)
240	Heat pump and supplemental heat	201	Sequentially activated heat sources or cool sources
241	Source	262	Timer
241	Change-over from heat pump operation to supplemental heat	263	Area receives conditioning
	source operation alone	203	from simultaneously operated
242	Responsive to outdoor		heating and cooling means
	temperature		(e.g., opposed and
243	Means to reset supply air		compensating heating and
	temperature or supply water		cooling, etc.)
	temperature as function of	264	Simultaneous heating and
	heat load		cooling only in limited range
244	Means to control fan or pump to	0.65	around set point temperature
	regulate supply air flow or	265	Manual changeover between
0.45	supply water flow		heating and cooling modes
245	Low flow during heating and	266	<pre>(e.g., manual override, etc.) .Pre-heat or pre-cool of space or</pre>
246	high flow during cooling	200	device during start-up
246 247	Responsive to pressure	267	.Means to heat or cool for
247	Responsive to temperatureFlow of air from outdoors	201	predetermined periods of time
240	controlled (e.g., minimum		(e.g., duty cycle, time-
	outside air, etc.)		temperature profiler, etc.)
249	Proportion of outdoor air and	268	Predetermined time variable set
217	return air controlled		point
250	Outdoor air used in lieu of	269	Duty cycle (e.g., pulse
	operating heating or cooling		duration or pulse frequency
	means (e.g., economy cycle,		modulation, etc.)
	etc.)	270	.Time delay
251	Enthalpy sensor	271	.Vehicle or engine speed
252	Pre-heat or pre-cool of	272	responsive
	outdoor air before mixing with	272	.Control of heat pipe heat
0.50	returned air	273	transfer characteristicsControl of quantity of inert
253	Temperature sensor controlling	413	gas
	temperature		540

274	Control of vapor or liquid flow between evaporator and	293	Temperature sensor prior to heat exchanger and one after
	condenser sections (e.g., by variable restrictions, check	294	Branched flow of heat exchange material
	valves, etc.)	295	Including mass flow sensor
275	.Control of amount of conductive gas in confined space between	296	Branched flow of heat exchange material
	heat source and heat sink	297	Bypass of heat exchanger
276	.Control of variable thermal	298	Mixture temperature sensing
	conductivity systems (e.g.,	299	Flow of one heat exchange
	heat valves, etc.)		material controlled by
277	Solid heat transfer path		temperature of another
278	.Vent of system (e.g.,	300	Flow of one heat exchange
	overpressure, overtemperature, removal of noncondensable,		material controlled by its own temperature
	etc.)	301	.Liquid-level responsive or
279	.Pressure and temperature		control means
	responsive or control	302	Condenser or evaporator
280	Bypass of heat exchanger	303	.Cleaning
	responsive to both temperature	41	WITH VEHICLE FEATURE
	and pressure	42	.Heating and cooling
281	.Fluid pressure responsive or	43	Vehicle contained common power
	control		and heat supply
282	Branched flow of heat exchange	44	.Utilizing motion of vehicle
	material	45	GEOGRAPHICAL
283	Bypass of heat exchanger	46	FLEXIBLE ENVELOPE OR COVER TYPE
284	Differential pressure	47	STRUCTURAL INSTALLATION
	operated bypass	48.1	.Heating and cooling
285	Flow of one heat exchange	48.2	Solar
	material controlled by the	49	Radiant building panel
	pressure of another	50	Room heat exchangers with
286	Flow of one heat exchange		central fluid supply
	material controlled by its own	51	.Engine
0.07	pressure	52	Exchange between engine supply
287	.Temperature responsive or		and exhaust lines
0.00	control	53	.Related to wall, floor or
288	Plural temperature sensors		ceiling structure of a chamber
289	Means to maintain a constant	54	In a chamber connected passage
	temperature difference between		traversing the structure
	a measured temperature and a controlled temperature	55	Projecting shield forms passage
290	Temperature sensor within or		with the structure
230	near an area to be	56	Hollow or recess in the
	conditioned, another		structure connected for
	tempeerature sensor near the		exchange fluid flow
	conditioning equipment (e.g.,	57	Ported to the chamber
	shallow/deep, etc.)	58	HEATING AND COOLING
291	Temperature sensor inside	59	.With ventilation
	conditioned space, another	60	.Gas-liquid contactor
	temperature sensor outdoor	61	.Heating and cooling of the same
	(e.g., indoor set point		material
	adjusted by outdoor	62	Refrigerating system conversion
	conditions, etc.)	63	Refrigeration producer
292	Temperature sensor in treated	64	Heat generator
	fluid, another temperature	65	Heater and cooler serially
	sensor in treating fluid		arranged

