# NTT XR

**Reg. No. 7,416,415**

**Registered Jun. 18, 2024**

**Corrected Jan. 07, 2025**

**Int. Cl.: 9, 35, 38, 40, 41, 42,  
45**

**Service Mark**

**Trademark**

**Principal Register**

Nippon Denshin Denwa Kabushiki Kaisha (Nippon Telegraph and Telephone Corporation) (JAPAN CORPORATION)  
5-1 Otemachi 1-chome,  
Chiyoda-ku Tokyo 100-8116  
JAPAN

CLASS 9: Downloadable computer game programs; recorded computer game programs; photographic machines and apparatus, namely, cameras, photographic cameras and photographic projectors; cinematographic machines and apparatus; optical machines and apparatus, namely, telescopes, optical cables, optical code readers, optical sensors, for industrial use; projection screens for movie films; measuring and testing machines and instruments, namely, digitizers and wearable activity trackers; diagnostic apparatus for detecting and analyzing machine blunder and breakdown, not for medical purposes; telecommunication machines and apparatus, namely, mobile phones, telephone apparatus, telephone sets, microphones, earphones, headsets, headphones, audio speaker, apparatus for transmission of communications, apparatus for broadcasting, recording, transmission and reproduction of sound and images, and digital cameras; remote control apparatus for radios, televisions, stereos, projectors, air-conditioning apparatus, and motors; personal digital assistants; optical data media, namely, blank optical data carriers; visual display units, namely, electronic pens, electronic LCD display unit with multi-networking (TCP/IP) capabilities, and digital signage; video display units, namely, head-mounted video displays, video displays mounted in eyeglasses, and video monitors; voice recognition systems comprised of computer hardware and downloadable voice recognition software; computers and their peripherals; computer hardware; data processing apparatus; wearable computers in the nature of smartwatches and smart glasses; wearable video display monitors; downloadable computer operating software for virtual worlds; downloadable computer operating system software for virtual worlds; downloadable computer software for creating virtual communities and providing access to the virtual worlds; downloadable computer application software for creating image files for use in virtual environments; downloadable computer software for the collection, editing, organizing, modifying, transmission, storage and sharing of data and information for use in online virtual worlds; downloadable computer software for managing computer and video games for use in social networking; downloadable cloud-computing software for deploying virtual machines to a cloud computing platform and managing virtual machines on a cloud computing platform; downloadable computer programs for project management; downloadable computer software for processing digital music files; downloadable interactive game software; downloadable computer software for sending and receiving electronic messages, graphics, images and audio, and audio visual content via global communication networks; downloadable computer software for voice recognition, image recognition and video recognition; downloadable computer programs and software for managing the electronic storage of data; downloadable computer programs and software for managing telecommunication networks in connection with cloud

