United States Patent and Trademark Office

DIAMOND&ZEBRA ELECTRIC

Reg. No. 7,021,285

Registered Apr. 11, 2023

Corrected Dec. 26, 2023

Int. Cl.: 7, 9, 11, 36, 37, 42

Service Mark

Trademark

Principal Register

DIAMOND&ZEBRA ELECTRIC MFG.CO., LTD. (JAPAN CORPORATION)
15-27, Tsukamoto 1-chome,
Yodogawa-ku, Osaka-shiOsaka 532-0026
JAPAN

CLASS 7: Ignition coils as parts of internal and external combustion engines; ignition coils for automotive engines; ignition coils for internal combustion engines; igniting devices for internal combustion engines, namely, sparking plugs for engines; starters for motors and engines; non-electric prime movers, namely, engines not for land vehicles; parts of non-electric prime movers, namely, engine cylinders; alternators; DC generators; dynamo brushes; chemical processing machines and apparatus, namely, dissolving machines for chemical processing and emulsifying machines for chemical processing; turbines, other than for land vehicles; control apparatus in the nature of brakes for electric motors; internal combustion engines, not for land vehicles, and their parts and accessories; generators of electricity and their parts; fuel injection devices for internal combustion engines; fuel conversion apparatus for internal combustion engines; electric motors in the nature of AC motors and DC motors, not including those for land vehicles but including parts for any AC motors and DC motors; fuel dispensing machines for service stations; fuel saving devices for internal combustion engines * boilers for nonelectric prime movers and engines *

CLASS 9: Electric storage batteries; circuit boards; electric power distribution machines; telecommunication machines and apparatus in the nature of cell phones, personal digital assistants, and remote control telemetering apparatus; solar batteries; electric capacitors; fuses; measuring or testing machines and instruments, namely, sensors, coordinate measuring machines, lasers for measuring, pressure measuring apparatus, battery testers and voltage testers; electric or magnetic meters and testers, namely, electricity meters, vibration meters, battery testers and voltage testers; electrical power supplies; resistance wires; electrodes; magnetic cores; grids for batteries; electric coils; electric power distribution or control machines and apparatus, and their parts; photovoltaic apparatus and installations in the nature of inverters, photovoltaic cells and photovoltaic modules, and their parts; touch panels; electric wires and cables; electric terminals for batteries; electric terminals for computers; electric earth terminals; testing apparatus for testing power conditioning systems, electric batteries and photovoltaic cells, not for medical purposes; electric reactors; current converters; choking coils for use in electrical apparatus; apparatus for conducting, switching, transforming, accumulating, regulating or controlling electricity; electrical transformers for telecommunication apparatus; computers; automatic adjusting and regulating machines and instruments in the nature of apparatus and instruments for automatically adjusting and regulating the distribution or use of electric current; electric sensors for controlling circuits as measurement apparatus, other than for medical use; electricity inductors; power line conditioners and their parts and accessories; photovoltaic inverters and their parts; solar panels for the production of electricity, and their parts; power transformers, namely, power transformers for amplification, electric transformers, electric voltage transformers and distribution transformers; capacitors; electric power conversion devices; electricity control machines and apparatus for devices, motors and actuators, and their parts; AC-DC power converters and their parts; analysing machines and

Katherine Kelly Vidal

Director of the United States
Patent and Trademark Office

instruments in the nature of analyzers for analyzing continuum, fluid, burning, electricity demand, materials, acoustics, heat transfer and frequency response; remote control apparatus for controlling electric power; remote maintenance and monitoring apparatus in the nature of computer hardware for photovoltaic apparatus and installations; electric power generating apparatus by using solar batteries with AC-DC converters for electric power; electric power generating apparatus by using fuel cells with AC-DC converters for electric power; electrode plates for electric capacitors; electrodes for electric capacitors; electronic control systems for internal combustion engines; electronic control systems for external combustion engines * ; Controllers for air conditioning apparatus; controllers for electric space cooling apparatus; controllers for gas and oil supply apparatus for household use; controllers for gas and oil fan heaters *

