Reg. No. 7,583,126

Registered Dec. 03, 2024

Corrected May 13, 2025

Int. Cl.: 9, 35, 37, 38, 42

Service Mark

Trademark

Principal Register

Siempelkamp Maschinen- und Anlagenbau GmbH (GERMANY GmbH)
47803 Krefeld
Siempelkampstr. 75
Krefeld, GERMANY 47803

CLASS 9: Apparatus, instruments and cables for electricity, namely, electrical cables, data cables; apparatus and instruments for accumulating and storing electricity, namely, batteries and battery charge devices; apparatus and instruments for controlling electricity, namely, electric control devices for energy management; electric and electronic components, namely, protection relays; electrical circuits and circuit boards; electric cables and wires; electrical switch cabinets; electronic controllers for servo motors; measuring, detecting, monitoring and controlling devices and electrical apparatus in the nature of electrical controlling devices; control and adjustment apparatus; electricity transformers; apparatus and instruments for switching the use of electricity; electrical instruments for switching the distribution of electricity; electric apparatus for commutation; repeaters in the nature of ethernet repeaters; electronic amplifiers for measuring, signalling and controlling machines and systems; signal processing convertors; communications equipment, namely, communication modems; information technology and audio-visual, multimedia and photographic devices, namely, digital media streaming devices; electronic regulators for regulating voltage; electric light regulators; plugboards; distribution amplifiers; electrical distributors in the nature of power distributing boxes; electrical distribution boards; measuring apparatus, namely, distance measuring devices; electronic meters; electric control apparatus, namely, electric control panels; electric control apparatus, namely, electronic control systems for machines; testing devices for electronic parts; electric power distribution apparatus; downloadable robotic process automation (RPA) software; recorded content, namely, machine data files; downloadable software for operating machinery; electronic database in the field of machine operation recorded on computer media; computer databases, in the field of machine data recorded on computer media; downloadable software for monitoring, analysing, controlling and running physical world operations; physical analysing apparatus other than for medical use, namely, audio and video analyzers; downloadable machine learning software for analysis; downloadable artificial intelligence software for analysis; downloadable computer software for collecting, analyzing and organizing data in the field of deep learning; closed circuit television cameras; electric monitoring units; electric monitoring control apparatus; video cameras adapted for monitoring purposes; surveillance apparatus and instruments, namely, surveillance cameras, digital video recording devices; monitoring instruments, namely, energy meters for tracking and monitoring energy usage; downloadable computer software for the monitoring of computer systems; digital sensors for monitoring physical movements; electric monitoring apparatus, namely, voltage regulators; downloadable machine learning software for surveillance and analysis; electronic sensors, detectors and monitoring instruments, namely, motion detectors; downloadable cloud network monitoring software; industrial automation controls; downloadable industrial automation software; downloadable artificial intelligence software for operating machinery; downloadable artificial intelligence software for surveillance;