Acting Director of the United States Patent and Trademark Office

computing services; downloadable computer programs for integration of private and public cloud computing environments; downloadable computer programs for providing cloud hosting services; downloadable computer software and computer programs for use in the fields of electronic payments, for encryption and decryption of information, and for processing credit card transactions in the field of electronic commerce; downloadable computer software for data management and accessing a global computer network and interactive computer communications network which provides information on a wide variety of topics of public interest in the fields of business, computers, culture, and electronic commerce; downloadable computer programs for database integration and database management; downloadable computer software for use in computer security for ensuring data security, internet security through preventing computer viruses, preventing computer risks through ensuring the security of downloadable data, computer system threat analysis, computer virus scanning, identity management, penetration testing of computers and networks to assess information security vulnerability; downloadable computer software for user authentication; downloadable computer software for indexing and making searchable data from any application, server and network device; downloadable computer software for downloading data from a computer network; downloadable computer programs and computer software for data integration, data manipulation, data analysis, development of predictive systems and privacy management; downloadable computer software programs to design, operate and manage information communication technology (ICT) systems of others; downloadable computer software that enables users to administer, manage and optimize cloud resources and ICT resources; downloadable computer software for setting up and configuring local and wide area networks; downloadable LAN (local area network) operating software; downloadable VPN (virtual private network) operating software; downloadable WAN (wide area network) operating software; downloadable computer software for administration of computer networks; downloadable network access server operating software; downloadable computer software for monitoring and controlling communication between computers and automated machine systems; personal digital assistants in the shape of a watch; smartphones; electron tubes; semi-conductor elements, namely, thermistors, diodes and transistors; electronic circuits, not including those recorded with computer programs; downloadable computer software for remote control of electronic devices and household electrical appliances; optical character recognition apparatus (OCR); downloadable augmented reality software for playing computer games; downloadable augmented reality software for use in mobile devices for integrating electronic data with real world environments for the purpose of locating vehicles, and creating maps; downloadable computer software for simulating augmented reality experiences in virtual reality space; downloadable virtual reality software for playing computer games, pilot training, and medical teaching; downloadable virtual reality training simulation software in the fields of carpentry, spray painting techniques, and air traffic control; downloadable interactive computer software for product management; computer whiteboards; downloadable computer whiteboard software for displaying images; electronic interactive whiteboards; computer hardware and downloadable computer software for providing secure remote access to computer and communication networks; downloadable computer software for facilitating data visualizations; downloadable computer application software for streaming of audio and video media content via the Internet; downloadable computer application software for facilitating email, voice and text message communication on mobile phones; downloadable computer software for processing images, graphics and text; electronic pocket translators; recording media, namely, magnetic disks, magnetic tapes and integrated circuit cards recorded with computer programs for operating virtual worlds, creating virtual communities, creating image files for use in virtual environments, providing access to the virtual worlds, managing computer and video games for use in social networking, deploying virtual machines to a cloud computing platform and managing virtual machines on a cloud computing platform, processing digital music files, images, graphics and text, sending and receiving electronic messages, graphics, images and audio, and audio visual content via global communication networks, managing the electronic storage of data, managing telecommunication networks in connection with cloud computing services, providing

cloud hosting services, indexing and making searchable data from any application, server and network device, downloading data from a computer network, setting up and configuring local and wide area networks, monitoring and controlling communication between computers and automated machine systems; recording media, namely, magnetic disks, magnetic tapes and integrated circuit cards recorded with computer programs for the collection, editing, organizing, modifying, transmission, storage and sharing of data and information for use in online virtual worlds; recording media, namely, magnetic disks, magnetic tapes and integrated circuit cards recorded with computer programs for project management, voice recognition, image recognition, video recognition, integration of private and public cloud computing environments, database integration, database management, user authentication, data integration, data manipulation, data analysis, development of predictive systems, privacy management, and administration of computer networks; recording media, namely, magnetic disks, magnetic tapes and integrated circuit cards recorded with interactive game software; recording media, namely, magnetic disks, magnetic tapes and integrated circuit cards recorded with computer programs for use in the fields of electronic payments, for encryption and decryption of information, and for processing credit card transactions in the field of electronic commerce; recording media, namely, magnetic disks, magnetic tapes and integrated circuit cards recorded with computer programs for data management and accessing a global computer network and interactive computer communications network which provides information on a wide variety of topics of public interest in the fields of business, computers, culture, and electronic commerce; recording media, namely, magnetic disks, magnetic tapes and integrated circuit cards recorded with computer programs for use in computer security for ensuring data security, internet security through preventing computer viruses, preventing computer risks through ensuring the security of downloadable data, computer system threat analysis, computer virus scanning, identity management, penetration testing of computers and networks to assess information security vulnerability; recording media, namely, magnetic disks, magnetic tapes and integrated circuit cards recorded with computer programs to design, operate and manage information communication technology (ICT) systems of others; recording media, namely, magnetic disks, magnetic tapes and integrated circuit cards recorded with computer programs that enables users to administer, manage and optimize cloud resources and ICT resources; recording media, namely, magnetic disks, magnetic tapes and integrated circuit cards recorded with LAN (local area network) operating software, VPN (virtual private network) operating software, and WAN (wide area network) operating software; recording media, namely, magnetic disks, magnetic tapes and integrated circuit cards recorded with network access server operating software; electronic image analyzers, namely, optical character recognition apparatus; downloadable virtual reality game software; downloadable virtual reality game software featuring crypto tokens for use in online virtual worlds; headsets for virtual reality games; virtual reality headsets adapted for use in playing video games; spectacles, namely eyeglasses; downloadable game programs for home video game machines; electronic circuits and CD-ROMs recorded with programs for hand-held games with liquid crystal displays; electronic circuits and CD-ROMs recorded with automatic performance programs for electronic musical instruments; downloadable music files; pre-recorded video discs and video tapes featuring sports, music live concerts, shows and plays, and virtual tours; audio recordings featuring music, novels, poetry, and current events news; downloadable electronic publications in the nature of books, magazines and manuals in the fields of arts, crafts, sports, virtual reality, augmented reality, mixed reality, metaverse, risk management, regulatory compliance management, computers, computer hardware, computer software, cloud computing, IT security, information risk management, information security management, combinatorial optimization, optical computing, machine learning, network analysis, and Coherent Network Computing; downloadable images files and video files containing sports, games, entertainment events, music live concerts, shows and plays, and virtual tours; downloadable image files of avatars for use in virtual worlds; downloadable virtual goods in the nature of image files of clothing, footwear, eyewear, headwear, toys, jewelry, and handbags for use in online virtual worlds; downloadable virtual goods in the nature of image files of combat game accessories, namely, swords,

