NITROX

Reg. No. 7,159,462

Registered Sep. 12, 2023

Corrected Jan. 02, 2024

Int. Cl.: 7, 9

Trademark

Principal Register

XAAR PLC (UNITED KINGDOM PUBLIC LIMITED COMPANY)

Intellectual Property Team,

Ermine Business Park, 1 Hurricane CloseH

UNITED KINGDOM

CLASS 7: Machines for commercial or industrial use for the purposes of printing, namely, machine tools and, power-operated tools; motors and engines, except for land vehicles; machine coupling and transmission components, except for land vehicles; 3D printers; industrial printing machines; parts of machines, namely, powder delivery apparatus for 3D printing machines; parts of machines, namely, powder delivery apparatus for printing machines for the formation of three-dimensional objects from a powder bed; parts of machines, namely, powder recirculation apparatus for 3D printing machines; parts of machines, namely, powder spreading apparatus for 3D printing machines; printing machines for commercial or industrial use; industrial bookbinding machines; ink reservoirs being part of printing machines; Ink-jet printing machines and apparatus for commercial and industrial use; ink-jet printing machines and apparatus for industrial use; offset printers; industrial paper cutters and paper feeding machines; print shop machines, namely, industrial and commercial printing machines; parts of industrial and commercial printing machines in the nature of printhead components, namely, nozzle plates; printheads for industrial ink-jet printing machines; printheads for industrial and commercial printers; ink management and supply systems for industrial printing consisting primarily of inking apparatus for printing machines; printing cylinders being parts of industrial printing machines; printing ink supply systems as parts of industrial printers and composed primarily of ink reservoirs, ink pumps and ink connectors; printing plates; printing presses; printing rollers; commercial and industrial gravure printing machines; hot print foiling machines; labellers being machines; powder applying apparatus as part of printing machines; screen printing machines; machine tools for use in packaging; UV printing machines for commercial or industrial use; structural parts and fittings in the nature of printing plates, printing presses, printing rollers for the aforesaid goods * ; none of the foregoing comprising, including, incorporating, or for use with computer hardware for security, networking, or data load-balancing, or computer software for security, networking, or data load-balancing, or computer chips, semiconductors, integrated circuits, microprocessors, micro controllers, data storage devices, components, circuits, and electronic controllers that are not for the purposes of printing *

CLASS 9: Mechanisms for coin-operated apparatus; recorded and downloadable computer software for operating printing machines, computers and computer peripheral devices for operating, monitoring, and troubleshooting 3D printing machines and associated materials and equipment; component parts for printers, namely, ink supply components for use with printers, namely, unfilled ink cartridges; computer hardware for use with print heads; computer interface components for printers; recorded and downloadable computer software for controlling print quality; recorded and

Katherine Kelly Vidal

Director of the United States
Patent and Trademark Office

downloadable computer software for reporting ink temperature; recorded and downloadable computer software for reporting status of the print head in printing; recorded and downloadable computer software for use in adjusting print quality; recorded and downloadable computer software for use in operating printing machines and in connection with operating, monitoring, and troubleshooting printers; recorded and downloadable computer software for use with operating, monitoring, and troubleshooting print heads; computer-controlled document printers and photo printers; electric changeover switches as part of document printers; firmware being embedded operating software for print heads of document printers and photo printers; ink controller unit as part of document printers and photo printers; ink jet document printers; ink jet photo printers; ink management and supply systems for use with ink jet document printers comprised of unfilled ink cartridges, ink pumps and printheads; electronic printer control systems comprised of connection cables, printer interfaces, namely, computer network interface devices and electric changeover switches; print head cleaning appliances, namely, magnetic head cleaners, non-contact head cleaners, vacuum head cleaners, contact head cleaners, all for document and photo printers; ink-supply system consisting primarily of unfilled ink cartridges for printers; print head cleaning appliances, namely, magnetic head cleaners, non-contact head cleaners, vacuum head cleaners, contact head cleaners for document and photo printers; print heads for computer printers; print heads for ink-jet document printers and inkjet photo printers; computer hardware, namely, printer buffers; recorded and downloadable computer software, namely, printer operating programmes; document printers; photo printers; print heads for document printers and photo printers; recorded and downloadable operating software for print heads; recorded and downloadable controlling software for computer printers; digital colour document printers; digital colour photo printers; downloadable electronic publications, namely, books, leaflets and magazines in the field of printers and three dimensional printers; downloadable software applications for operating, monitoring, and troubleshooting three dimensional printers; laser document printers; laser photo printers; laser colour document printers; laser colour photo printers; recorded and downloadable software for management of and operation of printers; thermal printers * ; none of the foregoing comprising, including, incorporating, or for use with computer hardware for security, networking or data load-balancing, or computer software for security, networking, or data load-balancing, or computer chips, semiconductors, integrated circuits, microprocessors, micro controllers, data storage devices, components, circuits, and electronic controllers that are not for the purposes of printing *

THE MARK CONSISTS OF STANDARD CHARACTERS WITHOUT CLAIM TO ANY PARTICULAR FONT STYLE, SIZE OR COLOR

PRIORITY DATE OF 02-26-2021 IS CLAIMED

OWNER OF INTERNATIONAL REGISTRATION 1627504 DATED 08-26-2021, EXPIRES 08-26-2031

SER. NO. 79-326,211, FILED 08-26-2021

REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION

WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.

Requirements in the First Ten Years*

What and When to File:

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.* See 15 U.S.C. §1059.

Requirements in Successive Ten-Year Periods*

What and When to File:

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.*

Grace Period Filings*

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

***ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.

NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.