Coke Moya Smeut

Acting Director of the United States Patent and Trademark Office

downloadable interactive software based on artificial intelligence; downloadable software for the integration of artificial intelligence and machine learning in the field of big data; process monitors, namely, computer monitors; downloadable process controlling software; electric process controlling apparatus; electronic process controlling apparatus; power process control digital controllers; electric power process controllers; electric power process control apparatus; electronic power process controlling apparatus; electric process controllers for operating machinery; electric process control apparatus for operating machinery; electronic process controlling apparatus for operating machinery; navigation, guidance, tracking, targeting and map making devices, namely, GPS tracking devices; data storage devices and media, namely, a nonvolatile storage medium that employs integrated circuits; electrical and mechanical data processing equipment and accessories, namely, computer hardware; signal cables for IT, AV and telecommunication, namely, cables for optical signal transmission; computer networking hardware and data communications equipment, namely, modems; point-to-point communications equipment, namely, modems; computers and computer hardware; electronic sensors; electric sensors; optical sensors; electric sensors for use with machine tools; electric sensor controllers; electric sensors for measuring instruments; electric sensors used in plant control; electric sensors for determining position; electric Internet of Things (IoT) sensors; network communication apparatus, namely, network routers; downloadable network operating system programs; downloadable communications networking software; local area network hardware; downloadable computer software platforms for social networking; downloadable computer software for wireless network communications; telecommunications apparatus for use with mobile networks, namely, mobile network routers; downloadable smart manufacturing software for operating machinery; electronic smart manufacturing system controls; downloadable editing software; downloadable computer operating system software; downloadable operating systems programs; recorded computer operating system software; downloadable factory automation software; downloadable production support software; downloadable computer programs for connecting remotely to computers or computer networks; computer hardware for remotely accessing and transmitting data; downloadable software for remotely accessing and controlling a computer; cloud network servers; downloadable cloud server software; downloadable cloud computing software for operating machinery; downloadable application software for cloud computing services; downloadable cloud computing software, for operating machinery; downloadable optimisation software; automatic control apparatus, namely, electronic apparatus and instruments for controlling, adjusting and testing of drives and motors and other machine parts; automatic control apparatus, namely, electronic apparatus and instruments for controlling, adjusting and testing of drives and motors and other machine parts; electric control installations, namely, electronic apparatus and instruments for controlling, adjusting and testing of drives and motors and other machine parts; electric control apparatus, namely, electronic apparatus and instruments for controlling, adjusting and testing of drives and motors and other machine parts; electronic control units for regulating start-up electrical motors; electronic control instruments, namely, electronic apparatus and instruments for controlling, adjusting and testing of drives and motors and other machine parts; electronic control systems, namely, electronic apparatus and instruments for controlling, adjusting and testing of drives and motors and other machine parts; electronic programmable controllers for testing of motors and other machine parts; downloadable industrial process control software; photographic apparatus and instruments, namely, cameras and video cameras; cinematographic machines and apparatus, namely, cameras and video cameras; optical apparatus and instruments, namely, cameras and video cameras; weighing apparatus and instruments, namely, weighing machines; nautical apparatus and instruments; surveying apparatus and instruments; measuring apparatus and instruments for distance measuring apparatus; signalling apparatus and instruments, namely, signalling buoys; life-saving apparatus and instruments, namely, life preservers; apparatus and instruments for accumulating electricity, namely, electrical power distribution units; apparatus and instruments for switching electricity, namely, power switches; apparatus and instruments for transforming electricity, namely, electric voltage transformers; apparatus and instruments for regulating electricity, namely, voltage regulators;

apparatus and instruments for conducting electricity, namely, electric conductors; sound transmitting apparatus; apparatus for the transmission of images, namely, electric cables; apparatus for the reproduction of images; sound reproduction apparatus; apparatus for recording images; sound recording apparatus; recorded media, namely, pre-recorded electronic media devices featuring voltage regulation information and other machine process information; downloadable media in the nature of downloadable audio and video recordings featuring voltage regulation information and other machine process information; downloadable computer software for operating machinery; blank digital or analogue recording and storage media; mechanisms for coin-operated apparatus; cash registers; calculating machines; computers; peripheral equipment adapted for use with computers; downloadable virtual goods, namely image files of virtual glue, virtual plant components, virtual mineral content, virtual plastics, virtual metals, virtual lubricants, virtual resins, virtual carbon fibres; fire-extinguishing apparatus; parts, fittings and accessories for all the aforesaid goods, namely, computer hardware and peripherals therefor

CLASS 35: Business assistance, management and administrative services; advertising, marketing and promotional services; business consultancy and advisory services; business administrative support and data processing services; business analysis and business information services, and market research

