Service Mark

Trademark

Principal Register

nChain Licensing AG (SWITZERLAND LIMITED COMPANY)
Grafenauweg 6
Zug, SWITZERLAND CH-6300

CLASS 9: Downloadable or recorded computer software and firmware for using electronic messaging systems; downloadable or recorded computer software and firmware for using information technology systems; downloadable or recorded computer software and firmware for the transmission and delivery of financial information and transaction information from and to cryptographic ledgers and databases via cellular networks, the internet and satellite networks; downloadable or recorded computer software and firmware for transmission and delivery of information relating to the transfer and assignment of financial assets, including currency, stocks, shares, bonds, real estate, property, intellectual property, tangible and intangible assets and interests therein and transaction information from and to cryptographic ledgers and databases via cellular networks, the internet and satellite networks; downloadable or recorded computer software and firmware for the transmission and delivery of medical records data, DNA and gene and protein information and transaction information from and to cryptographic ledgers and databases via cellular networks, the internet and satellite networks; downloadable or recorded computer software and firmware for the transmission and delivery of films, lyrics, media content, movies, music compositions, photographs, pictures, software, awards/rewards points, big data, records, songs, video games and transaction information from and to cryptographic ledgers and databases via cellular networks, the internet and satellite networks; downloadable or recorded computer software and firmware for facilitating access to temporary non-downloadable computer software that allows users to send, receive, store, and safeguard financial, personal, employment, tax, property and medical records; downloadable or recorded computer software and firmware for facilitating a secure, web-based service enabling individuals to remotely access, send, receive, store, and manage financial, personal, employment, tax, property and medical records; downloadable or recorded computer software and firmware for managing an electronic cloud-based database of financial, personal, employment, tax, property and medical records; downloadable or recorded computer software and firmware to facilitate a directory information and application service provider featuring application programming interface (API) software for integration of financial, personal, employment, tax, property and medical records into websites and mobile applications; downloadable or recorded computer software and firmware for maintaining and recording the ownership of digital files and data; downloadable or recorded computer software and firmware for maintaining the integrity of digital files and data; downloadable or recorded computer software and firmware for digital file and data security services; downloadable or recorded computer software and firmware for digital file and data time stamping services; downloadable or recorded computer software and firmware for digital file and data transaction database services;

Coke Moya Smead

Acting Director of the United States Patent and Trademark Office

downloadable or recorded computer software and firmware for proof of ownership of digital file and data services; downloadable or recorded computer software and firmware for digital file and data integrity services; downloadable or recorded computer software and firmware for providing a website or network featuring technology that creates records of all executed transactions of digital files and data located in a database or network thereby providing a website or network for storing digital files and data securely and anonymously; downloadable or recorded computer software and firmware for facilitating a website or network for maintaining the security and integrity of digital files and data; downloadable or recorded computer software and firmware for providing a website or network featuring technology that provides users with cryptographic hash services and functions; downloadable or recorded computer software and firmware for facilitating evidence services; downloadable or recorded computer software and firmware for facilitating evidence storage services; downloadable or recorded computer software and firmware for facilitating time stamping services and security services; downloadable or recorded computer software and firmware for providing access to an app to interface with peer-to-peer networks; downloadable or recorded computer software and firmware for providing a solution for data and digital file uploads; downloadable or recorded computer software and firmware for providing associated backend infrastructure through a service or product to allow for operation of data transfer tasks; downloadable or recorded computer software and firmware for maintaining the security and integrity of digital files and data; downloadable or recorded computer software and firmware providing a solution to capture various types of digital files and data; downloadable or recorded computer software and firmware providing access to interface software to transfer data and digital files; downloadable or recorded computer software and firmware providing a means of verifying a chain of custody; downloadable or recorded computer software and firmware providing a service to obtain digital file or data ownership; downloadable or recorded computer software and firmware providing a service to facilitate peer-to-peer consensus of data or digital file integrity; downloadable or recorded computer software and firmware for computer security services in the nature of providing authentication, issuance, validation and revocation of digital certificates; downloadable or recorded computer software and firmware for electronic storage of files and documents; downloadable or recorded computer software and firmware for evidence storage services, namely, electronic storage of files and documents; downloadable or recorded computer software and firmware for evidence services, namely, electronic document and e-mail authentication services; downloadable or recorded computer software for electronic document and e-mail authentication and time-stamping services; downloadable or recorded computer software and firmware for facilitating temporary use of online, non-downloadable software for interfacing with peer-to-peer networks, for data and digital file uploads, for maintaining the security and integrity of digital files and data and for capturing various types of digital files and data, for transferring data and digital files, for use in verifying a chain of custody; downloadable or recorded software and firmware for interfacing with peer-to-peer networks, for data and digital file uploads, for maintaining the security and integrity of digital files and data and for capturing various types of digital files and data, for transferring data and digital files, for use in verifying a custody; downloadable or recorded computer software and firmware for the design and implementation of technology solutions for the purpose of document authentication and tracking for the purposes of verifying chain of custody and evidence management; downloadable or recorded computer software and firmware for facilitating a website or network featuring technology that enables users to access records of all executed transactions of digital files and data located in a database or network; downloadable or recorded computer software and firmware for facilitating a website or network for use in storing digital files and data; downloadable or recorded computer software and firmware for facilitating a website or network featuring technology that enable users to securely and anonymously store digital files and data; downloadable or recorded computer software and firmware for facilitating a website or network featuring technology that enable users to maintain the security and integrity of digital files and data; downloadable or recorded computer software and firmware for facilitating a website or network featuring technology that provides users with cryptographic hash services and functions;