explosives, guns and crossbows for use in online virtual worlds; exposed cinematographic films; exposed slide films; slide film mounts; electronic circuits; pre-recorded media, namely, DVD, video tapes, video discs and CD-ROMs containing newspapers, magazines, books, photographic images and text in the fields of sports, music live concerts, shows and plays, and virtual tours; pre-recorded media, namely, DVD, video tapes, video discs and CD-ROMs containing geographic maps, architectural drawings; [ humanoid robots with artificial intelligence for use in scientific research; ] teaching robots with artificial intelligence; telepresence robots

CLASS 35: Advertising and publicity services; organization, arranging and conducting of exhibitions, trade fairs and events for promoting the goods and services of others, and providing information and advice relating thereto; dissemination of advertising for others via on-line communications networks on the internet; promoting the goods and services of others through the administration of sales and promotional incentive schemes involving trading stamps; promoting the goods and services of others through the distribution, administration and settlement of coupons, rewards cards and discount privilege cards, and providing information relating thereto; business management analysis and business consultancy; business management, business administration and business assistance, and providing advice and information relating thereto; marketing research and analysis; providing information concerning commercial sales; providing information on business efficiency using computers and office machines; marketing services; systemization and compilation of information into computer databases, and providing information and advice relating thereto; providing information concerning commercial sales using virtual reality systems; arranging commercial transactions, for others, via on-line shops; marketing services based on analysis of big data, data logs and electronic data; financial statement preparation, and providing information relating to preparation, auditing and attesting of financial statements; office functions, namely filing, in particular documents and magnetic tapes; employment agency services; providing business assistance to others in the operation of data processing apparatus namely, computers, typewriters and other similar office machines; providing commercial information and advice for consumers in the choice of products and services; retail store services and wholesale stores services both featuring electrical machinery and electrical machinery apparatuses; arranging subscriptions to telecommunication services for others by telephones, mobile phones, facsimiles and computer terminals, and providing information relating thereto; collection of big data, namely, compiling statistics and data for business purposes; provision of information relating to collection of big data results for business purposes; data processing using computer

CLASS 38: Telecommunication services, namely, telecommunications access services, gateway services, routing and junction services, wireless telephone services, electronic data interchange, providing virtual private network (VPN) services; facsimile transmission; communications by computer; communications by computer terminals; mobile telephone communication; providing access to a blog, chat room, bulletin board or discussion service; transmission, broadcasting and reception of audio, video, still and moving images, text and data in real time via wireless communication networks, and the Internet; transmission, broadcasting and reception of audio, video, still and moving images, text and data via wireless communication networks, and the Internet; line resale, namely, leasing of telecommunication lines; providing access to telecommunication networks, and providing advice and information relating thereto; advisory services relating to telecommunications; providing information in the field of telecommunications; teleconferencing services; providing access to remote telecommunication networks via computer terminals; video conferencing services; providing access to electronic shops, being telecommunication networks; transmission of data, audio, video and multimedia files, including downloadable files and files streamed over a global computer network; providing remote Internet access; providing access to on-line chat lines; streaming of video; streaming of data; news agencies, namely, the transmission of news items to news reporting organizations; rental of telecommunication equipment including telephones and facsimile apparatus