CLASS 37: Services of electricians, namely, electrical contractor services; computer hardware and telecommunication apparatus installation, maintenance and repair; repair of energy supply installations; installation services of regulators being parts of machines; installation services of control mechanisms for machines, engines or motors; installation services of generators of electricity; installation services of machines and machine tools for treatment of materials and for manufacturing; installation services of steam engines; installation services of steam engine boilers for power generation, other than for land vehicles; installation services of crushing machines; installation services of mills and crushing machines; installation services of mills being machines; installation services of sifters; installation services of sorting machines for industry; installation services of conveyors and conveyors belts; installation services of conveyors; installation services of belts for conveyors; installation services relating to conveyors; installation services of conveyors being machines; installation services of rolling conveying machines; installation services of automatic conveyor installations; installation services of assembly line conveyor machinery; installation services of spiral conveyors being machines; installation services of woodworking machines; installation services of machine tools for woodworking machines; installation services of woodworking machines; installation services of industrial robots; installation services of material production and processing machines; installation services of moving and handling equipment; installation services of process control units being mechanical control units; installation services of process control instruments being mechanical control units; installation services of machine tools; installation services of bucket conveyors; installation services of Archimedian screws; installation services of blowing machines; installation services of mills being machines; installation services of impact grinding crushers; installation services relating to ball mills; installation services of pulping machines; installation services of injection moulding machines; installation services of briquetting machines; installation services of sifting machines; installation services of cyclones; installation services of disintegrators; installation services of extracting machines; installation services of hammers being parts of machines; installation services of power operated tools; installation services of motors, other than for land vehicles; installation services of propulsion mechanisms, other than for land vehicles; installation services of power transmission couplings other than for land vehicles; installation services of transmission components except for land vehicles; installation services of agricultural implements other than hand operated hand tools; installation services of lifting and hoisting equipment, elevators and escalators; installation services of attrition machines for cleaning; installation services of sweeping, cleaning, washing and laundering machines; installation services relating to exterior clearing and cleaning machines; installation services of separating machines; installation

services of filtering machines, separators and centrifuges; installation services of agricultural, earthmoving, construction, oil and gas extraction and mining equipment; installation services of sifting installations; installation services relating to electric strainers; installation services of screening machines; installation services of sieves being machines or parts of machines; installation services of bonding machines; installation services of mixing machines; installation services of contacting machines being mixing machines; installation services of industrial mixing machines; installation services of shaping and moulding machines; installation services of foundry machines; installation services of metal production machines; installation services of cast iron parts for pipes being parts of machines; installation services of spraying machines; installation services of dispensing machines; installation services of automatic dispensing machines; installation services of mechanical mixing machines; installation services of blending machines for chemical processing; installation services of vacuum pumps being machines; installation services of vacuum packaging machines; installation services of vacuum packaging machines; installation services of electric machines for grinding; repair and maintenance of regulators being parts of machines; repair and maintenance of control mechanisms for machines, engines or motors; repair and maintenance of generators of electricity; repair and maintenance of machines and machine tools for treatment of materials and for manufacturing; repair and maintenance of steam engines; repair and maintenance of steam engine boilers for power generation, other than for land vehicles; repair and maintenance of crushing machines; repair and maintenance of mills and crushing machines; repair and maintenance of mills being machines; repair and maintenance of sifters; repair and maintenance of sorting machines for industry; repair and maintenance of conveyors and conveyors belts; repair and maintenance of conveyors; repair and maintenance of belts for conveyors; repair and maintenance of conveyors; repair and maintenance of conveyors being machines; repair and maintenance of rolling conveying machines; repair and maintenance of automatic conveyor installations; repair and maintenance of assembly line conveyor machinery; repair and maintenance of spiral conveyors being machines; repair and maintenance of woodworking machines; repair and maintenance of machine tools for woodworking machines; repair and maintenance of woodworking machines; repair and maintenance of industrial robots; repair and maintenance of material production and processing machines; repair and maintenance of moving and handling equipment; repair and maintenance of process mechanical control units; repair and maintenance of mechanical process control instruments; repair and maintenance of machine tools; repair and maintenance of bucket conveyors; repair and maintenance of archimedian screws; repair and maintenance of blowing machines; repair and maintenance of mills being machines; repair and maintenance of impact grinding crushers; repair and maintenance of ball mills; repair and maintenance of pulping machines; repair and maintenance of injection moulding machines; repair and maintenance of briquetting machines; repair and maintenance of sifting machines; repair and maintenance of cyclones; repair and maintenance of disintegrators; repair and maintenance of extracting machines; repair and maintenance of hammers being parts of machines; repair and maintenance of power operated tools; repair and maintenance of motors, other than for land vehicles; repair and maintenance of propulsion mechanisms, other than for land vehicles; repair and maintenance of power transmission couplings other than for land vehicles; repair and maintenance of transmission components except for land vehicles; repair and maintenance of agricultural implements other than hand operated hand tools; repair and maintenance of lifting and hoisting equipment, elevators and escalators; repair and maintenance of attrition machines for cleaning; repair and maintenance of sweeping, cleaning, washing and laundering machines; repair and maintenance of exterior clearing and cleaning machines; repair and maintenance of separating machines; repair and maintenance of filtering machines, separators and centrifuges; repair and maintenance of agricultural, earthmoving, construction, oil and gas extraction and mining equipment; repair and maintenance of sifting installations; repair and maintenance of electric strainers; repair and maintenance of screening machines; repair and maintenance of sieves being machines or parts of machines; repair and maintenance of bonding machines; repair and maintenance of mixing machines; repair and maintenance of contacting machines being mixing machines; repair and maintenance of industrial