66	Heat exchange between supply and exhaust lines	95	WITH CLEANING MEANS FOR HEAT EXCHANGER
67	WITH EXTERNAL SUPPORT	96	WITH ADJUSTOR FOR HEAT, OR
68	.Legs		EXCHANGE MATERIAL, FLOW
69	RESILIENT VIBRATION DAMPER	97	.Flow reversed or crossed within
	ISOLATING EXCHANGER ELEMENT		temperature modifying zone
70	WITH LEAKAGE COLLECTOR	98	.Adjustable radiator face
71	WITH PURGE, OR DRAINAGE, COCK OR		covering means
-	PLUG	99	Discharge grille or diffuser
72	COVERED ACCESS OPENING	100	.Branched flow
73	.Cover is, or carries, heat	101	Controls flow through parallel
	exchanging means	-	heating or cooling means
74	Heat exchanging means projects	102	Tortuous and straight through
-	into the covered chamber	-	branches within heating or
75	.Heating or cooling means within		cooling drum
	the covered chamber	103	By pass of heating or cooling
76	WITH REPAIR OR ASSEMBLY MEANS		means
77	.Hinge	104.11	INTERMEDIATE FLUENT HEAT EXCHANGE
78	.Guide		MATERIAL RECEIVING AND
79	.Positioner or retainer for		DISCHARGING HEAT
_	settable material	104.12	.Reversible chemical reaction
80.1	WITH RETAINER FOR REMOVABLE	104.13	.Plural intermediate fluent heat
	ARTICLE		exchange materials
80.2	.Electrical component	104.14	Always out of direct contact
80.3	Air cooled, including fins		with each other
80.4	Liquid cooled	104.15	.Solid fluent heat exchange
80.5	.Including liquid heat exchange		material
	medium	104.16	Fluidized bed
81	EXPANSION AND CONTRACTION	104.17	Utilizing change of state
	RELIEVING OR ABSORBING MEANS	104.18	Including means to move heat
82	.Relieving or absorbing means		exchange material
	supports temperature modifier	104.19	.Liquid fluent heat exchange
	in heat exchanger		material
83	Flexible fluid confining wall	104.21	Utilizing change of state
84	WITH MEANS FLEXING, JARRING OR	104.22	Including means to move heat
	VIBRATING HEAT EXCHANGE		exchange material in liquid
	SURFACE		state
85	AGITATOR OR IMPELLER MOTOR	104.23	By direct application of
	OPERATED BY EXCHANGE FLUID		electrical energy to heat
86	MOVABLE HEATING OR COOLING		exchange material
	SURFACE	104.24	By application of heat other
87	.Hollow screw type impeller		than in heat receiving area
88	.Rotor carrying separate chambers	104.25	By application of mechanical
	for two exchanging fluents		energy
89	.Rotary drum	104.26	Utilizing capillary attraction
90	With means applying fluids for	104.27	With pressurizing means or
	exchange through drum wall		degassifying means
91	With drum surface scraper	104.28	Including means to move heat
92	.Hollow strirrer or scraper		exchange material
93	Material advancer in shelf to	104.29	Utilizing formed bubble
	shelf device	104.31	By application of mechanical
94	WITH SCRAPER REMOVING PRODUCT	104 30	energy
	FROM TEMPERATURE MODIFYING	104.32	With pressurizing means or
	SURFACE	104 22	degassifying means
		104.33	Cooling electrical device