CLASS 40: Food processing and providing information relating thereto; processing of cinematographic films and providing information relating thereto; photographic enlarging and providing information relating thereto; photographic printing and providing information relating thereto; photographic film development and providing information relating thereto; creating digital photographs in the nature of photograph developing and the provision of information relating thereto; bookbinding and providing information relating thereto; recycling of waste and trash and providing information relating thereto; rental of machines and apparatus for film development, photograph printing, photograph enlargement or photograph finishing; providing information relating to material treatment; printing and providing information relating thereto; sorting and destruction of waste and trash

CLASS 41: Educational and instruction services, namely, conducting programs, classes, conferences, workshops, lectures, tutorial sessions, on-line and telephonic instruction and courses in the fields of arts, crafts, sports, virtual reality, augmented reality, mixed reality, metaverse, risk management, regulatory compliance management, computers, computer hardware, computer software, cloud computing, IT security, information risk management, information security management, combinatorial optimization, optical computing, machine learning, network analysis, and Coherent Network Computing; training services in the fields of arts, crafts, sports, virtual reality, augmented reality, mixed reality, metaverse, risk management, regulatory compliance management, computers, computer hardware, computer software, cloud computing, IT security, information risk management, information security management, combinatorial optimization, optical computing, machine learning, network analysis, and Coherent Network Computing; arranging, conducting and organization of seminars; arranging, conducting and organization of workshops, lectures and symposiums; arranging, conducting and organization of seminars, workshops, symposiums and lectures on the Internet, and providing information relating thereto; providing online non-downloadable electronic publications in the nature of books, magazines and manuals in the fields of arts, crafts, sports, virtual reality, augmented reality, mixed reality, metaverse, risk management, regulatory compliance management, computers, computer hardware, computer software, cloud computing, IT security, information risk management, information security management, combinatorial optimization, optical computing, machine learning, network analysis, and Coherent Network Computing; reference libraries of literature and documentary records; book rental; publication of books; publication of printed matter in electronic form; editing of electronic publications; arranging and planning of movies, shows, plays and musical performances; movie theatre presentations and movie film production and distribution; providing online non-downloadable videos in the fields of sports, games, entertainment events, music live concerts, shows and plays, and virtual tours; presentation of motion pictures; presentation of live show performances; direction and presentation of plays; presentation of musical performances; providing online non-downloadable audio recordings featuring novels, poetry and current events news; providing digital music from the Internet, not downloadable; production of radio and television programs; operation of video and audio equipment for production of radio and television programs; production and distribution of audio and video recordings, and still and moving images; organization, arranging and conducting of sports competitions; organization of social entertainment events, excluding movies, shows, plays, musical performances, sports, horse races, bicycle races, boat races and auto races; arranging and conducting of live entertainment events in the nature of live events for parties and special events for social entertainment purposes; providing audio and video studio services; providing sports facilities; providing amusement facilities; providing amusement facilities and play facilities that allow simulated experiences of virtual reality using computer graphics technology; providing amusement facilities that provide virtual reality experiences; providing amusement facilities that provide augmented reality experiences; providing amusement facilities that provide mixed reality experiences; providing amusement facilities that allow simulated experiences in virtual reality using communications including mobile communications; virtual reality game services provided on-line from a computer network; providing online computer game

services; providing facilities for movies, shows, plays, music or educational training; booking of seats for shows; arranging for ticket reservations, ticket reservation and providing reservation availability information in relation to concerts, events, plays and sports; toy rental; rental of amusement machines and apparatus; rental of game machines and apparatus; photography; language interpretation; translation

