CAPMASTER

Reg. No. 7,452,148

Registered Jul. 23, 2024

Corrected Jun. 10, 2025

Int. Cl.: 7, 9, 42

Service Mark

Trademark

Principal Register

Finattec Holding AG (SWITZERLAND AKTIENGESELLSCHAFT (AG))
Industriestrasse 37A
Brügg BE, SWITZERLAND CH-2555

CLASS 7: Machines and installations for removal of defective parts; sorting machines for industry, namely, machines for sorting plastic pieces, container closures, plastic container closures, bottle closures; machines for manufacture of packaging, plastic tubes, aluminum tubes, aluminum cans, plastic bottles and their closing devices; power tools, namely tile saws; cutting machines; cutting machines for metalworking; compression moulding machines; printing machines for commercial or industrial use; industrial printing machines, namely, color laser printers for printing indicia on container closures for industrial purposes; paper coating machines; die-stamping machines; printing presses for photogravure; engraving machines; inking apparatus for printing machines; bottling machines; conveyors being machines; belt conveyors; belts for conveyors; pneumatic transporters; roller conveyors; blowers for conveyor systems, feeders in the nature of mechanical discharging hoppers and conveyors being parts of machines, ejectors being parts of machines; compressed air fans being parts of machines

CLASS 9: Scientific, surveying, photographic, cinematographic, optical, weighing, measuring, signaling, checking in the nature of inspecting and monitoring apparatus and instruments, namely cameras, industrial calibration sensors, optical sensors, optical inspection apparatus for industrial use, metal-detecting sensors for industrial purposes, all for industrial use; apparatus for data, sound or image recording, transmission and reproduction; blank magnetic, electronic and optical data carriers; data processing apparatus; computer hardware and computer peripheral devices; electric control, testing and monitoring apparatus, namely apparatus for testing the integrity of container closures and for determining industrial flaws in container closures; electric installations for the remote control of industrial operations; infrared cameras; video cameras; digital photographic cameras for industrial use; cameras with linear image sensors; scientific and technical apparatus, namely optical mirrors; inspection mirrors for inspecting work; proximity sensors; acceleration sensors; distance sensors; pressure sensors; speed sensors; infrared sensors; optical sensors; photoelectric sensors; position sensors in the nature of sensors for determining position; timing sensors; motion sensors; optical sensors for measuring structural features and flaws in container closures, other than for medical use; ultrasonic sensors; vibration sensors; heat detectors; lasers not for medical use; lasers for measuring; laser measuring systems; checking and measuring apparatus for quality control of industrially manufactured parts, namely measuring machines for measuring container closures, and testing equipment for measuring the form of workpieces; checking and measuring apparatus for removal of defective parts, namely measuring machines for measuring manufactured parts; checking and measuring apparatus, namely testing equipment for measuring the form of containers and their closures

CLASS 42: Industrial research, product development and product quality testing in the field of containers, container closures and quality control for others in the manufacture and testing thereof; mechanical research; research and development services relating to measuring and regulating technology in the fields of mechanical engineering, and of the

Coke Mogn Smeut

Acting Director of the United States Patent and Trademark Office

manufacture and quality control of containers and container closures; product research and development of containers, container closures, inspection- and quality-control systems therefor, and new products; research and development of new products for third parties; quality analysis and evaluation of the goods of others in the field of product development; technical consultant services with respect to product development; industrial engineering analysis and industrial research services in the field of industrial product inspection and quality control; industrial research, product development, analysis and consultancy services in the field of engineering; design and development of computers; installation and maintenance of computer software; maintenance and updating of process control software; design and development of computer hardware for use in manufacture; design and development of computer hardware for industrial applications; construction work planning and design services in the nature of design for others in the field of machinery and construction drafting as well as consultant services relating thereto; construction drafting; providing information in the field of product development; providing information and data with respect to scientific and technological research and development; technical measuring and testing services in the nature of materials testing and quality-control measurement and analysis of industrially manufactured parts to ensure the parts are in good working order; conducting of quality control tests for others; quality control testing for others and consultancy relating thereto; quality control of goods; conducting of quality control tests on products and services; inspection of products, namely containers and container closures, for quality control purposes; product development and testing services in the field of engineering; testing of materials; product quality control testing; quality control for others and technical product testing services; product testing; testing of materials; quality control testing services for industrial machines; testing, analysis and evaluation of third-party goods and services for others to determine conformity with certification standards; development and testing of product-manufacturing and testing methods; design and development of testing and analysis methods, namely design of test methods to evaluate container-closure performance in the field of packaging; design and development of new technologies for third parties in the packaging industry; product quality testing services

THE MARK CONSISTS OF STANDARD CHARACTERS WITHOUT CLAIM TO ANY PARTICULAR FONT STYLE, SIZE OR COLOR

PRIORITY DATE OF 09-01-2022 IS CLAIMED

OWNER OF INTERNATIONAL REGISTRATION 1722753 DATED 02-23-2023, EXPIRES 02-23-2033

SER. NO. 79-366,838, FILED 02-23-2023

REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION

WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.

Requirements in the First Ten Years*

What and When to File:

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.* See 15 U.S.C. §1059.

Requirements in Successive Ten-Year Periods*

What and When to File:

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.*

Grace Period Filings*

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

***ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.

NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.