104.34	.Including means to move gaseous heat exchange material	139	INTERNALLY BRANCHED FLOW, EXTERNALLY PORTED
108	RECIRCULATION	140	THREE NON-COMMUNICATING FLUIDS
109.1	WITH AGITATING OR STIRRING	141	.Concentric flow chambers
	STRUCTURE	142	SPUR TUBE PROJECTS INTO ENCLOSURE
110	WITH FIRST FLUID HOLDER OR	143	PLURAL CASING-CONDUIT UNITS, LINE
	COLLECTOR OPEN TO SECOND FLUID		OR COMMON HEADER CONNECTED
111	.Separate external discharge port	144	LINE CONNECTED CONDUIT ASSEMBLIES
	for each fluid	145	.In common casing
112	With downstream pressure or	146	GRADATED HEAT TRANSFER STRUCTURE
	temperature modifier	147	.Tapered conduit means
113	Surface-type heat exchanger	148	RADIATOR CORE TYPE
114	With baffle at inlet to less	149	.With edge cover or frame means
	dense fluid discharge port	150	Serially connected tube sections
115	.Trickler	151	.Side-by-side tubes traversing
116	Shelf to shelf	131	fin means
117	Pipe exterior to pipe exterior	152	
118	Vertical cone or drum	132	.Deformed sheet forms passages
119	WITH SOLIDS SEPARATOR FOR		between side-by-side tube
119		150	means
120	EXCHANGE FLUID	153 154	With tube manifold
120	WITH IMPELLER OR CONVEYOR MOVING EXCHANGE MATERIAL	154	NON-COMMUNICATING COAXIAL
121		155	ENCLOSURES
	.Mechanical gas pump	155	.With communicating coaxial
122	Heating or cooling means and	1 - 6	enclosure
100	gas pump in housing	156	.Helical conduit means
123	With injector-type gas pump	157	CASING OR TANK ENCLOSED CONDUIT
124	Verging gas flow	450	ASSEMBLY
125	Radial flow through annular	158	.Manifold formed by casing
	heating or cooling means		section and tube sheet of
126	Single inlet, plural outlets	450	assembly
127	Gas pump for each outlet	159	.With distinct flow director in
	stream		casing
128	THERMOSYPHONIC FLUE TYPE	160	Longitudinal
129	.Heating or cooling means within	161	Additional transverse baffle
	distinct flue forming	162	.With support in casing
	enclosure	163	.Conduit coiled within casing
130	.Flue formed between facing	164	FLOW PASSAGES FOR TWO CONFINED
	second fluid containing		FLUIDS
	conduits	165	.Interdigitated plural first and
131	.Flues formed by vertical		plural second fluid passages
	corrugations of heat	166	Stacked plates or shells form
	transmitter		interplate passages
132	HEATING OR COOLING MEANS IN OPEN	167	With plate traversing passages
	COMMUNICATION WITH RESERVOIR		interconnecting alternate
133	WITH COATED, ROUGHENED OR		spaces
	POLISHED SURFACE	168	CONDUIT WITHIN, OR CONFORMING TO,
134.1	WITH PROTECTOR OR PROTECTIVE		PANEL OR WALL STRUCTURE
	AGENT	169	.Wall forms enclosure
135	WITH THERMAL OR ACOUSTICAL	170	.Opposed plates or shells
	BLOCKER	171	.Means spanning side-by-side tube
136	.Insulation and temperature		elements
	modifier within barrier member	172	SIDE-BY-SIDE TUBULAR STRUCTURES
137	CONVERTIBLE		OR TUBE SECTIONS
138	COMBINED	173	.With manifold type header or
			header plate

174	With internal flow director	Any foreign patents or non-patent litera-
175	Inlet and outlet header means	ture from subclasses that have been