CLASS 42: Architectural design; surveying; providing information and advice relating to architectural design; designing of machines, apparatus, instruments (including their parts) or systems composed of such machines, apparatus and instruments, and providing information and advice relating thereto; industrial design services; graphic design and design of data visualization materials; computer software design, computer programming, and maintenance of computer software, and providing information and advice relating thereto; consultancy in the fields of computer system design and maintenance of computer software for computer systems; providing search engines for the internet; providing search engines for obtaining data on a global computer network; analysis of technical big data and computerised big data storage; providing information on analysis of technical results and computerised results storage of big data; design, development and maintenance of communication network systems and providing information and advice relating thereto; design, programming, and maintenance of application programs for personal digital assistants, and providing information and advice relating thereto; monitoring of computer programs and computer systems by remote access to ensure proper functioning; off-site data backup; recovery of computer data; installation, configuration, conversion, updating and duplication of computer programs, and providing information and advice relating thereto; user authentication services for accessing computer networks; design, programming, development and maintenance of virtual reality software; computer programming and maintenance of computer programs for information retrieval, communication, and translation used for communications by computer terminals; technological advice relating to operation of computers, automobiles and industrial machines; research in the field of building construction; research in the field of city planning; testing or research on prevention of pollution; testing or research on electricity; testing or research on civil engineering; testing or research in the field of telecommunication and mobile communication technology; quality control for others; testing the functionality of machines, apparatus and instruments; research on machines, apparatus and instruments; research and development of new products for others; research and consultancy services relating to computer software development; technology research and consultancy services relating to computer software; testing on the functionality of telecommunication machines and apparatus; scientific research on telecommunication machines and apparatus; testing on the functionality of machines, equipment and instruments; scientific research on machines, equipment and instruments; computer system analysis and providing information relating thereto; computer technology consultancy; providing information relating to computer technology and programming via a website; consultancy and information services relating to information technology (IT); technical writing; providing research information in the fields of science and technology; rental of computers; providing temporary use of online non-downloadable computer operating software for virtual worlds; providing temporary use of online non-downloadable computer operating system software for virtual worlds; providing temporary use of online non-downloadable computer software for creating virtual communities and providing access to the virtual worlds; providing temporary use of online non-downloadable computer application software for creating image files for use in virtual environments; providing temporary use of online non-downloadable computer software for the collection, editing, organizing, modifying, transmission, storage and sharing of data and information for use in online virtual worlds; providing temporary use of online non-downloadable computer software for managing computer and video games for use in social networking; providing temporary use of online non-downloadable cloud-computing software for deploying virtual machines to a cloud computing platform and managing virtual machines on a cloud computing platform; providing temporary use of online non-downloadable computer programs for project management; providing temporary use of online non-downloadable computer software for processing digital

music files, images, graphics and text; providing temporary use of online non-downloadable interactive game software; providing temporary use of online non-downloadable computer software for sending and receiving electronic messages, graphics, images and audio, and audio visual content via global communication networks; providing temporary use of online non-downloadable computer software for voice recognition, image recognition and video recognition; providing temporary use of online non-downloadable computer programs and software for managing the electronic storage of data; providing temporary use of online non-downloadable computer programs and software for managing telecommunication networks in connection with cloud computing services; providing temporary use of online non-downloadable computer programs for integration of private and public cloud computing environments; providing temporary use of online non-downloadable computer programs for providing cloud hosting services; providing temporary use of online non-downloadable computer software and computer programs for use in the fields of electronic payments, for encryption and decryption of information, and for processing credit card transactions in the field of electronic commerce; providing temporary use of online non-downloadable computer software for data management and accessing a global computer network and interactive computer communications network which provides information on a wide variety of topics of public interest in the fields of business, computers, culture, and electronic commerce; providing temporary use of online non-downloadable computer programs for database integration and database management; providing temporary use of online non-downloadable computer software for use in computer security for ensuring data security, internet security through preventing computer viruses, preventing computer risks through ensuring the security of downloadable data, computer system threat analysis, computer virus scanning, identity management, penetration testing of computers and networks to assess information security vulnerability; providing temporary use of online non-downloadable computer software for user authentication; providing temporary use of online non-downloadable computer software for indexing and making searchable data from any application, server and network device; providing temporary use of online non-downloadable computer software for downloading data from a computer network; providing temporary use of online non-downloadable computer programs and computer software for data integration, data manipulation, data analysis, development of predictive systems and privacy management; providing temporary use of online non-downloadable computer software programs to design, operate and manage information communication technology (ICT) systems of others; providing temporary use of online non-downloadable computer software that enables users to administer, manage and optimize cloud resources and ICT resources; providing temporary use of online non-downloadable computer software for setting up and configuring local and wide area networks; providing temporary use of online non-downloadable LAN (local area network) operating software, VPN (virtual private network) operating software, and WAN (wide area network) operating software; providing temporary use of online non-downloadable computer software for administration of computer networks; providing temporary use of online non-downloadable network access server operating software; providing temporary use of online non-downloadable computer software for monitoring and controlling communication between computers and automated machine systems; providing temporary use of online non-downloadable computer game programs; providing temporary use of online non-downloadable computer software for remote control of electronic devices and household electrical appliances; providing temporary use of online non-downloadable augmented reality software for playing computer games; providing temporary use of online non-downloadable augmented reality software for use in mobile devices for integrating electronic data with real world environments for the purpose of locating vehicles, and creating maps; providing temporary use of online non-downloadable computer software for simulating augmented reality experiences in virtual reality space; providing temporary use of online non-downloadable virtual reality software for playing computer games, pilot training, and medical teaching; providing temporary use of online non-downloadable virtual reality training simulation software in the fields of carpentry, spray painting techniques, and air traffic control; providing temporary use of online non-downloadable interactive