mixing machines; repair and maintenance of shaping and moulding machines; repair and maintenance of foundry machines; repair and maintenance of metal production machines; repair and maintenance of cast iron parts for pipes being parts of machines; repair and maintenance of spraying machines; repair and maintenance of dispensing machines; repair and maintenance of automatic dispensing machines; repair and maintenance of mechanical mixing machines; repair and maintenance of blending machines for chemical processing; maintenance and repair of vacuum pumps; repair and maintenance of vacuum packaging machines; repair and maintenance of vacuum packaging machines; repair and maintenance of electric machines for grinding; construction, modernisation, development, installation and building of industrial installations and machine plants; construction, modernisation, development, installation and building of industrial installations and machine plants for crushing technology; installation services of clack valves being parts of machines; installation services of wheels and tracks for machines; installation services of apparatus, instruments and cables for electricity; installation services of apparatus and instruments for accumulating and storing electricity; installation services of apparatus and instruments for controlling electricity; installation services of electric and electronic components; installation services of electrical circuits and circuit boards; installation services of electric cables and wires; installation services of electrical switch cabinets; installation services of electronic controllers; installation services relating to measuring, detecting, monitoring and controlling devices; installation services relating to controllers and regulators; installation services of electricity transformers; installation services relating to apparatus and instruments for switching the use of electricity; installation services relating to apparatus and instruments for switching the distribution of electricity; installation services of electric apparatus for commutation; installation services of repeaters; installation services of electronic amplifiers; installation services of signal convertors; installation services of communications equipment; installation services of information technology and audio-visual, multimedia and photographic devices; installation services of electronic regulators; installation services relating to electrical controllers; installation services of plugboards; installation services of distribution amplifiers; installation services of electrical distributors; installation services of electricity distribution boards; installation services of measuring apparatus; installation services of electronic meters; installation services of electric control apparatus; installation services of electric control apparatus; installation services of testing devices for electronic parts; installation services of electric power distribution apparatus; installation services of physical analysing apparatus other than for medical use; installation services of closed circuit television cameras; installation services of electric monitoring units; installation services of electric monitoring control apparatus; installation services of video cameras adapted for monitoring purposes; installation services relating to checking being supervision of apparatus and instruments; installation services of monitoring instruments; installation services relating to sensors for monitoring physical movements; installation services of monitoring apparatus, other than for medical purposes; installation services relating to sensors, detectors and monitoring instruments; installation services relating to industrial automation controls; installation services of process monitors; installation services of electric process controlling apparatus; installation services of electronic process controlling apparatus; installation services of process control digital controllers; installation services of electric process controllers; installation services relating to electric process controlling apparatus; installation services of electronic process controlling apparatus; installation services of navigation, guidance, tracking, targeting and map making devices; installation services relating to data storage devices and media; installation services of data processing equipment and [accessories,electrical] * accessories, electrical * and mechanical; installation services of signal cables for IT, AV and telecommunication; installation services of computer networking and data communications equipment; installation services of point-to-point communications equipment; installation services of computers and computer hardware; installation services relating to sensors; installation services of electric sensors; installation services of optical sensors; installation services of sensors for use with machine tools; installation services of sensor controllers; installation services of sensors for measuring instruments; installation services of sensors used in plant control; installation services of