downloadable or recorded computer software and firmware for creating an on-line community for registered users to share data and maintain digital file integrity during peer-to-peer data sharing; downloadable or recorded computer software and firmware for records management services, namely, maintaining and recording the ownership of digital files and data, maintaining the integrity of digital files and data, time-stamping of physical documents, providing proof of ownership of digital files and data; downloadable or recorded computer software and firmware for evidence records management services, namely, maintaining and recording the ownership of digital files and data, maintaining the integrity of digital files and data, time-stamping of physical documents, providing proof of ownership of digital files and data; downloadable or recorded computer software and firmware for providing a secured access database via the internet through which digital files and data transactions can be viewed, copied, and printed for purposes of verifying a chain of custody; downloadable or recorded computer software and firmware for downloadable mobile applications for interfacing with peer-to-peer networks, for data and digital file uploads, for maintaining the security and integrity of digital files and data and for capturing various types of digital files and data; downloadable or recorded computer software and firmware for downloadable interface software for transferring data and digital files; downloadable or recorded software and firmware for use in verifying a chain of custody; downloadable or recorded computer software and firmware for hosting, managing, developing, and maintaining applications, software, and web sites, in the fields of personal productivity, wireless communication, mobile information access, and remote data management for wireless delivery of content to handheld computers, laptops and mobile electronic devices; downloadable or recorded computer software and firmware for data encryption and decoding services; downloadable or recorded computer software and firmware for data encryption services; downloadable or recorded computer software and firmware for electronic document and e-mail authentication and time-stamping services; downloadable or recorded computer software and firmware for hosting, managing, and maintaining secure applications, software, and websites in the fields of closed, private, and decentralized ledger systems and transaction processing; downloadable or recorded computer software and firmware for hosting, managing, and maintaining secure applications, software, and websites in the fields of commercial and non-commercial transaction storage and processing; downloadable or recorded computer software and firmware for hosting, managing, and maintaining secure applications, software and websites in the fields of storing and processing of records and transactions involving financial assets, including currency, stocks, shares, bonds, real estate, property, intellectual property, tangible and intangible assets and interests therein, personal information, employment information, tax information, property information, medical information, films, lyrics, media content, movies, music compositions, photographs, pictures, software, awards/rewards points, big data, records, songs and video games; downloadable or recorded computer software and firmware for hosting, managing, and maintaining secure applications, software, and websites in the field of closed, private, and decentralized ledger systems maintained and secured by super peer agents; downloadable or recorded computer software and firmware for hosting, managing, and maintaining secure applications, software, and websites in the field of closed, private, and decentralized ledger systems allowing for immediate settlement capabilities; downloadable or recorded computer software and firmware for constructing and drafting of contracts; downloadable or recorded computer software and firmware for checking and validating compliance with the terms of a contract; downloadable or recorded computer software and firmware for recording the terms of a contract and compliance with contractual obligations; downloadable or recorded computer software and firmware for the creation of digital and/or blockchain records or tokens to represent and record the existence of assets; downloadable or recorded computer software and firmware to facilitate the management and/or transfer of digital and/or blockchain records which represent assets; downloadable or recorded computer software and firmware for the verification of payments and transactions; downloadable or recorded computer software and firmware to establish and facilitate communications between individuals, companies, organizations, groups and networks; downloadable or recorded computer software and firmware for the creation and application of electronic, digital

and blockchain signatures and authorizations to control transactions and the transfer of data; downloadable or recorded computer software and firmware for the operation and management point of sale devices and systems; downloadable or recorded fraud prevention computer software and firmware; downloadable or recorded record keeping software and firmware; downloadable or recorded audit management computer software and firmware; downloadable or recorded financial analytics computer software and firmware

CLASS 35: Publicity consultation; business management; business administration; provision of clerical, administrative and secretarial support services; dissemination of advertising and promotional material; subscription management services for business databases and information sources; collating of data in computer databases for business purposes; compilation of data in computer databases for business purposes; compilation and systemization of information into computer databases; business information, namely, provision of commercial information from online databases; compilation and input of information into computer databases; business organization and management consultancy; retail store and online retail store services in the field of computer software and firmware