DIG 133 .Conduction rate

DIG 134 .. By varying thickness of conductive layer (e.g., air gap, etc.) DIG 135 MOVABLE HEAT EXCHANGER DIG 136 .Movable belt or strip transfers heat to or from objects or material thereon DIG 137 .Unconstrained movement (e.g., float, etc.) DIG 138 .Partially rotable (e.g, rocking, pivoting, oscillation, tilting, etc.) DIG 139 .Fully rotatable DIG 140 .. Rotating heat exchanger having rotating flow confining structures or chambers for two separate heat exchange fluids DIG 141 ... Concentric flow confining structures or chambers DIG 142Jacketed shell DIG 143 ...Discrete tubing having length extending along a longitudinal axis of rotating heat exchanger DIG 144 Helical DIG 145 .. Radially extending hollow arm on rotating shaft traverses furnance shelf (e.g., rabble arm, etc.) DIG 146 ... Angled blade suspended from arm for advancing material DIG 147 ...Fluid impeller or material advancer DIG 148 ...Auger DIG 149 Having hollow blade DIG 150 ... Radial or axial impeller DIG 151 Having hollow blade DIG 152 .. Rotating agitator DIG 153 ...Flow space or fluid chamber defined between two relatively movable, closely spaced coextensive surfaces DIG 154 ... Hollow tubing rotates in vessel to stir contents DIG 155 Tubing has radially or axially extending sections DIG 156 .. Hollow cylindrical member (e.g., drum, etc.) DIG 157 ...Fluid sprayed onto surface of rotatable cylinder DIG 158 ... Having stationary material removal means DIG 159 ...With particular flow path or

defined fluid chamber (e.g.,

annulus, spiral, etc.)

- DIG 160Concentric shells define annular flow space
- DIG 161With means defining particular flow path (e.g., baffle, etc.)
- DIG 162 ONLY DIRECT-CONTACT HEAT EXCHANGE
 BETWEEN TWO SEPARATELY
 SUPPLIED FLUIDS
- DIG 163 INCLUDING A MEANS TO FORM FLUID FILM ON HEAT TRANSFER SURFACE (E.G., TRICKLE)
- DIG 164 .Film flow constrained to spiral path
- DIG 165 .Film formed on spirally coiled member
- DIG 166 .Vertically spaced pipe sections contact liquid in underlying troughs
- DIG 167 .Liquid film flows sequentially along upper surfaces of vertically spaced trays (i.e. shelf-to-shelf)
- DIG 168 .Film formed on interior surface of container or pipe
- DIG 169 .. Inside of vertical pipe
- DIG 170 ...Distributor "cap" mounted in top end of pipe
- DIG 171 .Including means at top end of vertical pipe to distribute liquid film on pipe exterior
- DIG 172 .Film flows along exterior of plural pipe sections
- DIG 173 ..Pipe exterior surfaces about to form continuous surface
- DIG 174 ..Intervening members extend between spaced pipe sections to form continuous surface
- DIG 176 ...With means suspended beneath pipe surface to guide liquid droplets
- DIG 177 .Film flows along upper surface of tray
- DIG 178 ..Parallel corrugated vertical sheets formed fluid passage therebetween
- DIG 179 .. Container enclosed by casing
- DIG 180 ..Vertically disposable elongated member
- DIG 181 .. Horizontally disposable elongated member
- DIG 182 INDIRECT-CONTACT COOLING TOWER

- DIG 183 INDIRECT-CONTACT EVAPORATOR
- DIG 184 INDIRECT-CONTACT CONDENSER
- DIG 185 .Having stacked plates forming flow channel therebetween
- DIG 186 ..Stacked plates surrounded by housing confining another fluid
- DIG 187 .Having pump downstream of condenser
- DIG 188 ...Pump to remove only uncondensed vapor or air
- DIG 189 ...From a first-stage directcontact condenser
- DIG 190 ...Including second-stage indirect-contact condenser
- DIG 191 ...Including second-stage directcontact condenser
- DIG 192 .Including means to heat collected condensate
- DIG 193 .First-stage condenser serially connected to second-stage condenser
- DIG 194 ..First stage direct-contact condenser
- DIG 195 .Including condensate collecting tray connected to condensate drain conduit to divert condensate around a section of heat transfer surface
- DIG 196 .Baffle defines flow passage within header for condensate to bypass portion of vapor flow path
- DIG 197 .Including means for (removing) condensate (from vapor flow path) to bypass portion of vapor flow path
- DIG 198 .Condensate guiding means attached to heat transfer surface
- DIG 199 ..Heat transfer tube surrounds by jacket condensate guiding means
- DIG 200 ..Condensate guiding means forms inside heat transfer tube
- DIG 201 ..Including fin member associated with condensate guiding means
- DIG 202 .Vapor flow passage between vapor inlet and outlet has decreasing cross- sectional area
- DIG 203 ..Coolant tubes arranged in groups to form vapor flow lanes of decreasing cross-sectional area

