

| | | | |
|----|---|----|--|
| 1 | BREAST OR CHEST, E.G., BRASSIERES | 24 | ..Including panels having pleats or folds to permit size increase |
| 2 | ..With shoulder or back brace | | |
| 3 | ..With midriff covering extension terminating adjacent waistline, e.g., "longline" | 25 | ..Stepwise girth adjustment |
| 4 | ..With additional means interiorly attached to extension to support the diaphragm area | 26 | ..With separable fastener or connector for apparel-type garment |
| 5 | ..Midriff extension includes overlapping relatively movable parts | 27 | ..Low out at back |
| 6 | ..With means to attach extension to subjacent body-supporter or garment, e.g., hold-downs | 28 | ..With separable fastener or connector for apparel-type garment |
| 7 | ..Combined with subjacent body supporters, e.g., foundation garment | 29 | ..For hosiery |
| 8 | ..Including plural superimposed supporting panels or bands | 30 | ..Combined with apparel-type garment |
| 9 | ...With separable closure for each layer | 31 | ..Breast supporting member within other garment |
| 10 | ...Each layer separately encircles body | 32 | ...Removable breast supporter |
| 11 | ..Including apparel-type garment | 33 | ..Subjacent garment attached at front only |
| 12 | ..Vertically slidable overlapped portions between breast and torso support | 34 | ..With means providing girthwise elasticity for brassiere |
| 13 | ...With elastically extensible connector | 35 | ...Portion of garment covers elastic connector at back |
| 14 | ..Detachably secured to subjacent supporter by separable fastener | 36 | ..Closable aperture permits access to breast i.e., nursing type |
| 15 | ..Subjacent supporter unattached at front | 37 | ..With lacteal fluid receptor or shield |
| 16 | ..Subjacent supporter unattached at back | 38 | ..With inflatable or liquid-containing chambers |
| 17 | ..Front center separable closure for both breast and torso support | 39 | ..Molded preshaped shell-like cup, e.g., plastic latex |
| 18 | ..With size adjustment for both, e.g., maternity type | 40 | ..Strand-type fabric with thermoplastic fibers or filaments |
| 19 | ..Including plural elastic panels or inserts with diversely oriented lines of elasticity | 41 | ..With stiffening strips, strands, or stays, e.g., wired |
| 20 | ..Including elastic portions with varying modulus of elasticity | 42 | ..Cup form includes spirally arranged strip |
| 21 | ..Including elastic portion with stretch inhibitor of limit | 43 | ..Woven or braided strand-type fabric, e.g., wire gauze |
| 22 | ..Subjacent supporter includes crotch member | 44 | ..Cup form includes latticework of strips |
| 23 | ..Wraparound overlapped type torso support | 45 | ..Paired strips or stays for cup rims with connecting span |
| | | 46 | ...With separable joint between paired stays |
| | | 47 | ...Annular cup-rim-encircling stays |
| | | 48 | ...Stays with connecting span form U, V, H, or V shape between the breasts |
| | | 49 | ...Cup fabric has tunnels separably retaining joined stays |

| | | | |
|----|--|-----|--|
| 50 | ..Plural separate stays diagonally crossing between cups | 74 | .Including plural elastic panels or inserts with diversely oriented directions of elasticity |
| 51 | ..Annular cup-rim encircling stay individual to one cup | 75 | .Including elastic portions with variable modulus of elasticity |
| 52 | ..Single stay individual to one cup with arcuate portion along bottom rim of cup, e.g., U-shaped | 76 | .Including elastic portion with stretch inhibitor or limiter |
| 53 | .With stiffened supporting means contacting only lower half of breast | 77 | .With girthwise inelastic size adjustment additional to separable closure |
| 54 | .With means to separably retain breast-form-supplementing pads | 78 | .With means to gather peripheral edge, e.g., drawstring |
| 55 | .With cup-supplementing means to add volume to breast, e.g., pads | 79 | .Body band has overlapping separately secured ends |
| 56 | ..Applied to only lower half of breast | 80 | .Resilient body-clasping band |
| 57 | ..Pads, per se. | 81 | .With adhesive means or vacuum cup to secure to body |
| 58 | .Separable at front center | 82 | .Body-embracing band includes detachable connector unit |
| 59 | .With cup supplementing uplift straps or slings diagonally crossing at front center | 83 | .Body-embracing band means includes vertically spaced portions |
| 60 | .With floatingly attached cup-supplementing breast supporting strip or panel | 84 | ..One portion is narrow waist-encircling band |
| 61 | ..Forming breast-receiving pouch with cup bottom | 85 | .Extended length wraparound body bands |
| 62 | ..Supplementary means includes body-girdling straps | 86 | .Shoulder strap arrangements and connecting features |
| 63 | ..Attaching means includes adjustment feature | 87 | ..Connected by floating extension at or below horizontal mid-cup region |
| 64 | .Straps narrow bands only, i.e., skeletal type | 88 | ..Detachable, e.g., convertible to strapless |
| 65 | .Elastically expansible cup or cup rim | 89 | .With compartment for carrying articles, e.g., coin pocket |
| 66 | ..All-elastic cup | 90 | .With reinforcing stitching |
| 67 | ..Expansible cup rim, e.g., elastic shirring | 91 | .Reversible |
| 68 | ..With means to vary size of breast cups | 92 | .Methods of making or assembling |
| 69 | ..By vertical gathering of material between the cups | 93 | .Materials |
| 70 | .Cups joined to common subjacent elastic strip of panel | 94 | FOR LOWER TORSO INCLUDING THIGHS, E.G., CORSET, GIRDLES |
| 71 | .With variable length connector between cups | 95 | .Combined with apparel type garment |
| 72 | ..Elastic connector | 96 | .With shoulder or upper back brace |
| 73 | ...With additional nonelastic connector means | 97 | .Comprising sheet rubber or deposited rubber or latex |
| | | 98 | .With means bridging or filling out hollows in the body |
| | | 99 | .With individual buttock-receiving concavities |
| | | 100 | .With crotch or leg straps or leg-encircling parts |

