

United States of America

United States Patent and Trademark Office

RMC

Reg. No. 5,911,050

Registered Nov. 19, 2019

Corrected Feb. 13, 2024

Int. Cl.: 9, 16, 42

Service Mark

Trademark

Principal Register

ROSENBERGER Hochfrequenztechnik GmbH & Co. KG (GERMANY GMBH & CO. KG)

Hauptstraße 1

83413 Fridolfing

GERMANY

CLASS 9: Electrical plugs, sockets and electric contacts for electric connections; plug-in connectors; electrical plugs; plug adaptors; electricity main apparatus for converting electronic radiation to energy, namely, PVT (photovoltaic thermal) module; apparatus and instruments for accumulating and storing electricity; apparatus and instruments for controlling electricity; electric and electronic components in the nature of electric contactors; photovoltaic apparatus for generating electricity; uninterruptable power supply apparatus; galena crystal detectors for use in electronics; regulated power supply apparatus; dc/ac power converters; mains electric power units, namely, batteries; charging stations for electric vehicles; power-line transmission apparatus; piezoelectric igniters used in connection with ballasts to start discharge lamps; electric power distribution units; uninterruptible power supply apparatus battery; ac/dc power converters; electricity measuring instruments, namely, clamp meters for measuring electricity; DVD recording apparatus; audiovisual apparatus, namely, audiovisual receivers; global positioning system [gps] apparatus; apparatus for the reproduction of images; apparatus for the transmission of images; data processing apparatus; satellite broadcasting instruments, namely, receiving antennas for satellite broadcast; charging appliances for rechargeable equipment; electrical remote control apparatus, namely, electric installations for the remote control of industrial operations; data communications apparatus being computers; cable harnesses being electric wire harnesses for automobiles; cable modems; cable connectors; cable adapters being electric adapter cables; usb cables; electrical cabling; mobile high definition link (mhl) cables; armatures for use in electrical apparatus; anodes; electric cable connection blocks being electric connections cable junctions for electric cables; terminal boxes for electric conductors; electricity junction boxes; tap boxes being pulse generators for testing electric current; connection boards being electric connectors; electric connection units being electric connectors; electric connection units being electric connectors; antenna cables being electric cable; antenna transmission wire being telephone wires; anticathodes; antistatic bags being static electricity eliminators; bus interfaces; chip coils being resistance wires; input modules being computers; memory storage devices, namely, computer memory hardware; decade switches being power switches; decorative switch plate covers; digital potentiometers; load cell digitizers; diodes; electric flasher switches; rotary switches being electric switches; electric terminal plugs being electric connectors; electric wiring harnesses for automobiles; electrical receivers, namely,

Katherine Kelly Vidal

Director of the United States
Patent and Trademark Office

mobile data receivers; coils, electric; electric or electronic lighting control modules being apparatus; splice electric connectors; electronic navigation systems being electronic navigational and positioning apparatus and instruments; electronic memory units being electronic memory card readers; electronic control systems for engines; electronic components used in machines, namely, electric wires; electronic chips for the manufacture of integrated circuits; electromagnetic electricity conduits; high frequency switches; radio frequency antennas; high frequency electroacoustic transducers; high frequency apparatus, namely, radio-frequency antennas; high frequency electric coils; radio-frequency transmitter; electronic high frequency convertors for high velocity electro motors; radio-frequency receivers; high-frequency switching power supplies; antenna filters; aerials; antennas and aerials as communications apparatus; antennas and aerials as components; aerials for telecommunications networks; aerial cables for heavy currents; antenna parameter measuring apparatus; measuring apparatus for temperature and humidity levels in gases and solid substances; digital measuring apparatus for temperature and humidity levels in gases and solid substances; level gauges with digital readout; detectors for electric meters; blank usb flash drives; usb dongles being wireless network adapters; usb web keys for automatically launching pre-programmed website URLs; usb chargers for batteries; usb chargers for batteries for electronic cigarettes; usb cables for cellphones

CLASS 16: Printed matter, namely, posters; year planners being printed matter in the nature of day planners; appointment diaries; writing pads

CLASS 42: Advisory services relating to science in the field of biology; scientific chemical analysis; scientific research; scientific laboratory services; computer aided scientific research services; computer aided scientific chemical analysis services; preparation of scientific reports for calculating and simulating flood flows; scientific computer programming services; scientific technological services, namely, computer programming; consultancy services relating to technological research in the field of automobiles; scientific and technological design in the field of automobiles; technological services relating to design, namely, computer programming, services for the provision of technological information in the field of automobiles; conducting technological feasibility studies in the field of machine tools; technological advisory services relating to machine engineering analysis; technological consultancy in the fields of energy production and use; geological estimations in the field of seismic technology provided engineers; consultancy services in the field of technological development for automobiles * all services not related to the treatment and recycling of organic waste and other materials suitable for composting *

THE MARK CONSISTS OF STANDARD CHARACTERS WITHOUT CLAIM TO ANY PARTICULAR FONT STYLE, SIZE OR COLOR

PRIORITY DATE OF 01-23-2018 IS CLAIMED

OWNER OF INTERNATIONAL REGISTRATION 1434084 DATED 06-27-2018, EXPIRES 06-27-2028

SER. NO. 79-245,344, FILED 06-27-2018

REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION

WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.

Requirements in the First Ten Years*

What and When to File:

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.* See 15 U.S.C. §1059.

Requirements in Successive Ten-Year Periods*

What and When to File:

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.*

Grace Period Filings*

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

***ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.

NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.