CLASS 11: [Controllers for air conditioning apparatus; controllers for electric space cooling apparatus;] * Recuperators * [recuperators] for chemical processing; steamers for chemical processing; cooling evaporators; distillation apparatus not for scientific purposes; heat exchangers not being parts of machines; gas burners; electric fires in the nature of electric fireplaces; [boilers for nonelectric prime movers and engines;] air conditioning apparatus; cooling machines and apparatus in the nature of freezers; [laundry dryers, electric, for industrial purposes;] tap water faucets; level controlling valves for tanks; waste water treatment tanks for industrial purposes; septic tanks for industrial purposes; garbage incinerators; solar water heaters; water purifying apparatus; electric lamps; [washers for water taps;] gas water heaters for household purposes; [nonelectric] * non-electric * cooking heaters for household purposes; household tap-water filters; [oil lamps;] waste water treatment tanks for household purposes; septic tanks for household purposes; industrial furnaces and their parts and accessories; nuclear reactors and their parts and accessories; air conditioners and their parts and accessories; air-conditioning apparatus and their parts and accessories; stoves being heating apparatus [; controllers for gas and oil supply apparatus for household use; controllers for gas and oil fan heaters]

CLASS 36: Advisory services in the field of investments and finance; management of buildings; leasing or renting of buildings; real estate agency services relating to the purchase and sale of buildings; providing information on buildings or land, namely, providing information about building and land appraisals and building and land lending and acquisition services; real estate affairs in the nature of tax appraisals, real estate consultancy, real estate lending services and real estate acquisition services; real estate agency services for the leasing or rental of buildings; real estate appraisal; leasing of land; land management in the nature of leasing of land; providing financial information; management of financial assets; management of crypto-assets for others; financial analysis services; providing real estate information for the purchase and sale of buildings; providing financial information in the field of crypto-assets; financial advisory services in the field of crypto-assets; electronic money brokerage services by using blockchain technology; financial management via the Internet by using blockchain technology, and their advisory and providing information services

CLASS 37: Machinery installation; Construction of office and residential buildings; construction consultancy; maintenance of building equipment; repair or maintenance of electric motors; repair or maintenance of power distribution or control machines and apparatus; repair or maintenance of power generators; installation, maintenance and repair of solar installations for generating power; repair or maintenance of electronic machines and apparatus; repair or maintenance of telecommunication machines and apparatus; repair or maintenance of measuring and testing machines and instruments; repair or maintenance of alternators; repair or maintenance of inverters; installation of solar panels; repair or maintenance of air conditioning apparatus; maintenance of in-house electric power generation facilities; maintenance of AC-DC converters for electric power; repair of AC-DC converters for electric power; advisory services in the field of machinery installation; consulting in the field of installation of AC-DC converters for electric power; consulting in the field of installation of power generating

apparatus with AC-DC converters for electric power; repair and maintenance of internal combustion engines, not for land vehicles

CLASS 42: Design and development of photovoltaic systems; monitoring of computer systems by remote access for detecting unauthorized access; computer software design, computer programming, and maintenance of computer software; rental of computers; providing user access to computer programs on data networks; research and development services relating to solar cells and electricity generation; provision of information concerning research and technical project studies relating to the use of natural energy; data encryption and decoding services; design of electric power inverters; advisory and providing information services in the field of information technology; updating of computer software; design of AC-DC converters for electric power; consulting in the field of design of AC-DC converters for electric power; remote monitoring of computer systems for quality control of solar photovoltaic installations; hosting computer software platforms by using blockchain technology; design of power generating apparatus with AC-DC converters for electric power; consulting in the field of design of power generating apparatus with AC-DC converters for electric power; research services in the field of electric power generation, transmission, distribution and use; testing, research, measuring and evaluation services of AC-DC converters for electric power to determine conformity with certification standards; testing, research, measuring and evaluation services of power generating apparatus with AC-DC converters for electric power to determine conformity with certification standards; providing research information and research results in the field of blockchain technology; design of electric power generators, electric power generation facilities, electric power supplying machines, apparatus, instruments and systems composed of such machines, apparatus and instruments, not including building and construction design; remote monitoring of operation conditions for solar photovoltaic installations for quality control purposes

THE MARK CONSISTS OF STANDARD CHARACTERS WITHOUT CLAIM TO ANY PARTICULAR FONT STYLE, SIZE OR COLOR

PRIORITY DATE OF 07-02-2021 IS CLAIMED

OWNER OF INTERNATIONAL REGISTRATION 1645555 DATED 07-30-2021, EXPIRES 07-30-2031

No claim is made to the exclusive right to use the following apart from the mark as shown: "ELECTRIC"

SER. NO. 79-333,863, FILED 07-30-2021

REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION

WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.

Requirements in the First Ten Years*

What and When to File:

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.* See 15 U.S.C. §1059.

Requirements in Successive Ten-Year Periods*

What and When to File:

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.*

Grace Period Filings*

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

***ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.

NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.