| | | | |
|-----|---|-----|--|
| 101 | ..Upper-leg-encircling compressor, e.g., thigh reducers | 126 | ...With selectively different assembled positions |
| 102 | ..With detachably connected crotch piece | 127 | ..Each layer circumferentially separable, with closure |
| 103 | ...Completely removable | 128 | ..Each layer substantially separately encircles body |
| 104 | ..Including crotch piece, e.g., panty girdle | 129 | .Having pretensioning means bridging girthwise closure |
| 105 | ..With opening therethrough, e.g., overlapped panel | 130 | .Elastic portions have nonparallel lines of elasticity |
| 106 | ..Leg anchors | 131 | .Elastic bands or panels with varying modulus of elasticity or with stretch limiter |
| 107 | .Comprising latticework of narrow strips or bands, e.g., skeletal | 132 | .With elastic band, panel, or portion, e.g., gussets |
| 108 | .With apertured insert-type panel for ventilation | 133 | ..Detachably secured to garment |
| 109 | .With stiffener for upper margin, terminating substantially above lower margin, e.g., waistline antiroll | 134 | .Girth adjustment by predetermined increments |
| 110 | .With means to supportingly engage apparel-type garment, e.g., skirt supporters | 135 | ..With insertable or removable girth-changing units |
| 111 | ..Hosiery supporter | 136 | .Having girth adjuster and separate nonadjustable separable fastener for closure |
| 112 | .With means to resist vertical motion on body, e.g., friction grips | 137 | .With plural separately acting girth dimension adjusters |
| 113 | ..Over-shoulder straps | 138 | ..Vertically spaced |
| 114 | .With stiff or nonflaccid body- supporting plate or panel | 139 | .With stays at closure edges having nonflaccid interengaging fastening means |
| 115 | .With elastic portions having means to limit or control stretching thereof | 140 | .Plural disconnectable panels with selectively different assembled positions |
| 116 | .Elastic in entirety (may include nonelastic closures or girth adjusters) | 141 | .Lacing-type closure with flaccid lace-receiving eyelet or loop |
| 117 | ..Edge joined multipanel | 142 | .Closures or girth adjusters with interiorly disposed chafing shield |
| 118 | ...With nonparallel lines of elasticity | 143 | .With stiffening strips or stays |
| 119 | .Belt-operated lacing for closures or adjusters | 144 | ..Including stay-reinforcers at waistline or broken stay shields |
| 120 | .Vertically slidable overlapped portions, e.g., "telescoping" | 145 | ..Movably articulated directly one to another |
| 121 | .One portion laced through aperture in another portion | 146 | ..Readily separable from supporter, e.g., from pockets |
| 122 | .With superimposed supporting panels or bands | 147 | ..Having means to interengage with lacing cord |
| 123 | ..At least one layer includes elastic feature | 148 | .With closure means for access opening at lower rear margin of buttock girdling member |
| 124 | ...Superimposed elastic layers having nonparallel lines of elasticity | 149 | .With insertable or removable panel unit, e.g., "convertible" |
| 125 | ..Layers are readily separable (detachable) one from another | 150 | .With article carrying pockets |

- 151 .Panels reinforced by tapes or bands
- 152 .With loops for dooning
- 153 .Protective covers, liners, or shields
- 154 .Waistline type, i.e., limited vertical extent
- 155 .Abdominal uplifting sling type
- 156 .Materials and making, e.g., pattern layouts