computer software for product management; providing temporary use of online non-downloadable computer whiteboard software for displaying images; providing temporary use of online non-downloadable computer software for providing secure remote access to computer and communication networks; providing temporary use of online non-downloadable computer software for facilitating data visualizations; providing temporary use of online non-downloadable computer application software for streaming of audio and video media content via the Internet; providing temporary use of online non-downloadable computer application software for facilitating email, voice and text message communication on mobile phones; providing temporary use of online non-downloadable virtual reality game software; providing temporary use of online non-downloadable virtual reality game software featuring crypto tokens for use in online virtual worlds; providing temporary use of online non-downloadable game programs for home video game machines; rental of computer operating software for virtual worlds; rental of computer operating system software for virtual worlds; rental of computer software for creating virtual communities and providing access to the virtual worlds; rental of computer application software for creating image files for use in virtual environments; rental of computer software for the collection, editing, organizing, modifying, transmission, storage and sharing of data and information for use in online virtual worlds; rental of computer software for managing computer and video games for use in social networking; rental of cloud-computing software for deploying virtual machines to a cloud computing platform and managing virtual machines on a cloud computing platform; rental of computer programs for project management; rental of computer software for processing digital music files, images, graphics and text; rental of interactive game software; rental of computer software for sending and receiving electronic messages, graphics, images and audio, and audio visual content via global communication networks; rental of computer software for voice recognition, image recognition and video recognition; rental of computer programs and software for managing the electronic storage of data; rental of computer programs and software for managing telecommunication networks in connection with cloud computing services; rental of computer programs for integration of private and public cloud computing environments; rental of computer programs for providing cloud hosting services; rental of computer software and computer programs for use in the fields of electronic payments, for encryption and decryption of information, and for processing credit card transactions in the field of electronic commerce; rental of computer software for data management and accessing a global computer network and interactive computer communications network which provides information on a wide variety of topics of public interest in the fields of business, computers, culture, and electronic commerce; rental of computer programs for database integration and database management; rental of computer software for use in computer security for ensuring data security, internet security through preventing computer viruses, preventing computer risks through ensuring the security of downloadable data, computer system threat analysis, computer virus scanning, identity management, penetration testing of computers and networks to assess information security vulnerability; rental of computer software for user authentication; rental of computer software for indexing and making searchable data from any application, server and network device; rental of computer software for downloading data from a computer network; rental of computer programs and computer software for data integration, data manipulation, data analysis, development of predictive systems and privacy management; rental of computer software programs to design, operate and manage information communication technology (ICT) systems of others; rental of computer software that enables users to administer, manage and optimize cloud resources and ICT resources; rental of computer software for setting up and configuring local and wide area networks; rental of LAN (local area network) operating software, VPN (virtual private network) operating software, and WAN (wide area network) operating software; rental of computer software for administration of computer networks; rental of network access server operating software; rental of computer software for monitoring and controlling communication between computers and automated machine systems; rental of computer game programs; rental of computer software for remote control of electronic devices and household electrical appliances; rental of augmented reality software for playing computer games; rental of augmented