CLASS 36: Insurance brokerage; banking services; on-line banking services; real estate agency services; issuing of travelers' cheques, debit cards, credit cards and charge cards; financial real estate estimates; financial management services; financial analysis; financial consultancy; providing financial information; providing financial information via a web site; providing financial information in the nature of commercial financial transaction data, account management, financial reporting, accounting features and related financial information by means of an online website; financial information processing; financial transaction processing services, namely, storing and transferring of digital currency, virtual currency, digital tokens and digital financial assets by means of an electronic wallet; financial transaction processing services, namely, conducting an online financial exchange for trading and transmitting digital currency, virtual currency, digital tokens and digital financial assets; financial transaction processing services, namely, online trading of digital currency, virtual currency, digital tokens, and digital financial assets; financial transaction processing services, namely, electronic funds transfer; financial transaction processing services, namely, bill payment services; financial transaction processing services, namely, cashless purchasing services for merchants and consumers whereby purchase monies are held in trust and sent to merchants upon sales to consumers; stored value card services, namely, processing electronic payments made through prepaid cards; financial transaction processing services, namely, electronic money issuance and transfer services; financial transaction processing services, namely, direct deposit of funds into customer bank accounts; financial information services relating to financial transactions; providing financial information by means of providing a searchable database containing financial information about transactions

CLASS 38: Telecommunications, namely, transmission of data for digital currency, virtual currency, digital tokens and digital assets via electronic communication networks; electronic transmission of data for digital currency, virtual currency, digital tokens and digital assets via computer terminals and electronic devices; providing information relating to telecommunications; communications by computer terminals or fiber optic network; radio or telephone communications; mobile radiotelephony communication services; providing user access to global computer networks; provision of access to on-line forums; providing access to databases; providing access connection by telecommunications to a global computer network

CLASS 42: Software based computer services, namely, design and development of electronic messaging systems, information technology (IT) systems, and software applications; software as a service (SAAS) services featuring software for transmission and delivery of financial information and transaction information from and to cryptographic ledgers and databases via cellular networks, the internet and satellite networks; software as a service (SAAS) services featuring software for transmission and

delivery of information relating to the transfer and assignment of financial assets, including currency, stocks, shares, bonds, real estate, property, intellectual property, tangible and intangible assets and interests therein and transaction information from and to cryptographic ledgers and databases via cellular networks, the internet and satellite networks; software as a service (SAAS) services featuring software for transmission and delivery of medical records data, DNA and gene and protein and transaction information from and to cryptographic ledgers and databases via cellular networks, the internet and satellite networks codes; providing a website featuring technology to enable the transmission and delivery of films, lyrics, media content, movies, music compositions, photographs, pictures, software, awards/rewards points, big data, records, songs, video games and transaction information from and to cryptographic ledgers and databases via cellular networks, the internet and satellite networks; providing temporary use of non-downloadable computer software that allows users to send, receive, store, and safeguard financial, personal, employment, tax, property and medical records; providing a secure, web-based service featuring technology enabling individuals to remotely access, send, receive, store, and manage financial, personal, employment, tax, property and medical records; cloud computing services featuring electronic non-downloadable database of financial, personal, employment, tax, property and medical records; providing temporary use of non-downloadable software for directory information management and application service provider featuring application programming interface (API) software for integration of financial, personal, employment, tax, property and medical records into websites and mobile applications; electronic data storage for maintaining and recording the ownership of digital files and data; electronic data storage for maintaining the integrity of digital files and data; electronic data storage for digital file and data security purposes; digital file and electronic data time stamping services; providing a website featuring technology for facilitating digital file and data transaction database services; computer security services, namely, proof of ownership of digital file and data services; computer security services, namely, digital file and data integrity services; providing a website or online computer network featuring technology that creates records of all executed transactions of digital files and data located in a database or network thereby facilitating a website or network for storing digital files and data securely and anonymously; providing a website or online computer network for maintaining the security and integrity of digital files and data; providing a website or online computer network featuring technology that provides users with cryptographic hash services and functions; electronic data storage, namely, the recordal, electronic storage and maintenance of digital records; electronic evidence storage services; electronic time stamping services and computer security services in the nature of administering digital certificates and keys; providing online, non-downloadable software applications to interface with peer-to-peer networks; providing online, non-downloadable software applications as a solution for data and digital file uploads; infrastructure as a service (IAAS) services, namely, providing associated backend infrastructure through a service or product to allow for operation of data transfer tasks; providing temporary use of non-downloadable software for maintaining the security and integrity of digital files and data; the development of computer systems for the capture of digital and data files; providing online, non-downloadable interface software to transfer data and digital files; electronic storage, namely, the acquisition, recordal, electronic storage and maintenance of digital records relating to the ownership and control of property; electronic data storage, namely, the acquisition, recordal, electronic storage and maintenance of digital files and data; electronic data storage via blockchain, data authentication via blockchain, certification of data via blockchain, blockchain as a service, namely, electronic data storage via blockchain, data authentication via blockchain, certification of data via blockchain; computer security services in the nature of providing authentication, issuance, validation and revocation of digital certificates; electronic storage of files and documents; evidence storage services, namely, electronic storage of files and documents; electronic evidence services, namely, electronic document and e-mail authentication services; electronic document and e-mail authentication and time-stamping services; providing temporary use of online, non-downloadable software for interfacing with peer-to-peer networks, for data and digital file uploads, for maintaining the security and integrity of digital files and data and for