- DIG 204 .Including a direct-contact heat exchange chamber
- DIG 205 .Space for condensable vapor surrounds space for coolant
- DIG 206 ..Including coiled heat exchange tube
- DIG 207 ..Distinct outlets for separated condensate and gas
- DIG 208 ...Including vapor guide plate extending across vapor inlet
- DIG 209 ...Including tube banks arranged in undulating pattern (e.g., w shape)
- DIG 210 ...Including perforated baffle completely surrounding a group of coolant tube
- DIG 211 ...Including concave member adjacent to vapor outlet and partially covering a group of coolant tubes
- DIG 212 ...Including inclined flat condensate guiding means
- DIG 213 ...Including baffle partially covering a group of coolant tubes
- DIG 214 ...Including baffle structure for reversing flow direction of vapor
- DIG 215 ..Having longitudinal partition extending parallel to longitudinal axis of coolant tube
- DIG 216 .. Having partition transverse to longitudinal axis of coolant tube
- DIG 217 .Space for coolant surrounds space for vapor
- DIG 218 ..Condensor adapted to cover opening at top of vapor generator
- DIG 219 ...Radiator cap condenser
- DIG 220 ..U-shaped or spur tubes connected to adjacent inlet and outlet headers
- DIG 221 .. Vapor is the only confined fluid
- DIG 222 ...Plural parallel tubes confining vapor connecting between spaced headers
- DIG 223 .. Vapor tube enclosed by coolant confining shell
- DIG 224 INCLUDING A MEANS TO FORM A FLUID JET
- DIG 225 WITH SOLID CONVEYOR
- DIG 226 .Screw conveyor

- DIG 227 .Belt conveyor
- DIG 228 WITH FAN OR PUMP
- DIG 229 .Screw conveyor in pipe or tank
- DIG 300 .Injector-type pump
- DIG 301 .. Having nested nozzles
- DIG 302 .Rotary gas pump
- DIG 303 .. Annular heat exchanger
- DIG 304 ... Axial impeller
- DIG 305Located at heat-exchange housing inlet
- DIG 306Located at heat-exchange housing outlet
- DIG 307 .. Including plural impellers
- DIG 308 ... Coaxial impellers
- DIG 309Radial impeller
- DIG 310 ..Heat exchanger located at housing inlet or outlet
- DIG 311 ..Including particular flow deflector (e.g., shroud, diffuser, etc.)
- DIG 312 ...Plural parallel deflectors
- DIG 313 ...Deflector with curved surface
- DIG 314 ..Radial impeller
- DIG 315 ...Located at heat-exchange housing inlet
- DIG 316 .. Axial impeller located at heatexchange housing inlet
- DIG 317 .. Axial impeller located at heatexchange housing outlet
- DIG 318 WITH DRIVEN AGITATOR
- DIG 319 .Linearly moving agitator
- DIG 320 .Fully rotary agitator
- DIG 321 .. Generating toroidal flow
- DIG 322 ..Including heat exchange jacketwalls
- DIG 323 ...Heating or cooling coil disposed between jacket-walls
- DIG 324 ... Agitator having blade sections mounted along rotating shaft
- DIG 325 ..Blade sections mounted along rotating shaft
- DIG 326 .. Agitator and heating or cooling coil disposed in same housing
- DIG 327 THERMOSYPHONIC HAVING VERTICAL AIR DRAFT PASSAGE
- DIG 328 .Air draft passage confined entirely or in part by fin structure
- DIG 329 ..Corrugated fin attached to heat transfer surface
- DIG 330 ..Air draft passage is parallel to flow direction of heating or cooling means