reality software for use in mobile devices for integrating electronic data with real world environments for the purpose of locating vehicles, and creating maps; rental of computer software for simulating augmented reality experiences in virtual reality space; rental of virtual reality software for playing computer games, pilot training, and medical teaching; rental of virtual reality training simulation software in the fields of carpentry, spray painting techniques, and air traffic control; rental of interactive computer software for product management; rental of computer whiteboard software for displaying images; rental of computer software for providing secure remote access to computer and communication networks; rental of computer software for facilitating data visualizations; rental of computer application software for streaming of audio and video media content via the Internet; rental of computer application software for facilitating email, voice and text message communication on mobile phones; rental of virtual reality game software; rental of virtual reality game software featuring crypto tokens for use in online virtual worlds; rental of game programs for home video game machines; providing virtual computer systems through cloud computing; software as a service (SaaS) services featuring software for operating virtual worlds; software as a service (SaaS) services featuring software for creating virtual communities and providing access to the virtual worlds; software as a service (SaaS) services featuring computer application software for creating image files for use in virtual environments; software as a service (SaaS) services featuring software for the collection, editing, organizing, modifying, transmission, storage and sharing of data and information for use in online virtual worlds; software as a service (SaaS) services featuring software for managing computer and video games for use in social networking; software as a service (SaaS) services featuring software for deploying virtual machines to a cloud computing platform and managing virtual machines on a cloud computing platform; software as a service (SaaS) services featuring software for project management; software as a service (SaaS) services featuring software for processing digital music files, images, graphics and text; software as a service (SaaS) services featuring interactive game software; software as a service (SaaS) services featuring software for sending and receiving electronic messages, graphics, images and audio, and audio visual content via global communication networks; software as a service (SaaS) services featuring software for voice recognition, image recognition and video recognition; software as a service (SaaS) services featuring software for managing the electronic storage of data; software as a service (SaaS) services featuring software for managing telecommunication networks in connection with cloud computing services; software as a service (SaaS) services featuring software for integration of private and public cloud computing environments; software as a service (SaaS) services featuring software for providing cloud hosting services; software as a service (SaaS) services featuring software for use in the fields of electronic payments, for encryption and decryption of information, and for processing credit card transactions in the field of electronic commerce; software as a service (SaaS) services featuring software for data management and accessing a global computer network and interactive computer communications network which provides information on a wide variety of topics of public interest in the fields of business, computers, culture, and electronic commerce; software as a service (SaaS) services featuring software for database integration and database management; software as a service (SaaS) services featuring software for use in computer security for ensuring data security, internet security through preventing computer viruses, preventing computer risks through ensuring the security of downloadable data, computer system threat analysis, computer virus scanning, identity management, penetration testing of computers and networks to assess information security vulnerability; software as a service (SaaS) services featuring software for user authentication; software as a service (SaaS) services featuring software for indexing and making searchable data from any application, server and network device; software as a service (SaaS) services featuring software for downloading data from a computer network; software as a service (SaaS) services featuring software for data integration, data manipulation, data analysis, development of predictive systems and privacy management; software as a service (SaaS) services featuring software to design, operate and manage information communication technology (ICT) systems of others; software as a service (SaaS) services featuring software that enables users to administer, manage and optimize cloud