sensors for determining position; installation services relating to internet of things (IoT) sensors; installation services of network communication apparatus; installation services of local area networks; installation services of telecommunications apparatus for use with mobile networks; installation services relating to smart manufacturing system controls; installation services relating to operating systems; installation services relating to computer hardware for remotely accessing and transmitting data; installation services of cloud servers; installation services of automatic control apparatus; installation services of automatic control apparatus; installation services of electric control installations; installation services of electric control apparatus; installation services of electronic control units; installation services of electronic control instruments; installation services of electronic control systems; installation services of programmable controllers; installation services of photographic apparatus and instruments; installation services of cinematographic machines and apparatus; installation services of optical apparatus and instruments; installation services of weighing apparatus and instruments; installation services of nautical apparatus and instruments; installation services of surveying apparatus and instruments; installation services of measuring apparatus and instruments; installation services of signalling apparatus and instruments; installation services of life-saving apparatus and instruments; installation services relating to apparatus and instruments for accumulating electricity; installation services relating to apparatus and instruments for switching electricity; installation services relating to apparatus and instruments for transforming electricity; installation services relating to apparatus and instruments for regulating electricity; installation services relating to apparatus and instruments for conducting electricity; installation services of sound transmitting apparatus; installation services of apparatus for the transmission of images; installation services of apparatus for the reproduction of images; installation services of sound reproduction apparatus; installation services of apparatus for recording images; installation services of sound recording apparatus; installation services of coin-operated mechanisms; installation services of cash registers; installation services relating to calculating devices; installation services of computers; installation services of peripherals adapted for use with computers; installation services of diving suits; installation services of fire extinguishers; installation services of drying installations; installation services of industrial drying installations; installation services of drying installations; installation services of burners, boilers and heaters; installation services of burners; installation services of burners for solid fuel; installation services of burners for industrial use; installation services of stoves being heating apparatus; installation services of furnaces for industrial use; installation services relating to biogas stoves; installation services of ventilating fans; installation services of heating, ventilating, and air conditioning and ambient purification equipment; repair and maintenance of clack valves being parts of machines; repair and maintenance of wheels and tracks for machines; repair and maintenance of apparatus, instruments and cables for electricity; repair and maintenance of apparatus and instruments for accumulating and storing electricity; repair and maintenance of apparatus and instruments for controlling electricity; repair and maintenance of electric and electronic components; repair and maintenance of electrical circuits and circuit boards; repair and maintenance of electric cables and wires; repair and maintenance of electrical switch cabinets; repair and maintenance of electronic controllers; repair and maintenance of measuring, detecting, monitoring and controlling devices; repair and maintenance of controllers and regulators; repair and maintenance of electricity transformers; repair and maintenance of apparatus and instruments for switching the use of electricity; repair and maintenance of apparatus and instruments for switching the distribution of electricity; repair and maintenance of electric apparatus for commutation; repair and maintenance of repeaters; repair and maintenance of electronic amplifiers; repair and maintenance of signal convertors; repair and maintenance of communications equipment; repair and maintenance of information technology and audio-visual, multimedia and photographic devices; repair and maintenance of electronic regulators; repair and maintenance of electrical controllers; repair and maintenance of plugboards; repair and maintenance of distribution amplifiers; repair and maintenance of electrical distributors; repair and maintenance of electricity distribution boards; repair and maintenance of measuring apparatus; repair and maintenance of electronic meters; repair and maintenance of