passages between adjacent

liquid passages

DIG 331 .Air draft passage confined	DIG 359Including means for modifying
entirely by heat transfer	thermal stress in heat
surface	exchange plate
DIG 332 Coaxial ducts define air draft	DIG 360 Stacked plates having plurality
passage and annular passage	of perforations
for heat exchange fluid	DIG 361Circular flow passages between
DIG 333Including baffle	plates
DIG 334Baffle located in annular	DIG 362Heat exchange liquids separated
passage DIG 335Plural air draft passages	by double walls DIG 363Slotted plates forming grid
enclosed by casing	
DIG 336Angled air draft passage	DIG 364With fluid traversing passages
DIG 337 .Heating or cooling means	formed through the plate
entirely surrounded by air	DIG 365Including peripheral seal element forming flow channel
draft passage forming casing	bounded by seal and heat
DIG 338 Nested or concentric members	exchange plates
define annular air draft	DIG 366Rigid or semi-rigid
passage and heating or cooling	peripheral seal frame
conduit	DIG 367Peripheral seal element
DIG 339With baffle	between corrugated heat
DIG 340 Including flow baffle in casing	exchange plates
DIG 341 Parallel heating or cooling	DIG 368Including angled
tubes or tubular sections	corrugations with respect to
(e.g., coil, serpentine, etc.)	flow direction
DIG 342 TANK WITH HEAT EXCHANGER	DIG 369Including seal to plate
DIG 343 .Heat exchanger forms all or	attachment means
portion of tank	DIG 370 Unitary heat exchange plate
DIG 344 Spiral coil forms hemispherical	and projecting edge
vessel	DIG 371 Including mating flanges
DIG 345Jacketed vessel	around fluid traversing
DIG 346Flow baffle or fin in annular	passage
flow space	DIG 372 Adjacent heat exchange plates
DIG 347 .Heat exchanger forms cover for	having joined bent edge
tank	flanges for forming flow
DIG 348 .Heat exchanger within tank	channels therebetween
DIG 349 Supported by cover for tank	DIG 373 Adjacent heat exchange plates
DIG 350 Tubing removably coupled to	having joined bent edge flanges for forming flow
inlet and outlet at tank wall	channels therebetween
DIG 351 Spaced from tank wall	DIG 374Liquid to air heat exchanger
DIG 352Flow directing baffle	having liquid passage formed
associated with heat exchanger tubing	by joined sheets
DIG 353 .Tube coil bonded directly to	DIG 375Transverse air tubes
tank exterior	DIG 376 Air passages defined by
DIG 354 .Heat exchanger serially	spacing projections of sheets
connected to tank	DIG 377Spacing projections formed
DIG 355 HAVING SEPARATE FLOW PASSAGE FOR	by folded sheet portions
TWO DISTINCT FLUIDS	DIG 378Including intermediate
DIG 356 .Plural plates forming a stack	sheet supporting opposed
providing flow passages	spacing projections
therein	DIG 379Including corrugated air fin
	nassages between adjacent

