## United States Patent and Trademark Office

**Reg. No. 7,657,496**

**Registered Jan. 21, 2025**

**Corrected Jul. 15, 2025**

**Int. Cl.: 7, 9, 37, 38, 42**

**Service Mark**

**Trademark**

**Principal Register**

DMG MORI CO., LTD. (JAPAN CORPORATION)

106, Kitakoriyama-cho,  
Yamatokoriyama-shi,  
Nara, JAPAN 639-1160

CLASS 7: Metalworking machines and machine tools, and their structural parts; dedicated and specially adapted testing apparatus and monitoring apparatus for numerically controlled machine tools; dedicated and specially adapted measuring apparatus for numerically controlled machine tools; dedicated and specially adapted sensors for machine tools, all the above mentioned goods not from the dental field

CLASS 9: Electric communication machines and apparatus for connecting to telecommunications network; Downloadable computer programs for monitoring computer networks; Measuring and testing devices and monitoring devices for measuring, testing, and monitoring the performance and efficiency of numerically controlled machine tools; Measuring instruments for numerically controlled machine tools; Vibration sensors for machine tools; Automatic electrical controllers for numerically controlled machine tools; Electric controllers for numerically controlled machine tools; Connection modules for electrical controllers; Programmable electronic controllers for metalworking machine tools; Electronic control systems for metalworking machine tools; Electric control apparatus for numerically controlled machine tools; Downloadable interface software and computer interfaces for controlling numerically controlled machine tools; Interface cards for data processing equipment in the form of printed circuits for controlling numerically controlled machine tools; Downloadable computer software for controlling industrial processes; Downloadable computer software for controlling metalworking machine tools for use in connection with industrial manufacturing and/or manufacturing planning, in particular numerically controlled programs and machine tool operating programs; Data processing equipment; Computers; Electronic storage device in the nature of memory media for storing information collected from data processing equipment; Interfaces for computers; Communication interface units, namely, audio interfaces; Data bus interface devices, namely, electronic interface equipment for machine tools to input or output computer numerical control data;

*Coke Moya Smeat*

Acting Director of the United States Patent and Trademark Office

Computer hardware for telecommunications; Numerical, electromechanical, electrical and electronic controllers and data processing equipment for machine tools and/or parts of machine tools

CLASS 37: Installation, maintenance and repair of information communication network system for numerically controlled machine tools; maintenance of electronic control systems

CLASS 38: Providing information in the field of telecommunications featuring building in-plant networks; Internet service provider services, namely, transmitting information via the Internet concerning global computer network data in the field of monitoring the operating status of numerically controlled machine tools; Providing telecommunications connections to a global computer network for monitoring operating status of numerically controlled machine tools

CLASS 42: Conducting of feasibility studies in the field of new technologies regarding machine tools; Engineering services relating to design of machine tools; Development of computer software programs stored on data carriers for computer-aided design (CAD), computer-aided manufacturing (CAM), and computer numerical control (CNC) for use in construction and automated production; Development and creation of computer programs for data processing; Computer software consultation services relating to man-machine interfaces for computer software; Design of software for electronic data processing; Design of data processing systems; Design of computer programs; Development and creation of electronic control systems; Creating computer programs for industrial production and for creating computer programs for the numerical control of machine tools; Providing a website featuring technology enabling users to remotely view and monitor the operating status of numerically controlled machine tools connected to a network

PRIORITY CLAIMED UNDER SEC. 44(D) ON JAPAN APPLICATION NO. 2022-138035, FILED 12-02-2022, REG. NO. 6737050, DATED 09-19-2023, EXPIRES 09-19-2033

The mark consists of a circular design consisting of six dots connected by lines, except for the upper right portion which tilts into the center into a central dot with an open center.

SER. NO. 98-019,098, FILED 05-30-2023

## REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION

**WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.**

### Requirements in the First Ten Years\*

#### What and When to File:

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.\* See 15 U.S.C. §1059.

### Requirements in Successive Ten-Year Periods\*

#### What and When to File:

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.\*

### Grace Period Filings\*

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

**\*ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

**NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.**

**NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.**