resources and ICT resources; software as a service (SaaS) services featuring software for setting up and configuring local and wide area networks; software as a service (SaaS) services featuring software for administration of computer networks; software as a service (SaaS) services featuring network access server operating software; software as a service (SaaS) services featuring software for monitoring and controlling communication between computers and automated machine systems; rental of computer server memory space; rental of peripheral devices for computers; providing on-line non-downloadable computer programs for mobile phone and smartphones, and providing information and advice relating thereto; platform as a service (PaaS) featuring computer software platforms for operating virtual worlds; platform as a service (PaaS) featuring computer software platforms for creating virtual communities and providing access to the virtual worlds; platform as a service (PaaS) featuring computer software application platforms for creating image files for use in virtual environments; platform as a service (PaaS) featuring computer software platforms for the collection, editing, organizing, modifying, transmission, storage and sharing of data and information for use in online virtual worlds; platform as a service (PaaS) featuring computer software platforms for managing computer and video games for use in social networking; platform as a service (PaaS) featuring computer software platforms for deploying virtual machines to a cloud computing platform and managing virtual machines on a cloud computing platform; platform as a service (PaaS) featuring computer software platforms for project management; platform as a service (PaaS) featuring computer software platforms for processing digital music files, images, graphics and text; platform as a service (PaaS) featuring interactive game software platforms; platform as a service (PaaS) featuring computer software platforms for sending and receiving electronic messages, graphics, images and audio, and audio visual content via global communication networks; platform as a service (PaaS) featuring computer software platforms for voice recognition, image recognition and video recognition; platform as a service (PaaS) featuring computer software platforms for managing the electronic storage of data; platform as a service (PaaS) featuring computer software platforms for managing telecommunication networks in connection with cloud computing services; platform as a service (PaaS) featuring computer software platforms for integration of private and public cloud computing environments; platform as a service (PaaS) featuring computer software platforms for providing cloud hosting services; platform as a service (PaaS) featuring computer software platforms for use in the fields of electronic payments, for encryption and decryption of information, and for processing credit card transactions in the field of electronic commerce; platform as a service (PaaS) featuring computer software platforms for data management and accessing a global computer network and interactive computer communications network which provides information on a wide variety of topics of public interest in the fields of business, computers, culture, and electronic commerce; platform as a service (PaaS) featuring computer software platforms for database integration and database management; platform as a service (PaaS) featuring computer software platforms for use in computer security for ensuring data security, internet security through preventing computer viruses, preventing computer risks through ensuring the security of downloadable data, computer system threat analysis, computer virus scanning, identity management, penetration testing of computers and networks to assess information security vulnerability; platform as a service (PaaS) featuring computer software platforms for user authentication; platform as a service (PaaS) featuring computer software platforms for indexing and making searchable data from any application, server and network device; platform as a service (PaaS) featuring computer software platforms for downloading data from a computer network; platform as a service (PaaS) featuring computer software platforms for data integration, data manipulation, data analysis, development of predictive systems and privacy management; platform as a service (PaaS) featuring computer software platforms to design, operate and manage information communication technology (ICT) systems of others; platform as a service (PaaS) featuring computer software platforms that enables users to administer, manage and optimize cloud resources and ICT resources; platform as a service (PaaS) featuring computer software platforms for setting up and configuring local and wide area networks; platform as a service (PaaS) featuring computer software platforms for administration of computer networks;

platform as a service (PaaS) featuring network access server operating software platforms; platform as a service (PaaS) featuring computer software platforms for monitoring and controlling communication between computers and automated machine systems; providing on-line non-downloadable virtual reality software; hosting of multimedia and interactive applications; providing on-line non-downloadable computer software for scientific and technological analysis by artificial intelligence (AI)

CLASS 45: Security guarding for facilities; personal bodyguarding; monitoring of security systems for protecting people or personal property; surveillance services and security guarding of facilities via remote monitoring systems, and providing information relating to thereto; security guard services; personal security consultancy; physical security consultancy; fortune-telling; non-therapeutic counselling rendered to meet the needs of individuals; information relating to fashion coordination services for individuals; online social networking services; house sitting and personal shopping for others, and providing information relating thereto; personal concierge services for others comprising making requested personal arrangements and reservations and providing customer-specific information to meet individual needs

THE MARK CONSISTS OF STANDARD CHARACTERS WITHOUT CLAIM TO ANY PARTICULAR FONT STYLE, SIZE OR COLOR

PRIORITY DATE OF 03-24-2022 IS CLAIMED

OWNER OF INTERNATIONAL REGISTRATION 1716260 DATED 09-22-2022, EXPIRES 09-22-2032

No claim is made to the exclusive right to use the following apart from the mark as shown: XR

SER. NO. 79-364,125, FILED 09-22-2022

**WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.**

**Requirements in the First Ten Years\***

**What and When to File:**

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.\* See 15 U.S.C. §1059.

**Requirements in Successive Ten-Year Periods\***

**What and When to File:**

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.\*

**Grace Period Filings\***

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

**\*ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

**NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.**

**NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.**