DIG 357 ...Forming annular heat exchanger

DIG 358 ...Radially arranged plates

DIG	380	Air fin conforms to joined corrugated sheets forming plural liquid chambers	DIG	410	Movable internal casing connecting to transverse element
		Including air fin aperturesOverlapping flanges	DIG	411	Connecting to shell by specific structure
		Interlocking flangesThermally bonded side edges	DIG	412	Including transverse element (e.g., fin, baffle, etc.)
		Bent sheet forming a single tube	DIG	413	For directing flow along the length of tube
DIG	386	To form only air passages	DIG	414	For supporting coil tubes
		Including side-edge seal or	DIG	415	Including perforations
		edge spacer bar	DIG	416	Extending transverse of shell
DIG	388	Including spacer bar			(e.g., fin, baffle, etc.)
		transverse to plate stack	DIG	417	Including spacer or support
DIG	389	Flow enhancer integral with			for transverse tube support or
		side-edge seal or edge spacer			shell-side flow director
		bar			Tubular spacer sleeve
DIG	390	Flange element to connect two	DIG	419	Spacer or support connected
	201	adjacent heat exchange plates	DTG	400	to shell
DIG	391	Including intermediate			Segmented plate
DIG	200	corrugated element			Disc and donut plates
DIG	392	Unitary heat exchange plate	DIG	422	Unitary tube support or
DTC	202	and projecting edge			shell-side flow director
DIG	393	Including additional element between heat exchange plates	DTC	123	carried by single tubeBar
DTC	301	Corrugated heat exchange plate			Forming grid structure
		.Monolithic core having flow			Having ends connected to
DIO	373	passages for two different	DIO	423	ring element
		fluids (e.g., one- piece	DTG	426	Clamped tube spacer or
		ceramic, etc.)	210		support
DIG	396	Plurality of stacked monolithic cores	DIG	427	Manifold for tube-side fluid (i.e., parallel)
DIG	397	Including conduits embedded in	DIG	428	Including flow director in
		monolithic block			manifold
DIG	398	.Spirally bent heat exchange	DIG	429	Line-connected conduit
		plate			assemblies
		.Corrugated heat exchange plate	DIG	430	Manifolds connected in
		.Shell enclosed conduit assembly			parallel (e.g., Multi-stage,
DIG	401	Including tube support or		404	etc.)
DIG	400	shell-side flow director			Manifolds connected in series
		Manifold for shell-side fluid			Including a tube sheet
DIG	403	Preheater for shell-side fluid			Tubes-tubesheet connection
		for preventing thermal shock	DIG	434	Plural strips forming
DTC	101	to tube sheetSerially connected separate	DTC	12E	tubesheetPlural bonded conduit end
DIG	404	shells	DIG	433	portions (i.e., tubesheet not
DTG	405	Extending in a longitudinal			needed)
DIO	100	direction	DTG	436	Bent conduit assemblies
DIG	406	Helically or spirally shaped			Coiled
		Internal casing or tube			Helical
		sleeve			Serially connected conduit
DIG	408	Tube sleeve	-		assemblies (i.e., no manifold)
		Including transverse element	DIG	440	Coiled conduit assemblies
		(e.g., fin, baffle, etc.)			Helical
			DIG	442	.Conduits

- DIG 443 ..Adjacent conduits with transverse air passages (e.g., radiator core type, etc.)
- DIG 444 ...Including transversely stacked fin sheets
- DIG 445 ...Including transverse corrugated fin sheets
- DIG 446 ...Including intermediate sheet between adjacent tubes forming air fin passages
- DIG 447Corrugated sheet
- DIG 448 ..Air conduits (e.g., radiator core type, etc.)
- DIG 449 .. Vertically stacked conduits
- DIG 450 ...Including integral abutting or interlocking elements
- DIG 451 .. Including bent conduits
- DIG 452 .. Including fins
- DIG 453 .Plural elements arranged to form a fluid passage

DIG 454 HAVING SIDE-BY-SIDE CONDUITS STRUCTURE OR CONDUIT SECTION

- DIG 455 .Readily detachable tubes having ends with distinct fluid coupling members engaging corresponding coupling members on manifold
- DIG 456 .Readily and independently detachable sections
- DIG 457 ..Individual manifolds for each section
- DIG 458 .Self-contained sections hydraulically connected in series
- DIG 459 .Strips with shaped, interfitted edges form heat exchanger core with plural passages
- DIG 460 ..With spacers interposed between adjacent passages
- DIG 461 .Plate fins formed with tubular projections which join with projections of adjacent plates to form parallel conduits
- DIG 462 .. Tapering, nested projections
- DIG 463 ...Conduits oblong in cross section
- DIG 464 .Conduits formed by joined pairs of matched plates
- DIG 465 .. Manifold space formed in end portions of plates
- DIG 466 ...Manifold spaces provided at one end only
- DIG 467 ..With turbulence enhancing pattern embossed on joined plates