electric control apparatus; repair and maintenance of electronic control apparatus; repair and maintenance of testing devices for electronic parts; repair and maintenance of electric power distribution apparatus; repair and maintenance of physical analysing apparatus other than for medical use; repair and maintenance of closed circuit television cameras; repair and maintenance of electric monitoring units; repair and maintenance of electric monitoring control apparatus; repair and maintenance of video cameras adapted for monitoring purposes; repair and maintenance of checking (supervision) apparatus and instruments; repair and maintenance of monitoring instruments; repair and maintenance of sensors for monitoring physical movements; repair and maintenance of monitoring apparatus, other than for medical purposes; repair and maintenance of sensors, detectors and monitoring instruments; repair and maintenance of industrial automation controls; repair and maintenance of process monitors; repair and maintenance of electric process controlling apparatus; repair and maintenance of electronic process controlling apparatus; repair and maintenance of process control digital controllers; repair and maintenance of electric process controllers; repair and maintenance of electric process controlling apparatus ; repair and maintenance of electronic process controlling apparatus; repair and maintenance of navigation, guidance, tracking, targeting and map making devices; repair and maintenance of data storage devices and media; repair and maintenance of data processing equipment and electrical and mechanical accessories; repair and maintenance of signal cables for IT, AV and telecommunication; repair and maintenance of computer networking and data communications equipment; repair and maintenance of point-to-point communications equipment; repair and maintenance of computers and computer hardware; repair and maintenance of sensors; repair and maintenance of electric sensors; repair and maintenance of optical sensors; repair and maintenance of sensors for use with machine tools; repair and maintenance of sensor controllers; repair and maintenance of sensors for measuring instruments; repair and maintenance of sensors used in plant control; repair and maintenance of sensors for determining position; repair and maintenance of internet of things (IOT) sensors; repair and maintenance of network communication apparatus; repair and maintenance of local area networks; repair and maintenance of telecommunications apparatus for use with mobile networks; repair and maintenance of smart manufacturing system controls; repair and maintenance of operating systems; repair and maintenance of computer hardware for remotely accessing and transmitting data; repair and maintenance of cloud servers; repair and maintenance of automatic control apparatus; repair and maintenance of electric control installations; repair and maintenance of electric control apparatus; repair and maintenance of electronic control apparatus; repair and maintenance of electronic control units; repair and maintenance of electronic control instruments; repair and maintenance of electronic control systems; repair and maintenance of programmable controllers; repair and maintenance of photographic apparatus and instruments; repair and maintenance of cinematographic machines and apparatus; repair and maintenance of optical apparatus and instruments; repair and maintenance of weighing apparatus and instruments; repair and maintenance of nautical apparatus and instruments; repair and maintenance of surveying apparatus and instruments; repair and maintenance of measuring apparatus and instruments; repair and maintenance of signalling apparatus and instruments; repair and maintenance of life-saving apparatus and instruments; repair and maintenance of apparatus and instruments for accumulating electricity; repair and maintenance of apparatus and instruments for switching electricity; repair and maintenance of apparatus and instruments for transforming electricity; repair and maintenance of apparatus and instruments for regulating electricity; repair and maintenance of apparatus and instruments for conducting electricity; repair and maintenance of sound transmitting apparatus; repair and maintenance of apparatus for the transmission of images; repair and maintenance of apparatus for the reproduction of images; repair and maintenance of sound reproduction apparatus; repair and maintenance of apparatus for recording images; repair and maintenance of sound recording apparatus; repair and maintenance of coin-operated mechanisms; repair and maintenance of cash registers; repair and maintenance of calculating devices; repair and maintenance of computers; repair and maintenance of peripherals adapted for use with computers; repair and maintenance of fire extinguishers; repair and maintenance of drying installations; repair and

maintenance of industrial drying installations; repair and maintenance of burners, boilers and heaters; repair and maintenance of burners; repair and maintenance of burners for solid fuel; repair and maintenance of burners for industrial use; repair and maintenance of stoves being heating apparatus; repair and maintenance of furnaces for industrial use; repair and maintenance of biogas stoves; repair and maintenance of ventilating fans; repair and maintenance of heating, ventilating, and air conditioning and ambient purification equipment; installation services of pressing machines; installation services of industrial machine presses; installation services of mechanical presses for metalworking; installation services of hydraulic presses for metalworking; installation services of presses being machines for industrial purposes; repair and maintenance of pressing machines; repair and maintenance of industrial machine presses; repair and maintenance of mechanical presses for metalworking; repair and maintenance of hydraulic presses for metalworking; repair and maintenance of presses being machines for industrial purposes; installation services of spreading machines; repair and maintenance of spreading machines; installation services relating to scatterers; repair and maintenance of scatterers; installation services relating to forming lines; repair and maintenance of forming lines

CLASS 38: Telecommunication services, namely, routing and junction services; rental of telecommunications facilities and equipment; communications by computer and providing access to the internet; communications by computer and internet access provider services; access to content, websites and portals, namely, broadcasting services