capturing various types of digital files and data, for transferring data and digital files, for use in verifying a chain of custody; software as a service (SAAS) services featuring software for interfacing with peer-to-peer networks, for data and digital file uploads, for maintaining the security and integrity of digital files and data and for capturing various types of digital files and data, for transferring data and digital files, for use in verifying a custody; design and implementation of software and technology software solutions for the purpose of document authentication and tracking for the purposes of verifying chain of custody and legal evidence management; providing a website or online computer network featuring technology that enables users to access records of all executed transactions of digital files and data located in a database or network; providing a website or online computer network for use in storing digital files and data; providing a website or online computer network featuring technology that enable users to securely and anonymously store digital files and data; providing a website or online computer network featuring technology that enable users to maintain the security and integrity of digital files and data; providing a website or online computer network featuring technology that provides users with cryptographic hash services and functions; computer services, namely, creating an on-line community for registered users to share data and maintain digital file integrity during peer-to-peer data sharing; computer services, namely, hosting an interactive web site for records management that allows users to maintain and record the ownership of digital files and data, maintain the integrity of digital files and data, time-stamp of physical documents, provide proof of ownership of digital files and data; computer services, namely, hosting an interactive web site for evidence records management services that allows users to maintain and record the ownership of digital files and data, maintain the integrity of digital files and data, time-stamp physical documents, and provide proof of ownership of digital files and data; providing a secured access non-downloadable database via the internet through which digital files and data transactions can be viewed, copied, and printed for purposes of verifying a chain of custody; providing online, non-downloadable mobile applications for interfacing with peer-to-peer networks, for data and digital file uploads, for maintaining the security and integrity of digital files and data and for capturing various types of digital files and data; providing online, non-downloadable interface software for transferring data and digital files; providing online, non-downloadable software for use in verifying a chain of custody; application service provider, namely, hosting, managing, developing, and maintaining applications, software, and web sites, in the fields of personal productivity, wireless communication, mobile information access, and remote data management for wireless delivery of content to handheld computers, laptops and mobile electronic devices; data encryption and decoding services; data encryption services; electronic document and e-mail authentication and time-stamping services; application service provider, namely, hosting, managing, and maintaining secure applications, software, and websites in the fields of closed, private, and decentralized ledger systems and transaction processing; application service provider, namely, hosting, managing, and maintaining secure applications, software, and websites in the fields of commercial and non-commercial transaction storage and processing; application service provider, namely, hosting, managing, and maintaining secure applications, software, and websites in the fields of storing and processing of records and transactions involving financial assets, including currency, stocks, shares, bonds, real estate, property, intellectual property, tangible and intangible assets and interests therein, personal information, employment information, tax information, property information, medical information, films, lyrics, media content, movies, music compositions, photographs, pictures, software, awards/rewards points, big data, records, songs and video games; application service provider, namely, hosting, managing, and maintaining secure applications, software, and websites in the field of closed, private, and decentralized ledger systems maintained and secured by super peer agents; application service provider, namely, hosting, managing, and maintaining secure applications, software, and websites in the field of closed, private, and decentralized ledger systems allowing for immediate settlement capabilities; scientific research and engineering services featuring evaluations and estimates in the scientific and technological fields rendered by engineers and scientists; research and development of new products for others; consultation on computer design and development; consulting

on information technology; hosting of servers; professional consultancy services relating to information technology; the development of software solutions for the uploading of data and digital files

The mark consists of the wording "NCHAIN" in stylized font.

OWNER OF INTERNATIONAL REGISTRATION 1638574 DATED 07-14-2021,
EXPIRES 07-14-2031

SER. NO. 79-330,934, FILED 07-14-2021

REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION

WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.

Requirements in the First Ten Years*

What and When to File:

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.* See 15 U.S.C. §1059.

Requirements in Successive Ten-Year Periods*

What and When to File:

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.*

Grace Period Filings*

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

***ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.

NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.