- DIG 468 .Core formed by stack tubular members with abutting edges
- DIG 469 .Reinforcing rod or strip extends across parallel fin edges
- DIG 470 .Tensioning member within manifold
- DIG 471 .Plural parallel conduits joined by manifold
- DIG 472 ..U-shaped conduits connected to side-by-side manifolds
- DIG 473 ..With clamping member at joint between header plate and header tank
- DIG 474 ...With compressible seal at joint
- DIG 475 ...Header plate and tank of dissimilar materials
- DIG 476 .. Fusion joint (e.g., solder, braze) between tube plate and header tank
- DIG 477 ..Elastic seal element between conduit ends and receiving holes in header plate
- DIG 478 ...Separate means employed for mechanical attachment and hydraulic seal of conduit ends to header plate
- DIG 479 .. Tubes joined to tube plate with adhesive (e.g., glue or braze compound)
- DIG 480 .. Elongated support members extending between spaced manifolds
- DIG 481 ..Partitions in manifold define serial flow pattern for conduits/conduit groups
- DIG 482 ...Partitions are separate members
- DIG 483 ..Flow deflecting/retarding means in header for even distribution of fluid to plural tubes
- DIG 484 ...Orifices mounted at conduit ends
- DIG 485 ..Unitary ("one-piece") header structure
- DIG 486 .. Corrugated fins disposed between adjacent conduits
- DIG 487 ...Louvered
- DIG 488 ..Header is rounded in cross section (e.g., circular, oval)
- DIG 489 .. Two piece header structure
- DIG 490 ..Noncircular tube cross section (oval, triangular, etc.)

DIG 491 .. Manifolds formed in coreenclosing frame DIG 492 .Plural conduits with ends connected to tube plate DIG 493 .. Welded or fused joint between conduit end and plate DIG 494 .. Conduit end deformed (e.g., expanded) to affix to plate DIG 495 .Single unitary conduit structure bent to form flow path with side-by-side sections DIG 496 .. Spiral or helical coil DIG 497 ... Serpentine flow path with straight side-by-side sections DIG 498 ...Fin assembly extends across side-by-side sections DIG 499 .With parallel tubes or tube sections having ends joined to opposed frame members DIG 500 .Side-by-side conduits with fins DIG 501 .. Plate fins penetrated by plural DIG 538 .With particular flow connecting conduits DIG 502 ...Lanced DIG 503 Angled louvers DIG 504 ...Contoured fin surface DIG 505 .. Corrugated strips disposed between adjacent conduits DIG 506 .Side-by-side conduits with means (e.g., support grid) holding them in spaced relation DIG 507 .Straight side-by-side conduits joined for flow of one fluid DIG 508 ..Side-by-side conduits penetrate parallel plate-type fins DIG 509 .. Side-by-side conduits lie in common plane DIG 510 HAVING HEAT EXCHANGE SURFACE TREATMENT, ADJUNCT OR ENHANCEMENT DIG 511 .Polished heat transfer surface DIG 512 .Coated heat transfer surface DIG 513 .. Corrosion resistant DIG 514 .. Hydrophilic/hydrophobic coating DIG 515 .Patterned surface (e.g., knurled, grooved) DIG 516 .. Subsurface pockets formed DIG 517 .Roughened surface DIG 518 .Conduit with discrete fin structure DIG 519 ..porous or mesh DIG 520 .. Internal and external DIG 521 ...Pin fins penetrating conduit wall DIG 522 .. Transverse fins spaced along

conduit

- DIG 523 ... Separated by integral flanges engaging conduit exterior DIG 524 ..Longitudinally extending DIG 525 ...Helical DIG 526 Spine or loop fins DIG 527 ...Integrally formed DIG 528 .. Fin and conduit of diverse materials DIG 529 .With structure for promoting turbulence and/or breaking up laminar flow adjacent heat transfer surface DIG 530 .. Conduit insert DIG 531 .With wicking structure DIG 532 HEAT EXCHANGE CONDUIT STRUCTURE DIG 533 .Composite of diverse materials DIG 534 .. Concentric layers DIG 535 . Helically formed DIG 536 .Noncircular cross-section DIG 537 .. Oblong or elliptical structure
- DIG 539 HAVING A HEAT STORAGE MASS