CLASS 42: Engineering services relating to energy supply systems; technological consultancy in the fields of energy production and use; development of databases; product research and development; science and technology services, namely, computer technology consultancy; IT consulting services relating to installation, maintenance and repair of computer software; testing, authentication, namely, quality control services; computer hardware development; software development, computer programming and implementation, namely, implementation and use of computer hardware; hosting services and providing software as a service featuring software for operating machinery and rental of software; IT consultancy, advisory and information services; IT security, protection and restoration, namely, services relating to installation, maintenance and repair of computer software; rental of computer hardware and facilities; data duplication and conversion services; data coding services; new product design services; new product design and development; development of industrial machinery; development of new products; development of power assemblies; development of industrial products; research and development services; industrial development services; development of products in the field of industrial electronics, namely, products for measuring and regulating technology, signal processing and interface technology; analysis of product development, namely, product failure analysis services; conducting technical project studies; engineering project management services; IT project management; designing prototypes; repair and maintenance of computer software; maintenance of computer software databases; installation services relating to robotic process automation (RPA) software; installation services relating to software; installation in relation to computer software databases; installation services relating to software for monitoring, analysing, controlling and running physical world operations; installation services relating to machine learning software for analysis; installation services relating to artificial intelligence software for analysis; installation services relating to downloadable computer software for collection, analysing and organising data in the field of deep learning; installation services relating to computer software for the monitoring of computer systems; installation services relating to machine learning software for surveillance; installation services relating to cloud network monitoring software; installation services relating to industrial automation software; installation services relating to artificial intelligence software; installation services relating to artificial intelligence software for surveillance; installation services relating to interactive software based on artificial intelligence; installation services relating to software for the integration of artificial intelligence and machine learning in the field of big data; installation services relating to process controlling software; installation services

relating to network operating system programs; installation services relating to networking software; installation services relating to computer software platforms for social networking; installation services relating to computer software for wireless network communications; installation services relating to smart manufacturing software; installation services relating to editing software; installation services relating to computer operating programs; installation services relating to operating system programs; installation services relating to computer operating system software; installation services relating to factory automation software; installation services relating to production support software; installation services relating to computer programs for connecting remotely to computers or computer networks; installation services relating to downloadable software for remotely accessing and controlling a computer; installation services relating to cloud server software; installation services relating to cloud computing software; installation services relating to application software for cloud computing services; installation services relating to downloadable cloud computing software; installation services relating to optimisation software; installation services relating to industrial process control software; installation services relating to downloadable media software; installation services relating to computer software; repair and maintenance of robotic process automation (RPA) software; repair and maintenance of software; repair and maintenance of computer software databases; repair and maintenance of software for monitoring, analysing, controlling and running physical world operations; repair and maintenance of machine learning software for analysis; repair and maintenance of artificial intelligence software for analysis; repair and maintenance of downloadable computer software for collection, analysing and organising data in the field of deep learning; repair and maintenance of computer software for the monitoring of computer systems; repair and maintenance of machine learning software for surveillance; repair and maintenance of cloud network monitoring software; repair and maintenance of industrial automation software; repair and maintenance of artificial intelligence software; repair and maintenance of artificial intelligence software for surveillance; repair and maintenance of interactive software based on artificial intelligence; repair and maintenance of software for the integration of artificial intelligence and machine learning in the field of big data; repair and maintenance of process controlling software; repair and maintenance of network operating system programs; repair and maintenance of networking software; repair and maintenance of computer software platforms for social networking; repair and maintenance of computer software for wireless network communications; repair and maintenance of smart manufacturing software; repair and maintenance of editing software; repair and maintenance of computer operating programs; repair and maintenance of operating system programs; repair and maintenance of computer operating system software; repair and maintenance of factory automation software; repair and maintenance of production support software; repair and maintenance of computer programs for connecting remotely to computers or computer networks; repair and maintenance of downloadable software for remotely accessing and controlling a computer; repair and maintenance of cloud server software; repair and maintenance of cloud computing software; repair and maintenance of application software for cloud computing services; repair and maintenance of downloadable cloud computing software; repair and maintenance of optimisation software; repair and maintenance of industrial process control software; repair and maintenance of downloadable media control software; repair and maintenance of computer software

THE MARK CONSISTS OF STANDARD CHARACTERS WITHOUT CLAIM TO ANY PARTICULAR FONT STYLE, SIZE OR COLOR

PRIORITY DATE OF 10-11-2022 IS CLAIMED

OWNER OF INTERNATIONAL REGISTRATION 1770548 DATED 04-11-2023, EXPIRES 04-11-2033

No claim is made to the exclusive right to use the following apart from the mark as shown: "SMART PRESS" for International Classes 9 and 42

REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION

WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.

Requirements in the First Ten Years*

What and When to File:

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.* See 15 U.S.C. §1059.

Requirements in Successive Ten-Year Periods*

What and When to File:

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.*

Grace Period Filings*

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

***ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.

NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.
